Price : Rs. 45:00

Preface to the Second Edition

I am happy to place in the hands of my esteemed readers the second revised and enlarged edition of "PROBLEMS AND SOLUTIONS IN BOOK-KEEPING FOR C.A.I.I.B." The encourging response to the first edition has created in me the confidence regarding the approval of its subject matter and presentation. Some of the salient features of this new edition are as follows:

- Ever since the publication of its first edition, Indian Institute of Bankers conducted 8 examinations in the subject (from November 1979 to May 1982). All the examination problems have been solved, arranged topic-wise and incorporated in the relevant chapters except the paper for May, 1983 which is solved separately at the end of the book.
- Solved practical problems have been increased from 161 and theretical problems from 75 to 79, i.e., an overall increase of problems alongwith their solutions.
- The 9 sections of the book are now subdivided into 35 topics instead of 33 topics. Topics on 'Average due date' and 'partnership-final accounts' have now been included in this edition.
- Solutions of various problems have been made more explanatory. This has been done on the basis of the enquiries received from readers from different places. This will enable students to improve their under standing of the procedure/calculations without any loss of time.
- A set of instructional aids is provided to facilitate home study by students preparing for this professional examination, viz. Problems arranged under suitable subheadings, detailed solutions; Notes, hints and assumptions given at the end of tricky problems.

I am immensely thankful to all who have used the book and helped me generously by giving suggestions from time to time. There will be undoubtedly, a number of mistakes and shortcomings in the book. I shall feel grateful to all those who take the trouble of pointing out these and sending more suggestions and comments.

At the end I shall be failing in my duty to the students if I do not thank them for the very warm reception accorded to the book. Wishing them again all success in examination and promotions in service.

New Delhi 18th July, 1983

S. P. OBEROI

Preface to the First Edition

"PROBLEMS AND SOLUTIONS IN BOOK-KEEPING FOR C.A.I.I B." is especially designed to cater to the overdue requirement of the candidates preparing for the Part-I examination of the Indian Institute of Bankers.

The book contains the following special features:

- It comprehensively covers the entire syllabus. The book has been divided in 9 sections (strictly according to the prescribed syllabus of the Institute). These sections being further sub-divided into 33 topics. Each topic is brief, but it provides complete information on the related subject matter in a logical sequence.
- To enable the candidates to acquire a sound knowledge of the subject matter, every topic is started with a brief theory, which is followed by the solved practical examination problems. The book contains 236 problems—75 theoretical and 161 practical.
- To arrist assimiliation, all the question papers of the C.A.I.I.B. (Part-I) examination commencing from February, 1966 till August, 1978 (for the 25 sessions) have been solved and arranged topic-wise. Examination paper for April, 1979 has been solved in the appendix at the end of the book.
- All the solutions are self-explanatory and to the point. Foot noteand detailed workings have been extensively used to illustrate and highlight the difficult points.
- The book is written in a simple, concide and intelligible language,
 we as to enable a condition hasing on prior knowledge of the subject to group said; it complemations and intellectes of the subject.

- It also provides an easy work of reference for those who have basic knowledge of the subject.
- For easy reference, paper-wise index as well alpha-hetic index have heen compiled at the end of the hook.
- Trend of important topics has been incorporated to enable the eandidates to have their own scientific guess for the next examination.
- This hook is primarily intended to be a practical guide for the banking candidates appearing in the Book-keeping paper of Part-I examination of the Indian Institute of Bankers.

I take this opportunity of expressing my hest thanks to Shri Prakash Chand, Shri Pratap Chand and to a haod of loyal workers, whose uniting efforts and preservance made it possible to bring out this book before you.

I acknowledge, with appreciation, helpful assistance and encouragement, which I got from my colleagues. I feel indebted to all those, who enriched my thinking from time to time. Finally, let me admit frankly that this book would never have seen the rays of the sun without the co-operation of my mother-Smt. Kamlo Devi, wife-Shanta, son-Deepak and daughter-Shivali, who tolerated my faults and foihles while I was pre-occupied with the writing of this book.

I wish the readers all success not only in the examination and service, but also in life and shall be grateful if mistakes and deficiencies are brought to my knowledge.

٨ INTRODUCTION

Problem 1. What do you understand by the term 'Book-keeping' What are the objects of Book-Keeping? Solution. Book-keeping is an art of recording financial tran

actions in a set of books, in such a way as to make others understand at glance and with as little trouble as possible the net result of the tran actions entered into during a given period and the financial position of the business entity as at a particular date.

The record of business transactions is kept in such a manner that a any given date the owner/s of a business is/are able to know :

(1) The exact state of his/their relationship with the individua with whom he/they deal: (a) The amount and names of the customers from whom the bus

ness has to receive payments (DEBTORS); and The amount and the names of the persons to whom the bus ness has to make payments (CREDITORS) (2) The result of the transactions-whether profitable or other

wise, and the amount of profit or loss for the period. The types an amounts of various heads of incomes and expenses can also be ascertained.

The financial position of the business: (3) The value and nature of the assets or properties of the business (a)

(the properties, possessions and beloagings). The value and nature of liabilities (sums owing by the firm t **(b)** others).

The amount of owners' capital (excess of assets over liabilities) (c) The size and the reasons for increase or decrease in the amoun (4)

of capital.

Information of cash so hand and cash at bank/s. (5) The value of stock of goods in hand.

(6) Details of money invested in fixed assets.

(8) The details and quantum of cash and credit purchases and sale made during the period.

P.S.B.K. 3 83-1.

(9) Other facts and information required by the Income Tax, Sales Tax or other authorities.

Problem 2. Give the definition of Accounting? How does it differ from Book-keeping?

Solution. Accounting is the art of recording, classifying and summarising in a significant manner and in terms of money, transactions and events which are, in part at least, of a financial character, and interpreting the results thereof. There is not much difference between the two terms "Book-keeping and Accountancy". They are two different stages. The initial stage, i.e., the original recording of business transactions is called Book-Keeping. Accounting is a generic term and Book-Keeping is a part of it.

Problem 3. Explain the following terms:

(i) Business Transactions, (ii) Account, (iii) Ledger, (iv) Posting, (v) Debtor, (vi) Creditor, (vii) Assets, (viii) Liabilities, (ix) Capital, (x) Drawings, (xi) Solvent, (xii) Insolvent, (xiii) Debit and Credit, (xiv) Double Entry System and (xv) Entry.

Solution. (i) Business Transactions. Any exchange of money or money's worth, i.e., exchange of goods and services between two persons is called a business transaction. It may relate to purchase and sale of goods, receipt and payment of cash and rendering of service by one person to another.

When payment for a business activity is made immediately, it is called cash transaction, but when the payment is postponed to a future date, it is called a credit transaction.

(ii) Account. An account is a summarised record and systematic arrangement of transactions for a period affecting one person, one kind or property or one class of gains or losses.

Every account is divided into two sides—Debit side (i.e., the left-hand side) and Credit side (i.e., the right hand side).

Accounts are broadly classified into two heads:

- (I) Personal Accounts. These are the aecounts of natural persons, artificial persons and body of persons, and representative personal accounts with whom the trader deals. Examples would be: Mohan, Ashok, Rama Bros.. Delhi Cloth Mills, Chemsford Club, Bank of Baroda, Outstanding Salaries, Insurance Prepaid, Capital, Drawings, etc.
- (11) Empersonal Accounts. These are those accounts, which do not effect particular persons, but affect business in general, such as Machinery, Furniture, Cash, Rent, Salaries, etc.

These impersonal accounts are further sub-divided into two classes:

- (a) Real Accounts. These are the accounts of property or possessions, i.e., accounts relating to tangible things such as Cash, Stock in hand, Plant and Machinery, Investments, Buildings, etc.
- (b) Wominal Accounts. These are the accounts relating to gains, incomes, expenses or losses, e.g., Discount, Commission, Exchange, Rent,

Salary, Conveyance, Entertainment, Advertisement, Stationery consumed, Brokerage, etc.

Types of Accounts

| Impersonal | Real | Nominal

(lii) Ledger. This is a bound book or register containing the various accounts connected with business.

- (ii) Posting. Every transaction is first recorded in the Journal, and from it, this is transferred to the concerned account in the Ledger. This process of transferring the transactions from the Journal to the ledger is called 'Posting'.
 - (v) Debtor. One who has to pay to the firm.
 - (ir) Creditor. One to whom the firm has to pay,
 - (vii) Assets. Anything of value owned by a person or business.
- (vill) Liabilities. Anything owed, a debt, the claim of an outsider against the business.
- (ix) Capital. The owner's interest in his business, i.e., the value of assets less the value of liabilities.
- (x) Drawlogs. Any amount or goods drawn by the proprietor
- of a business for personal use.

 (xi) Solvent. A person is said to be 'Solvent' when his assets
- exceed or equal his liabilities.

 (xil) Insolvent. A person is 'Insolvent' when his liabilities exceed
- (xii) Insolvent. A person is insolvent when his machines exceed his assets.

 (xiii) Debit and Credit. When in an account, a record is made
- on the left-hand side, it is stated that he has debited that account; and when an amount is recorded on the right-hand side, it is credited. The rules for these are:
 - *All assets accounts increase on the debit side and decrease on the eredit side.
 - *All liability accounts increase on the eredit side and decrease on
 - the debit side.

 *Capital increases on the credit side and decreases on the debit side.
 - *Capital increases on the credit side and decreases on the debit side.

 *Incomes increase on the credit side and decrease on the debit side.
 - *Increases in expenses are debits and decreases are eredits.
- (xie) Double Entry System. Every business transaction has a two-fold effect, affecting two accounts in opposite directions. In a cash sale of poods, cash is received and goods are given; in each purchases of goods, goods are received and cash is paid; in a credit sale the customer becomes the debtor and goods are given; similarly, in a credit purchase goods are received and the supplier becomes the creditor.

To have a complete record, both the aspects of each business transaction are recorded—one account is debited while the other account is credited with an equal amount.

This method of recording every transaction in two accounts is called

Double Entry System.

(xv) Entry. The record made in the books of accounts in respect of a transaction is called an entry.

Problem 4. Give short note on:

Single Entry Book-keeping; Double Entry Book-keeping.
(I.I.B. Part I. May 1969)

Solution.

Single Entry Book-Keeping

Single Entry is a crude form of Book-keeping under which only Personal Accounts and Cash Accounts are maintained, and only one aspect of each transaction as it affects the Personal Accounts is recorded. The main purpose of single entry book-keeping is to enable a trader to ascertain from his books how much is due to him from his debtors and how much he owes to his creditors.

In the absence of any Impersonal Accounts being kept, the books fail to disclose information for the preparation of Profit & Loss Account, or particulars of Assets and Liabilities for the preparation of Balance Sheet.

It is an unscientific and incomplete system.

The arithmetic accuracy of the books cannot be tested, because a Trial Balance cannot be prepared.

Sales and Purchases cannot be readily ascertained.

The trader cannot ascertain as to what profit or loss he has made or sustained and how such profit or loss has arisen, because trading and profit and loss accounts cannot be prepared.

The true financial position of the business cannot be ascertained, because balance sheet cannot be prepared.

Double Entry Book-Keeping

Double Entry system of Book-keeping is that system by which the two-fold aspects of every transaction are recorded in appropriate accounts in the ledger.

This is a scientific and complete system.

It facilitates preparation of Trial Balance by the use of which the arithmetic accuracy of the records could be ascertained.

The profit or loss during a given period can be ascertained together with details.

The financial position of the business, at any given moment, can be ascertained by means of Balance Sheet.

This system affords significant information for purposes of control, etc.

JOURNAUSING.

1.5

The management can obtain important information from this system for making decisions.

Results of one period can be compared with previous periods,

The firm is saved from frauds and misappropriations.

n

JOURNALISING

Problem 1. What is Journal? Explain Journalising.

Solution. All business transactions, as and when they occur, are recorded in the Journal, which is given below;

	JOURNAL

	••	0111712			
(1)	(2)	(3)	(4)	(5)	_
Date	Particulars	L.F.	Debit Amount	Credit Amount	
Year M.D.			Rs.	Rs.	_
					•

Column (1) is used for entering the date of the transaction. The year is written on the top, then the date column is divided into two parts—the first part (M) is used for the month and the second part (D) for the date.

Column (2) is used for entering the names of the accounts which are affected by the transaction.

Column (3) is used for entering the page number of the Account in the Ledger, to which the entry is posted

Column (4) is used for recording the amount to be debited along

with the currency. Column (5) is used for recording the amount to be credited along

with the currency. The technique of analysing transactions as to which account is to be

debited and which account is to be credited is called Journalising. To learn journalising, it is very important to decide as to which class

of accounts are affected by that transaction. Having ascertained the above, the undernoted rules of debit and credit are to be followed :

(1) For Personal Accounts. The account of each person or firm is debuted with any benefit such person or firm receives and is credited with any benefit such firm or person gives. The rule is :

DEBIT THE RECEIVER. CREDIT THE GIVER.

(2) For Real Accounts. When any tangible thing-property, asset or possession-is received, the amount is debited and when such an asset is being given away, its account is credited. The rule is:

DEBIT WHAT COMES IN, CREDIT WHAT GOES OUT.

(3) For Nominal Accounts. Each such account is Debited when an expenditure or loss is incurred, and is credited when there is any gain. The rule is:

DEBIT ALL EXPENSES OR LOSSES, CREDIT ALL INCOMES OR GAINS.

Notes: For recording a transaction in the Journal, it must be mentally analysed on the following lines:

- (a) What are the accounts involved in the transaction?
- (b) Classify the accounts—whether Personal, Real or Nominal.
- (c) Rules of Debit and Credit applicable to that type of account.
- (d) Ascertain which account to be debited/credited.

Example. X started business with cash Rs. 25,000 on 1st Jan. 19...

Problem 2. Discuss the ruling, balancing and closing of a ledger account.

Solution. The ledger accounts record not only the amount of transactions, but also their effect and direction. For recording the debit entries distinctly from credit entries, a ledger account has two sides—Debit and Credit.

Usually a ledger account is ruled as follows:

Dr. NAME OF THE ACCOUNT Cr. Date Particulars 5 L.F. Particulars L.F. Amount Date Amount Rs. Rs. To name of By name of Credit A/c

An alternative ruling, which is adopted by the banks and some business houses is also given below:

Debit A/c

NAME OF THE ACCOUNT

Debit BALANCE Credit Date Particulats L.F. Initials Amount Amount Dr. Cr. Amount Rs. Rs. Rs.

To name of Credit A/c By name of Debit A/c

The name of the account is mentioned at the top.

The date of every transaction is recorded in the date column.

Every entry on the debit side commences with the prefix 'To' and on the credit side it commences with the word 'By' in the particulars column Every debit has a corresponding credit in the Double Entry System, therefore, when one account is debited, another account is credited. Hence, while debiting an account, the name of the account that is credited is shown; and while crediting an account the name of the account that is debited is shown in the particulars column.

In the L.F. column are written the page numbers of the Journal from where the entry is posted.

The debit and credit amount columns are used for writing the amounts of the transactions.

Separate ledger account is kept for each person, for each asset and liability and for each head of income or expense.

Ledger accounts are closed periodically. For this purpose, the two sides are totalled separately and the difference for balance) is written on the shorter side; then the two sides are totalled and tallied. The balance is then entered on the opposite side of the account for the next period.

Credit balance means that the totals of credit side are higher and Debit balance means that the totals of debit side are higher.

Balance in PERSONAL ACCOUNTS indicates whether the person is a Debtor (Debit balance) or is a Creditor (Credit balance) of the business entity on any one date.

Balance in REAL ACCOUNTS shows the incomings (Debits) and outgoings (Credits) of the several assets dealt in by the trader

Balance in NOMINAL ACCOUNTS shows the amounts of expenses incurred in carrying on the business (Debit) and the amounts and sources of income (Credit).

When the ledger accounts are closed, in the case of Real and Personal accounts, closing balances are carried forward which become the opening balances of the next period. The debit balances are shown as Assets and the credit balances are shown as Liabilities in the Balance Sheet. The balances of Nominal accounts are transferred to the Trading and Profit & Loss Account—the debit balances (expenses) are debited to this account and the credit balances (incomes) are credited to this account. The net profit (in case of credit balance) or net loss (in case of debit balance) from the Trading and Profit & Loss Account is transferred to the Capital Account, which is ultimately shown on the liabilities side of the Balance Sheet, it having a credit balance in the Personal Accounts.

Problem 3. How posting is made from the Journal in the Ledger?

Solution. From the journal, the entries are posted into the ledger on that side of the account on which they appear in the Journal—the Debit entries to the debit of the respective accounts and the credit entries to their credit.

Note. The amount of Purchases or Sales made is always arrived at after deducting the Trade Discount and only the net amount is considered. No entry is made in the books of accounts. Cash discount is allowed on payment being made before a certain stipulated time or period. The amount of cash discount is shown separately in the books of accounts - Discount allowed by the supplier is an expense and discount earned by the purchaser is an income for him.

C

CASH BOOKS

Problem 1. What is a Cash Book? What are the various type of Cash Book? How is it balanced? Explain the method of Posting.

Solution. The number of transactions relating to cash are usually large. Further, cash can easily be stolen by dishonest employees. Thus, it becomes utmost necessary to maintain up-to-date cash records which must be supervised by a responsible person. Cash Book is used for keeping a daily record of the transactions relating to receipts and payments of cash.

Cash Book serves a double function—one as a book of original entry and the other as a ledger account. If Cash Book is prepared, it is not necessary to open a separate Cash Account in the ledger.

Cash Book may be of three types:

- A. Simple Cash Book,
- B. Cash Book with eash and discount columns, and
- C. Cash Book with discount, cash and bank columns.

A. SIMPLE CASH BOOK

It records the receipts and payments of cash. All cash received in the form of notes, coins, cheques, bank drafts, postal orders or in any other form are recorded on the debit side and all cash payments are recorded on the credit side.

When cash is received, a printed receipt stating full particulars thereof, dated and signed by the cashier is generally issued to the person paying it and a carbon copy or counterfoil retained. This receipt number may be entered in a column provided for this purpose on the debit (Receipts) side. Similarly, for every payment, a supporting voucher may be prepared, whose number is then entered against the respective payment on the credit side.

Ruling:	
Receipts	
Date	

CASH BOOK

Payments.

Parti-Amount Date culars Re-

Rs.

Balancing:

Cash Book must be balanced daily and the balance shown by it must be tallied with actual cash in box. Since total cash paid can never exceed the opening balance plus cash received, the Cash Book always shows a debit halance which is carried forward to the next period.

Posting

Opening balance of the Cash Book is not posted to any account. The other entries appearing on the debit side of the cash book are posted to the credit side of the respective accounts. The postings from the credit side of the Cash Book are to the debit of the respective accounts. The closing balance of eash in hand is not posted to any account, but is carried forward as opening balance of cash for next period.

B. CASH BOOK WITH CASH AND DISCOUNT COLUMNS

A concern which allows each discount on amounts received and receives similar discounts on amounts paid, finds it convenient to have a cash book with an extra column on both sides -debit for discount allowed and credit for discount earned Discount column on the debit side represents cash discount allowed and on the credit side cash discount received.

Raling:

Balancing:

Cash columns are halanced and tallied with actual cash in box. It always shows a debit balance.

Discount columns are memorandum columns and are totalled only.

Posting:

The totals of discount columns are posted to the Discount Accoun in the ledger—debit totals to the debit side of the account and credit totals to the credit side of the account. The individual items of discount allowed (shown on the debit side) are posted to the credit of their respective personal accounts and each item of discount received (shown in the credit side) is posted to the debit of the respective personal account.

The cash columns are posted in the same way as in the Simple Cash Book.

C. CASH BOOK WITH DISCOUNT, CASH AND BANK COLUMNS

These days banking habit has become so widespread and is so convenient that many payments are made and received through cheques. Thus, when there is a Bank account and the bank transactions are entered through a simple cash book or a cash book with cash and discount column only, every time that a payment is made by cheque (or when a cheque is received from a customer and is deposited into the bank), four distinct steps have to be taken to record the fact. Two entries are to be made in the Cash Book, viz. one on the receipts or debit side to record the fact of the amount being received from the Bank (or from the debtors), and the other on the payments side to record the fact that the payment has been made on some account (or to the Bank). Then again both these entries will have to be posted. All this makes the account keeping highly cumbersome.

To avoid this unnecessary labour, the cash book may be so devised as to have not only cash and discount columns, but also a Bank column on either side.

Ruling:

Receipts

CASH BOOK

Payments

Amount

Amount

Date Parti- R. L.F. Dis. Cash Bank Date Parti- V. L.F. Dis. Cash Bank culars No. culars No.

Rs. Rs. Rs.

Rs. Rs. Rs.

The undernoted rules are observed while preparing such a Cash Book:

- (a) Cash received is entered in the cash column on the debit side.
- (b) Cash payaments are entered on the credit side in the eash column.
- (c) Payments by cheques are entered on the credit side in the bank column.
- (d) Deposits of cheques in the bank are recorded on the debit side in the bank column.

CASH BOOKS 1:15

(e) Direct deposits by eustomers into the bank account are debited in the bank column.

(f) Dishonour of a cheque, earlier deposited into the Bank, is recorded in the bank column on the credit side.

(g) Bank charges and payments made by the bank or interest ebarged by the bank are recorded in the bank column on the credit side.

- (h) Interest on deposits given by the bank, or interest, dividends, etc. collected by the bank are debited in the bank column.
- (i) Cash paid into the bank is recorded first on the credit side in the cash column as 'By Bank'. This being a transfer of cash from the office into the bank, the amount is also entered on the debit side in the bank column as 'To Cash'. Such an entry is known as CONTRA ENTRY and is denoted by writing letter 'C' in the ledger folio column on both the sides of the Cash Book to indicate that no posting is necessary.
- (j) Cash withdrawn from the Bank is recorded in the bank column on the credit side as 'By Cash' and simultaneously an entry is made in the cash column on the debit side as 'To Bank'. This is also a contra entry and is denoted by letter 'C' in the L.F. column on both the sides of the Cash Book.

Balancing:

The discount columns will be totalled.

The cash columns would always show a debit balance which would be carried down to the debit side in the cash column.

Bank columns usually show a debit balance and would show the trader's eash lying with the Bank. Should a trader, bowever, draw out more money than he bas lodged in the bank, the balance will then be a credit balance, and will mean overdraft.

Posting:

Each item of discount allowed will be posted to the credit of respective personal account and total of discount column (debit side) is posted to the debit side of Discount Account with the words 'To Sundry Debtors'. Similarly, each item of discount received will be posted to the debit of respective personal account and total of this side will be posted to the credit of Discount Account with the words 'By Sundry Creditors'.

Opening Balances of Casb and Bank columns are not posted. Closing balances are carried forward to the next period. Contra entries are also not posted. Rest items on the debit and credit sides of Casb and Bank columns are posted in the credit and debit sides of the concerned accounts respectively.

PETTY CASH BOOK

Problem 1. How are petty payments made and recorded in a business? What purpose does an Analytical Petty Cash Book Serve? What do you understand by 'Imprest System of Petty Cash'?

Solution. In every business, there are many petty and insignificant expenses like Taxi-fare, Coolie hire, Refreshment to visitors, Tips, Small charitable contributions, Purchases of stamps, or emergency purchase of supplies, etc. In order to record these petty administrative expenses, a separate book called Petty Cash Book is generally maintained.

Cheques are drawn periodically or amounts are advanced by the Chief Cashier from time to time to the Petty Cashier. This amount is credited in the Cash Book and posted to the debit of Petty Cash Account in the ledger. At the same time, the amount is entered on the debit side of the Petty Cash Book. On periodic intervals, the Petty Cashier presents a summary of expenses incurred by him during the stated period. A journal entry debiting each expense account with the total of the amount spend on it during the given period, and crediting the Petty Cash Account is then passed and posted.

Simple Petty Cash Book

It is written up just like the Cash Book, except that the columns for the date and particulars are common to both receipts and payments and are provided in the middle. The excess of debit over the credit on any flate show the Petty Cash Balance in hand.

Ruling:

SIMPLE PETTY CASH BOOK

Dr.	the beautiful the same of the					Cr.
Amount Received	CB Fol,	Date	Particulars	V. No.	L.F.	Amount Paid
Rs. P.				**************************************	······································	Rs. P.

Analytical Petty Cash Book

In this form the payments side is extended to show analysis of payments. All the amounts disbursed are entered on the credit side of the Petty Cash Book in the appropriate expenditure columns and also in the 'Amount Paid' column.

If payments to sundry parties are also made on account through the petty cash, a special column is provided in the Petty Cash Book for recording the amounts so paid, and the entries therein are individually posted to the ledger accounts of the parties.

Ruling :

ANALYTICAL

PETTY CASH BOOK

ANALYSIS OF PAYMENTS

Amount Recd. C.B. Fol. Particula V. No.	Postage Stationery	Cartage [†] Conveyance	Sundry Expenses L.F.	Personol Accounts
---	-----------------------	------------------------------------	----------------------------	----------------------

Rs. P. Rs.P. Rs.P. Rs.P. Rs.P. Rs.P. Rs.P. Rs.P.

Imprest System of Petty Cash

outstandings

Under the imprest system, a round sum is given to the Petty Cashier at the heginning of the period. This amount is fixed on making an estimate of the total payments that will have to be made from the Petty Cash over the choosen period, after which it would he convenient to reimburse the amount paid to the imprest. At the end of each such period, the Petty Cashier surrenders a statement of account and gets reimbursement of the amount actually spent by him.

Problem 2. Enter the following transactions in a columnar Petty Cash Book of A & Co. The easher, Mr. A, started with an imprest of Rs. 100 on 1st April, 1965 and was reimbursed the total amount expended at the end of the month:

BANK RECONCILIATION STATEMENT

Problem 1. What is a Bank Reconciliation Statement? Explain the reasons on account of which the balance as shown by the Pass Book sometimes does not tally with the balance as shown by the Bank column of the Cash Book. How a Bank Reconciliation Statement is prepared?

Solution. Every businessman who opens a current account in the Bank, he is given a Pass Book or a Statement of Account, which is a record of businessman's account in the bank's books. The credit side of this statement indicates the amounts deposited in the Bank and the debit side shows the amounts withdrawn therefrom.

The bank balance or bank overdraft as shown by this statement must be same, as the balance or overdraft shown in the bank column of the Cash Book, or in the Bank Account in the ledger of the trader.

It, however, very rarely happens in practice that the balance as shown by the Pass Book (Credit Balance) or Overdraft shown by it (Debit balance) agrees with the balance (Debit) or Overdraft (Credit) as shown in the Cash Book.

This difference may arise on account of the following reasons:

- (I) Unpresented Cheques. Cheques may have been issued in payment of accounts due, but they may not have been presented for payment up to the date on which the two balances are compared. In effect, they are the entries which have been entered on the credit side of the Cash Book in the bank column and have not as yet been entered in the Pass Book. Hence, the Pass Book will show more balance or lesser overdraft as compared with the balance or overdraft shown by the Cash Book to the extent of the amount of such unpresented cheques.
- (II) Uncredited Cheques. As soon as the cheques are paid into the Bank, the Bank Column in the Cash Book is debited. The Bank, however gives credit in the customer's account when it receives the amount of these cheques from the Bank upon which these are drawn. The effect of this will be that there will be no entry in the Pass Book and it will show lesser balance as compared with the bank balance shown by the Cash Book. In the case of overdraft, the Pass Book will show more overdraft than the amount shown by the Cash Book.
- (III) Excess Credits in the Pass Book. Credits for certain items (Interest on deposits, dividend or interest or rent collected, direct payments made by customers, wrong credits, etc.) might have been given in the Pass Book, but no corresponding entry may have been made in the Cash Book resulting in excess balance (or less overdraft) as per Pass Book as compared to the balance (or overdraft) shown by the Cash Book.
- (IV) Excess Debits in the Pass Book. Debits in the customer's account (Incidental charges, commission, exchange, insurance premium or subscriptions, etc., paid by the Bank as per the customer's standing instructions, bills or cheques dishonoured, interest on overdraft, wrong debits, etc.) might have been shown in the Pass Book, but no corresponding credit entry may have been made in the Cash Book. This will result

in lesser balance (or more overdraft) as shown by the Pass Book as compared with the balance (or overdraft) shown by the traders' books of accounts.

Hence, if any entry is only in the Pass Book, or only in the Cash Book, such transactions will affect the agreement of the balances shown by these books. To arrive at the balance of one book, from the other, a statement is prepared showing the reasons causing disagreement between the two. The statement is known as Bank Reconciliation Statement.

Preparation of a Bank Reconciliation Statement

A Bank Reconciliation Statement is drawn on the following lines:

- (a) Entries appearing in the Bank Column of the Cash Book are compared with the entries on the opposite side of the Bank's Pass Book,
- (b) The unticked entries in the Pass Book/Cash Book for the same periods, indicate the reasons for the disagreement.
- (c) If the balance as per Pass Book is taken as the starting point, uncredited cheques and excess debits in the Pass book are added to this balance; and unpresented cheques and excess credits in the Pass Book are deducted from the given balance to arrive at the balance as shown by Cash Book.
- (d) If the balance as per Cash Book is given, unpresented cheques and excess credits in the Pass Book are added to this balance; and uncredited cheques and excess debits in the Pass Book are deducted. The resultant figure will be the balance as shown by the Pass Book.
- (e) If the overdraft as shown by the Pass Book is taken as the starting point, unpresented cheques and excess credit in the Pass Book are added to the overdraft; and uncredited cheques and excess debits in the Pass Book are deducted from the given overdraft to arrive at the figure of overdraft shown by the Cash Book.
- (f) If the overdraft as per Cash Book is taken, uncleared cheques and excess debits in the Pass Book will be added to the given figure of overdraft; and uncredited cheques and excess credits given in the Pass Book are deducted. This will be the amount of overdraft as shown by the Pass Book.

Problem 2. From the following particulars prepare a Bank Resongiliation Statement as at 31st December, 1960

Balance as per Pass Book-Rs 6,34e

Cheques issued but not presented

R & Co. Rs. 439

S & Sons Rs. 596 B. Bros. Rs. 958.

Cheques deposited but not cleared until after close of the year:

J & Co. Rs, 506 H Bros. Rs. 913.

The banker had wrongly debited the account with Rs. 225, which error was rectified by them on 4tb January, 1961.

(I I.B. Part I, November 1966)

Book showed a credit balance of Rs. 9,436 on that date. (1) Out of the total cheques amounting to Rs. 1,536 issued during the month cheques of Rs. 496 were presented for payments in January 1968. One cheque of Rs. 50 issued to an upcountry party was lost in

- transit. (2) The Bank had, in accordance with the standing instructions
- of the account holder, paid Life Insurance Premium of Rs. 427, for which no entry was made in his books. (3) One of his customers directly deposited in the Bank Rs. 1,000
- for which no entry is recorded in his books. (4) A cheque for Rs. 579 was deposited in the bank on 15th
- December 1967 and the same was collected by the bank in due course, but the same was not recorded in the Cash Book.
- (5). The Cash Book (bank column) did not show the bank charges debited by the Bank amounting to Rs. 12.

Problem 5. On 31st December, 1964 the Bank Balance as per Cash Book of A Ltd. stood at Rs. 2,160. On scrutinising Bank Current Ale No. 1 with the Bank Pass Book, the Casher noticed the following:

- (1) A cheque of Rs. 80 drawn on No. 2 A/c had been wrongly debited to No. 1 A/c by the Bank.
- (2). A cheque for Rs. 100 paid in No. 2 A/c had been wrongly credited to No. 1 A/c.
- (3) A cheque for Rs. 60 paid in No. 1 A/c stands wrongly credited to No. 2 A/c.
- (4) A dishonoured cheque for Rs. 40 relating to North A/c, the entry in respect of which had been passed through the a refered to No. 2 A/c.

- (5) Cheques for Rs. 240 paid in on 29th December stood credited in the Pass Book on 3rd January.
- (6) Out of cheques amounting in all to Rs. 550 drawn and issued on 28th December, only cheques worth Rs. 220 had been cashed before 31st December.
- (7) Bank charges amounting to Rs. 6 and bank interest Rs. 25 appearing in the Pass Book are not yet recorded in the Cash Book.

You are required to prepare a Bank Reconciliation Statement as at 31st December, 1964.

(I.I.B. Part I. Feburary 1966)

Problem 11. On 31st March 1976, there was a balance of Rs. \$,900 in the Bank Account of Mr. Banke as per his Cash Book (Bank Column). It was subsequently discovered that—

(a) The receipt side of the Bank Column of the Cash Book had been overcast by Rs. 2,000.

(b) Cheques amounting to Rs. 7,520 were deposited and entered in books but not cleared.

(c) Cheques issued amounting to Rs. 10,460 have not been presented.

(d) Discount allowed Rs. 220 has been entered in the bank column instead of the discount column.

(e) A credit note of Rs. 580 received in March 1976 has not been entered in the books.

You are required to prepare the Bank Reconciliation Statement, so us to show the bank balance as per bank statement.

(I.I.B. Part I. May 1976)

SANK RECONCILIATION STATEMENT OF MR. BANKE Minus Amount (Overalraft) Amount (Balance) Rs. Problem 13. On 31st December 1970, my Pass Book No. 1 showed an overdraft of Rs. 9,500. Out of cheques of Rs. 4,500 paid in on 28th December, Rs. 2,000 appear to have been credited on 3rd January, 1971.

Out of cheques amounting to Rs. 8,000 issued during the month of December, cheques worth Rs. 4,500 appear to have been presented before 31st December, 1970. Inadvertantly, the Bank has credited a sum of Rs. 1,000 to my account which belonged to some other account. Interest on overdraft debited by Bank was Rs 500. This was subsequently entered by me in the book. My bank account showed a credit for Rs. 600 for interest on securities collected by it.

Prepare a Reconciliation Statement as on 31st December, 1970.

(I.J.B. Part I. May 197 I)

BANK RECONCILIATION STATEMENT

as on 31st December, 1970

Problem 14. From the following particulars, prepare a Bank Reconciliation Statement:

Balance as per Pass Book 31st December, 1973 overdrawn Rs 10,260. Cheques drawn on 31st December, but not cleared till January, 1974 Rs. 120, Rs. 1,025, Rs. 980 and Rs. 1,120.

Interest on overdraft debited by Bank Rs. 526 not entered in Cash Book.

Sum received on 30th December, 1973 but not lodged in Bank till 3rd January, 1973 Rs. 2,500.

Bank charges Rs. 10 entered in the Cash Book twice in error and an other item of Bank charges of Rs. 15 omitted to be entered in the Cash Book.

Bill receivable for Rs. 500 due on 29th December 1973 was passed to the Bank for collection on 28th December. 1973 and was entered in the Cash Book forthwith, whereas the proceeds were not credited in the Bank Pass Book till January, 1974.

A wrong debit of Rs. 1,500 was given in the bank pass book which was reversed by the Bank in January 1974.

Under standing instructions Bank had paid Rs. 150 as subscription to a local society, which was left off to be entered in the Cash Book.

(I.I.B. Part I, May 1974)

Problem 15. From the following particulars taken on 31st December, 1974 from the books of Advani & Co., prepare a Bank Reconciliation Statement to reconcile bank balance shown in the cash book with that shown in the pass book:

- (1) The Bank Pass Book shows an amount of Rs. 10,036 due to the bank from Advani & Co.
- (2) Three cheques of Rs. 135, Rs. 989 and Rs. 2,735 drawn in favour of creditors and handed over to them on 29th December 1974, were cleared only after 5th January, 1975.
- (3) Two cheques of Rs. 6.534 and of Rs. 2,080 were deposited in the bank on 29th December 1974, but were cleared on 7th January, 1975.
- (4) Interest charged by the Bank to the extent of Rs. 87 was not entered in the cash book.
- (5) In accordance with the standing instruction of the client, the Bank had paid Rs. 250 subscription for a club and Rs. 1,527 Life Insurance Premium for which no entries are found in the cash book.
- (6) The Bank had collected dividend of Rs. 900 on behalf of the client on the shares of M/s Hindustan Silk Mills Ltd., for which no entry was made in the cash book.
- (7) One cheque of Rs. 2,634 deposited in the bank on 15th December. 1974 and duly accounted for in the pass book was not entered in the cash book.

(I.I.B. Part I, November 1975)

Solution:

BANK RECONCILIATION STATEMENT OF ADVANI & CO. as on 31st December, 1974

	Totals b/fd	Rs. 8,701	Rs. 13,895

Problem 16. Fom the following particulars, prepare a Bank Reconciliation Statement of Alpha Electric Motors Private Ltd. as on 30th September 1976:

- (a) Overdraft on 30th September 1976 as per bank pass book
 Rs. 10,000.
 (b) Cheque deposited in the bank but not recorded in each book
- Rs. 100.

 (c) Cheque received and recorded in the bank column but not sent to bank for collection Rs. 1,000.
- (d) Several cheques were drawn in the last week of September, totalling Rs. 15,000. Of these, cheques totalling only Rs. 9,000 were easied before 30th September.
- (e) Similarly, several cheques, totalling Rs. 9,000 were sent for collection. Of these, cheques of the value of Rs 1,500 were credited on 5th October and Rs. 2,000 on 7th October, the balance being credited before 30th Scottember.
- (f) On 11th September 1976, the credit side of the bank column of the cash book was cast Rs. 1,000 short and the credit balance of Rs. 2,600 on 15th September 1976 was brought forward on 16th September 1976 as debit balance of Rs. 2,600.
- (g) Fees of Rs. 250 were paid directly by the bank but was not recorded in the Cash Book.

(h) In the Cash Book, a bank charge of Rs. 30 was recorded twice while another bank charge of Rs. 50 was not recorded at all.

(i) Interest of Rs. 1,400 was charged by the bank but was not recorded in the Cash Book.

(I.I.B. Part 1, October 1976)

Problem 17.	The following is the summary from the cash h	ook
(bank columns only)	of M/s BRS Ltd. for the month of October, 1977	7.

	Rs.		Rs.
To Balance b/d	14,070	By Payments	1.55,200
To Receipts	1,50,730	By Balance c/d	9,600
	1,64,800		1,64,800

On scrutiny of the bank statements you find that :

- (a) The hank statement shows an overdrawn balance of Rs. 1.240.
- (b) Bank charges of Rs. 350 shown on the bank statement have not been entered in the cash book.
 - (c) A cheque drawn for Rs. 470 has been entered as a receipt.
- (d) A cheque for Rs. 180 has been returned by the hank, but not written back in the cash book.
- (c) The opening balance should have been carried down as Rs. 14,700.
- (f) Three cheques paid to suppliers for Rs. 2,140, Rs. 3,700 and Rs. 300 have not yet been presented to the bank.
- (g) The last pay-in-slip of the month showing a deposit of Rs. 15,420 has not yet been credited by the bank.
- (h) The bank has debited a cheque for Rs. 720 hy mistake to the company's account.

You are required to:

- (i) Re-write the cash book for the month of October, 1977; and
- (ii) Prepare a statement reconciling the adjusted balance in the Cash Book with the balance as per the bank statement.

PURCHASES AND SALES JOURNAL

Problem 1. What do you mean by Purchases and Sales Journals? Describe the methods of posting of entries from these journals to the edger.

Solution:

To record the purchases of merchandise on credit to be resold, a separate register called the Purchases Journal or Purchases book is usually maintained by firms. Cash purchases are not recorded in this journal, because they are entered on the payments side of the Cash Book. The credit purchases of the other items such as equipments, furniture, etc., also are not recorded in it, because they are recorded in the general Journal.

L/ value	•
Rulin	127

PURCHASES JOURNAL

Date	Account credited (Suppliers)	Address	Invoice No. Date	L.F.	Purchases Debit
				,	Rs.

Posting. A separate account is kept in the ledger for each supplier of the goods, and the amount of each purchase is credited to its respective personal account. The periodical total of the Purchases Journal is then posted to the debit of Purchases Account in the ledger with the words 'To Sundry Creditors' (as per Purchases Journal).

SALES JOURNAL

Sales Journal or Sales Book is used to record all credit sales of goods in which the trader deals. Cash sales are not included in this Journal, but they are recorded in the Cash Book. The sale of any assets is also not recorded in this journal, because they are recorded in General Journal.

Rul	ing:
* * **	***

SALES JOURNAL

Date	Account debited (Buvers)	Address	Invoice No. Date	L.F.	Sales Credit
					Rs

Posting. A separate account is opened in the ledger for each customer to whom the goods have been sold on credit, and the amount o each sale made to him is debited to his personal account. The periodica total of the Sales Journal is posted to the credit of Sales Account with the words 'By Sundry Debtors' (as per Sales Journal).

Problem. 2. Explain briefly: Sales Account

(I.I.B. Part I, May 197.

Solution: This is an account kept by a trader in his ledger record the sales effected from time to time. The monthly lotals of it sales Journal and cash sales from the Cash Book are credited to the Sates Journal and caso sates from the Cash BOOK are credited to this been effected by that concern during the given period. The balance of the account shows the total sales which have the cash Adaptation of the property of the balance of the cash Adaptation of the property of the prope over curered by man concern during the given period. The balance of the Sales Account is transferred to the Trading Account at the time of the closing of the financial year. attentioo :

While ascertaining the amount of sales, the following points need

- (f) Sales should include both cash and credit sales of those goods which were purchased for resale purposes.
- (ii) Returns inwards or Sales returns must be deducted from the figure of the total sales. (iii) If a fixed asset such as furniture, machinery, etc., is sold, it should not be included under sales.
- (ir) Goods sold on Consignment or on Hire-Purchase or on Sale/ Return basis should not be included in the total sales.
- (r) Sale of goods on behalf of others and forward sales should also be excluded from sales.
- Problem 3. "Subdivision of Journal ioto Subsidiary Books is called as practical system of book-keeping". Why? What is the need for such n system?

Solution. The Journal is the book of prime entry in which all transactions are entered before being posted to the ledger, But, if all trainactions are entered octore being posted to the reager. Dut, it ambustiess transactions are passed through the Journal, the labour of recording each transaction, with its separate narration in it and then posting cotang each transaction, with its separate narration in it and then posting each such entry to two different accounts in the ledger, is enormous. each auch entry to two uniferent accounts in the reager, is enormous, Labour-saving techniques have, therefore, been applied to the art of Book-Book-Leeping.

The following subsidiary books have found their place in the modern (1) Cash Book: to record all cash receipts and payments, including

- (1) Cash mook: to record an easy receipts and payments, including receipts toto and payments out of the bank, and also cash discount allow-(ii) Purchases Book: to record all credit purchases of goods in hich the merchant deals.
- (iii) Purchases Returns Book: to record the return of the goods eviously purchased.
- (ir) Sales Book: to record all the credit sales of the goods dealt in the firm.
- (v) Sales Returns Book: to record all sales returned by the custo-
- (v) Bills Receivable Book: to record all bills, promissory ootes or lies received.
- (vii) Bills Payable Book: to record all bills accepted, issue of

- (viii) Journal Proper: to record those transactions for which there o separate book. Examples of such transactions are:

 - (b) Purchases of equipments and other assets on credit. (a) The opening entry.
 - (c) Correcting entries.
- (e) Entries for receiving and issuing of Bills of Exchange, Pronissory notes, hundies, etc., if a separate journal has not been main-
- (f) Purchases returns and sales returns, unless they are numerous ained.
- (g) Selling the goods on Consignment, Joint-Venture, Hire-Purchase, enough to require a special journal. Instalments, Sale/Return basis.

Adjusting, Closing, Transfer and Rectification Entries-(Adjustment for Bad Debts-Provision for Doubtful Debts) (and Discount on Debtors & Creditors-Different Methods) (of Depreciation.

ADJUSTING ENTRIES

Problem 1. What do you mean by the followings ? (a) Opening Entry.

(b) Closing Entries.

(c) Transfer Entries. Solution:

(d) Adjusting Entries.

(a) Opening Entry

Opening entry is the journal entry to open the books of accounts for the new financial year of the business. In a new concern, where the trader commences business with cash, furniture and stock, etc., all these assets accounts are debited and credit is given to his capital account. In a going concern, the balances of previous year are brought forward in the beginning of new accounting year. All the assets accounts are debited and liabilitie are credited. The difference between the Assets and the Liabilities is eredited to the Capital Account.

Opening entry is not actually posted in the ledger, but the accounts are merely incorporated in the new books of accounts with the words 'To Balance hld' on debit side for all assets accounts, and with the words 'By balance bid' on credit side for all liabilities and eapital accounts.

(b) Closing Entries.

At the end of the financial period, all the normal accounts are closed by transferring them to the Trading and Profit and Loss Account. This is done by passing Closing Journal Entries in the journal proper.

The following is the list of usual closing entries:

- (1) For transferring opening stock of goods, net purchases (Total Purchases-Returns outwards), and all the manufacturing, buying and bringing expenses: 'Trading account is debited and all the above mentioned accounts are eredited'.
- (2) For transferring Net Sales (Total sales-Returns inwards): 'Sales account is debited and Trading account is credited.'
- (3) For transferring all the administrative, selling and distribution expenses to the Profit & Loss Account : 'Profit and Loss Account is ' debited and each of the various nominal accounts which represent expenses and losses is credited'.
- (4) For transferring all the items of gains: 'Various nominal accounts are debited and Profit & Loss account is credited."

- (5) For transferring the net profit to the Capital account: 'The Profit & Loss account is debited and the Capital Account is credited.'
- (6) For transferring the net loss to the Capital account: 'Capital account is debited and the Profit & Loss account is credited.'

All remaining accounts viz.. Real and Personal Accounts pertaining to property, assets, debtors, creditors, etc, are just shown in a statement called as Balance Sheet. All the debit balances are shown on the Assets, right-hand, side and all the credit balances are shown on the liabilities, left-hand, side of the Balance Sheet. Capital account, being a credit balance is also shown on the liabilities side.

(c) Transfer Entries

When an amount or a balance of one account is to be taken to some other account, it is done by passing a transfer entry in the Journal Proper.

Transfer entries are generally passed to transfer;

- (1) Drawings account of the proprietor to his Capital Account: 'Debit the Capital Account and Credit the Drawings Account.'
- (2) Returns outward account to the Purchases Account: 'Debit the Returns Outwards Account & Credit the Purchases Account.'
- (3) Returns Inwards Account to the Sales Account: 'Debit Sales Account and Credit Returns Inwards Account'.
- (4) Gross profit from Trading Account to the Profit and Loss Account:
- 'Debit Trading Account and Credit Profit and Loss Account'.
- (5) Expenses or Incomes recorded in wrong accounts to appropriate account.
 - (6) Debits/Credits from one account to another.

(d) Adjusting Entries

The unadjusted and unrecorded items relating to the period are recorded through the Journal by passing entries called Adjusting Entries.

The following are the matters to which adjustments are usually necessary at the end of the trading period:

- (1) For Closing Stock: 'Debit the Stock Account and Credit Trading Account.' Stock will appear as an Asset in the Balance Sheet.
- (2) For Outstanding Expenses: 'Debit the appropriate expense account and credit the expenses outstanding account.' The outstanding expenses will be added to the nominal account concerned in Trading or Profit and Loss Account on the debit side, and will appear as a Liability in the Balance Sheet, because these are the outstanding creditors.
- (3) For Prepaid Expenses: 'Debit the appropriate Prepaid Expenses account, and credit the nominal account in respect of which the advance epayment is made. The amount of prepaid expenses will be shown as a deduction from the appropriate expenses on the debit side

of Trading or Profit and Loss A/c and will appear as an Asset in the Balance Sheet.

- (4) For Outstanding Income: 'Debit Outstanding Income Account, and credit the appropriate locome Account.' The outstanding income will be added to the nominal account concerns on the erecit side of the Profit and Loss Account, and will appear as an Asset in the Balance Sheet.
- (5) For Income Received in Advance: 'Debit the appropriate nominal account of the income and credit the Prepaid Income Account.' This amount will be shown as a deduction from the nominal account concerned on credit side of Profit and Loss Account and will appear as a Liability in the Balance Sheet.
- (6) For Depreciation on Assets: 'Debit Depreciation Account, and credit the account of the Asset to be depreciated'. Depreciation will be shown on the debit side of Profit and Loss Account, and the amount will appear as a deduction from the concerned Asset in the Balance Sbeet.
- (7) For Interest on Capital: 'Debit Interest on Capital Account, and credit the Proprietor's Capital Account'. This will be shown firstly on the debit side of the Profit and Loss account and will then appear as an addition to the Capital Account on the Liabilities side of the Balance Sheet.
- (6) For Interest on Drawlings: 'Debit the Proprietor's Drawling account and eredit Interest on Drawlings Account'. Interest on drawlings will be shown firstly on the credit side of the Profit and Loss Account, and then it will be added to the Drawlings Account of the proprietor, which will ultimately be deducted from the Capital Account.
- (9) For Writting off Bad Debts: These are irrecoverable debts from customers which are 'debited to Bad Debts Account and credited to the Debtors Account'. It is added to the Bad Debts Account on the Debt of the Profit and Loss Account and is shown as a deduction from Sundry Debtors on the Assets side of the Balance Sheet.
- [10] Reserve for Doubtfal Debts: To provide for estimated loss in respect of Doubtful Debts, 'Profit and Loss Account is debited and Provision or Reserve for Doubtful Debts Account is credited'. This is shown as a deduction from Sundry Debtors balance on the Assets side of the Balance Sheet.
- (11) Reserve for Discount on Debtors: To provide for discounts allowable to good Debtors, 'Profit and Loss' Account is debtted and Provision for Discount on Debtors Account is credited. This amount is shown as a deduction from Sundry Debtors balance (after deduction of provision for doubtful debts) in the Balance Sheet.
- (12) Reserve for Discount on Greditors: To provide discount X receivable from the suppliers, "Debit Reserve for Discount on Creditor's Account and credit Profit and Less Account." The amount is shown as a deduction from Sundry Creditor's on the habitities saide of the Balance Sheet.

(5)	Machinery A/c Dr. To General expenses A/c Dr. (Being the amount incurred on the erection of new machinery which is a capital expenditure, wrongly charged to General expensee account, rectified)	400	400
(g)	Purchases A/c Dr. To Supplier's A/c Dr. (Being the cost of 20 reams of paper received on 28th December, 1966 already included in the closing stock)	8,000	8,000

Note. For Item No. (g):

The purchase entry for Rs. 8,000 was made in the succeeding period, i.e., in 1967, therefore, in the year 1967 a reverse entry debiting the Supplier's A/c and crediting the Purchases A/c will be passed.

Problem 3. Pass Journal Entries to incorporate the following at

the time of preparing final accounts:

- (a) Provide $2\frac{1}{2}\%$ for Discount on debtors and create a Bad Debt provision of 10 per cent. (Bal. of Debtors Rs. 3,000).
 - (b) Closing Stock was valued at Rs. 4,300.

(c) Wages owing Rs. 250.

(d) Insurance paid in advance Rs. 150.

(e) Included in Debtors is Rs. 100 owing by A (proprietor) and included in the creditors Rs. 50 owing to A (a customer).

(f) Plant which stood at Rs. 7,500 in the books on the 1st day of the year was disposed of for Rs. 3,000 in part exchange for a new machinery costing Rs. 6,000. A net invoice of Rs. 3,000 was passed through purchase book.

(g) Purchase invoices amounting to Rs. 1,500 had been omitted

from the books.

- (h) A neon sign costing Rs. 750 was included in advertising.
- (i) The debits for two dishonoured cheques for Rs. 450 and Rs. 300 respectively had not been entered in the Cash Book. In the case of the second cheque for Rs. 300, it was expected that the debtor would be in a position to pay a dividend of 75 P. in the rupee.
- (j) Private purchases amounting to Rs. 1,500 had been included in the Purchase Book.

 (I.I.B. Part I, May 1968)

 Solution:

ADJUSTING JOURNAL ENTRIES

,				
SI.	Particulars	L.F.	Debit Amount	Credit Amount
(a)	Profit & Loss A/c Dr. To Provision for Doubtful Debts A/c (Being the amount required to create a provision for bad and doubtful debts at 10% on the debtors amounting to Rs. 3,000)		Rs. P. 300·00	Rs. P.
	Profit & Loss A/c Dr. To Provision for Discount on Debtors A/c (Being the amount required as provision @ 2½% on Rs. 2,760, i.e. Rs. 3,600-Rs. 300)		67:50	67:50

•		. Rs. P.	Rs. P.
(b)	Stock A/c Dr. To Trading A/c (Being the value of closing stock taken into the accounts)	4,300 00	4,300.00
(c)	Wages A/c Dr. To Wages Outstanding A/c (Being the amount still due on account of wages)	250 00	250.000
(d)	Insurance Prepaid A/c Dr. To Insurance A/c (Being premium on the insurance policy paid in advance)	150.00	150.00

RECTIFYING ENTRIES

Problem 1. Explain the different classes of errors that usually arise

in the account-keeping and how they should be rectified.

(I.I.B. Part I, May 1971)

(3)

Errors of Principle. (4)

Errors of Omission; Errors of Commission;

Compensating Errors; an (II.B. Part I, November 196 Explain briefly the following:

- (1) Errors of Omission: (
 - (3) Errors of Principle; and
- (2) Errors of Commission:
- (4) Compensating Errors.

Give example in each and state how they affect the Trial Balance?
(11.B. Fart 1, May 1973)

OR

Explain briefly :

- (1) What types of mistakes are disclosed by a Trial Balance?
- (2) What types of mistakes are not disclosed by a Trial Balance?
 (I.I B. Part I. November 1974)

Solution: For proving accuracy of postings in the ledger, periodically a trial balance is taken out wherein debit and credit balances are separately listed and totalled. If the Trial Balance agrees, it simply means that for every amount entered on the debit side of the ledger, an equal amount has been entered on the credit side. This indicates that a Trial Balance may agree arithmetrically, yet there may be a number of errors in account keeping.

Types of Errors

The Book-keeping errors can broadly be divided into following categories:

- (1) Errors of Principle. When a transaction is recorded in total disregard of the fundamental principles of Double Entry For example, when an asset is treated as an expense of rice-serie or a liability is treated as an income or vice-versa as illustrated below
 - (a) Amount spent for the repairs of building wrongly debited to Buildings A/c.
 - (b) Furniture purchased wrongly debued to the Purchases Account.

Errors of Omission. If a transaction is completely or partially omitted from the books of accounts, this is called trior of Omission. For example:

- (a) Credit purchases omitted to be recorded in the Purchases Book.
- (b) Omission to post an entry from any subsidiary book.
- (3) Errors of Commission. These are the errors wherein some mistake has been committed while recording the transactions. Posting to wrong account, posting of wrong amount, posting to wrong side, double posting, wrong totallung, wrong carry forward, wrong balancing, wrong calculations, etc. are the examples of such type of errors.
- (4) Compensating Errors. If the effect of the errors committed cancels out, the errors will be called compensating errors. For example:
- (a) Underposting of the purchase book may be compensated with the undereasting of Sales Book.

(b) Omission of posting of an amount on the debit side of a certain account may be compensated by overposting of the same amount on the debit side in some other account or accounts.

An existence of an error or errors is usually revealed by a disagreement of the two sides of the trial balance. However, there are certain errors which do not affect the trial balance and, therefore, they cannot be disclosed by a disagreeing trial balance.

From the point of view of the effect of errors on the trial balance they can be divided into the following two categories:

- I. Errors which affect the trial balance. These are the errors due to which the trial balance does not agree. In other words, these are the mistakes which are disclosed by the trial balance. These are the followings:
 - (a) Omission of posting of an item from a subsidiary book.
 - (b) Posting a wrong amount to a ledger account.
 - (c) Posting an amount to the wrong side of the account in the ledger.
 - (d) Omission of casting.
 - (e) Omission of carry forward.
 - (f) Wrong balancing.
 - (g) Wrong carry forward.
 - (h) Omission of an amount from trial balance.
 - (i) Balance of some account written to the wrong side of the trial balance.
 - (j) Double posting to a ledger account.
 - (k) Totalling the trial balance wrongly.
 - (1) Omitting to write the cash book balance in the trial balance.
 - (m) Omitting to post the totals of subsidiary books into the ledger.
 - II. Errors which do not effect the agreement of the trial balance. The undernoted errors are not revealed by the trial balance, inspite of its agreement:
 - (a) Errors of principle.
 - (b) Errors of complete omission, i.e., omission of an entry altogether from the subsidiary books.
 - (c) Wrong entries in any original record.
 - (d) Posting an amount to the correct side but in wrong account.
 - (c) Compensating errors.

RECTIFICATION OF ERRORS

Before Closing the Books. If the trial balance does not tally at the end of the trading period, efforts should be made to locate the errors, which cause the disagreement. The errors discovered will be corrected and consequently Trial Balance will tally.

After Closing the Books. If the Trial Balance does not tally, even inspite of best efforts, the presentation of final statements of accounts eannot be postponed for a long period. In such a case, the difference of the trial balance is placed to a Suspense Account and Trial Balance is made to tally.

Following are the methods which can be used for rectification of errors:

- (1) By Striking Off. Errors should never be corrected by overwriting. If immediately after making an entry, it is detected that an error has been committed, it may be corrected by neatly crossing out the wrong entry and making the correct entry.
- (2) By Passing a Journal Entry. If the error is located after some time, the correction should be made by making another journal
- (o) Debit the account that should have been debited (but is not
- debited) and eredit the account that is wrongly debited, or
- (b) Debit the account that is wrongly credited, and credit the account that should have beed credited (but not yet credited),
- The above noted procedure will be applied, if there is two-sided error. However, if there is one-sided error, and the difference has already been transferred to Suspense account, then:
- (e) Debit the account which should have been debited (but is not debited), and credit the Suspense account, or
- (d) Debit the Suspense Account, and credit the account which should have been credited (but is not credited).
- Problem 2. The Irial Balance of a firm is out by Rs. 2,788 (excess debit) and which amount was put to the credit or suspense account. The following errors are found, subsequently, to have been committed. Pass journal entries to correct them:
- (1) An amount of Rs. 100 was received from D on 31st March 1969 (the date of closing the books) but had been entered in the cash book on 4th April, 1969.
- (2) The Return Inwards Book for March had been cast Rs. 100 short.
- (3) The purchase of an office table costing Rs. 300 had been passed through the Purchase Day Book.
- (4) Rs. 375 paid for wages to workmen for making show-cases had been charged to wages account
- (5) A purchase of Rs. 671 from A had been posted to the debit of his occount as Rs. 617.
- (6) A ebeque for Rs. 200 received from B has been dishonoured and was debited to discount account.
- (7) Value of goods amounting to Rs. 100, returned by a customer, and taken into stock, was not entered into the books of accounts.
 - (8) A sale of Rs. 200 to C was credited to his occount.

Problem 5. A ledger keeper of Acharya and Co., could not agree the trial balance. He transferred an amount of Rs. 296 being excess of the debit side total to the Suspense Account. The following entries were subsequently discovered:

⁽¹⁾ Sales book was overcast by Rs. 300.

⁽²⁾ Purchase of furniture worth Rs. 615 was passed through the Purchases book.

- (3) An amount of Rs. 55 received from M/s. Shah and Co. was posted to their account as 550.
- (4) Purchases returns book total on a folio was carried forward as Rs. 221 instead of Rs. 112.
- (5) A cash sales of Rs. 1,235 though duly entered in the cash book was posted to the sales account as Rs. 235.
- (6) Rest of the difference was due to a wrong total in the Salaries Account in the Ledger.

Pass the necessary journal entries and prepare Suspense Account in the books of Acharya and Co.

(I.I.B. Part I, November 1975)

Solution:

RECTIFYING JOURNAL ENTRIES

SI.	Particulars .	L.F.	Debit Amount	Credit Amount
(1)	Sales A/c Dr.		Rs. 300	Rs.
·-	To Suspense A/c (Being the excess of totalling in the Sales Book, rectified)		•	300
(2)	Furniture and Fixtures A/c Dr. To Purchases A/c (Being the capital expenditure incurred for purchasing furniture debited to the purchases account through Purchase		615	615
Ψφ.	Book instead of being debited to the furniture and fixtures account, now rectified)			
(3)	Shah and Co. Dr. To Suspense A/c (Being the excess credit given in the account of Shah and Co., i.e. Rs. 550 credited in place of Rs. 55 to be credited, now corrected)		495	495
(4)	Returns outwards A/e To Suspense A/e (Being the correction of a wrong carry torward in the Purchase Returns Book Rs. 221 carried forward instead of Rs. 112)		109	109

			Rs.	Rs.
(5).	Suspense A/c To Sales A/c	Dr.	1,000	1,000
	(Being short credit, given in account—Rs. 235 instead of amount of Rs. 1,235—now	the correct

		===			

Problem 6. An accountant could not tally Trial Balance. The difference was temporarily placed to Suspens Account for preparing the final accounts. The following errors were later discovered:

(a) The Sales hook was undercast by Rs. 50.

(b) Entertainment expenses Rs. 95, though entered in the Cash Book, were omitted to he posted in the ledger.

(c) Discount column of the receipt side of the Cash Book was wrongly added as Rs. 140 instead of Rs. 120.

(d) Commission of Rs. 25 paid, was posted twice, once to discount account and once to commission account.

(e) A sale of Rs. 139 to Ramanial though correctly entered in Sales book, was posted wrongly to his account as Rs. 193.

(f) A purchase from Niranjan of Rs. 92, though correctly entered in the Purchases book, was wrongly debited to his personal account.

You are required to:

(i) Pass the necessary rectifying entries,

(ii) Prepare Suspense Account, and

P.S B K. 4.83-6

(iii) State the effect of each of the rectifications on the profit. What would be the correct profit if the profit originally arrived at was Rs. 10,000? (I.I.B. Part I, October 1976)

Problem 8. The undermentioned errors were discovered in the books of Ram Rahim and Co. for the year ending 30th June 1979. Pass Journal entries to rectify the same:

- (a) Goods amounting to Rs. 3,000 which had been returned by a customer, were taken into stock but no entry in this respect was made in the books.
- (b) A purchase of goods from Mahamad amounting to Rs. 6,000 was wrongly passed through the Sales Book.
- (c) A sale return from Rakesh. Rs. 280, was wrongly passed through the Sales Book and from there wrongly posted to the credit of Rakesh as Rs. 820
- (d) A credit sale of Rs. 1,020 to Leelaram was wrongly passed through Purchase Book
- (e) A bill receivable which was accepted by Kamrudin for Rs. 1,500, was sent to the bankers for collection. This having been dishonoured and returned by the Bank was debited to Bills Receivable Account.
- (f) Rs. 1,700 paid to Mr. Waman against our acceptance was by mistake debited to M/s. Wamanson's account.
- (g) Rs. 250 received from Garibchand as final dividend whose account has been written off as Bad Debt, was standing to the credit of Garibchand's account and was included in the list of creditors.

Problem 9. There was an error in the Trial Balance of Mr. Bawaji on 30th June 1980, and the difference in books was carried to Suspense Account. On going through the books, you find that:

- (1) Rs. 5,000 received from M. Mehta were posted to the debit of his account.
- (2) Rs. 1,000 being purchases returns were posted to the debit of purchase A/c.
- (3) Discount Rs. 2,000 received were posted to the debit of Discount A/c.
- (4) Rs. 3,740 paid for repairs to Motor car were debited to Motor Car A/c, as Rs. 1,740.
- (5) Rs. 4,000 paid to C. Dhruv were debited to the Account of G. Dhruve.

Give Journal entries, with complete narration, to rectify the above errors and state what amount was carried to the Suspense A/c.

(I I B Part 1, October 1980)

Problem 11. On finalising the books of accounts of Mr. Accountant you come across the following:—

The trial Balance as at 31st December 1980 was cut by Rs. 9991, excess credit.

The difference has been posted to a Suspense Account.

The following information is available:-

- (1) An amount of Rs. 1,500 was received by the Bank from Mr. Goyal on 30th December 1980, but had been entered in Cash Book on 3rd January 1981.
- (2) The total of Returns Inward Book for December had been east Rs. 1000 short.

- (3) An office table purehased costing Rs. 750, had been passed through Purchases Day Book.
- (4) Wages Rs. 250 paid to carpenters for making a show ease bas been debited to Wages Account.
 - (5) Purchases, of Rs. 5,698, posted to creditors' account as Rs. 5,689.
 - (6) Discount account has been debited with Rs. 300, being a cheque for the amount received from Mr. A.K. Jain, a customer, disbonoured.
- (7) Rs. 1,500 paid to Mr. Accountant, the proprietor for his personal use, has been debited to sundry expense account.
- (8) Gonds returned by a customer amounting to Rs. 260, were taken into stock. However no entry has been passed in the books.
- (9) Goods sold on eredit amounting to Rs. 4,500 to M/s. Sbab & Co., was credited to their account.
- Pass Journal entries to rectify the above with full narration and show "Suspense Account".

 (I.I.B. Part I, November 1981)

Problem 12. The Trial Balance of Lookwell Co. Ltd., taken out as on 31st December 1981 did not balance and the difference was entered in Suspense A/c. The following mistakes were traced out subsequently:—

- (1) Sales Day Book total for October was undercast by Rs. 1,000.
- (2) Purehase of a new equipment costing Rs. 9,475.75 has been posted to Purehases A/e.
- posted to Purchases A/e.

 (3) Discount received of Rs. 1,250 and Discount allowed of Rs. 850 in August 1981 have been posted to wrong sides of Discount A/e.
- (4) A cheque for Rs. 1,025 received from Mr. Straightforward for goods sold to him on credit earlier, though entered correctly in Cash Book, has been posted in his account as Rs. 1,052.
- (5) Stocks worth Rs. 2,500 taken for personal use of Mr. Dynamic, the Managing Director, has been entered in sales Day Book.
- (6) While earrying forward, the total in Returns Inward Book has been taken as Rs. 674 instead of Rs. 647.
- (7) An amount of Rs. 775 paid to the easher Mr. Spendthrift, as salary for November 1981 has been debited to his personal account as

Rs. 757.

Please pass the Journal entries (with all narration) and draw up the suspense A/c.

(I.I.B. Part I, Navember 1982)

Problem 13 The following errors were committed by the Accountant of Geeta Dyc chem.

- (a) Cash Rs 350 paid to Triman Chemicals posted as Rs. 530.
- (b) Purchase of stationery worth Rs. 150 remained unposted from the cash book.
- (c) Rs. 260 paid for purchase of new office furniture was charged to office expenses account (Ignore depreciation).
- (d) Credit sales to Trivedi and Co. of Rs. 300 was posted to the credit of their account.
- (e) A purchase of Rs. 420 from Mantri and Co, was passed through the sales day book as Rs. 240.
 - How would you rectify these errors assuming that :--
 - (i) they were detected before preparing trial balance.
- (ii) they were detected after preparing trial balance, but before preparing final accounts (the difference being taken to suspense account).
 - (iii) they were detected after preparing final accounts.
 - (Narration to Journal Entries not required).

(ii) RECTIFICATION OF ERRORS AFTER PREPAIRING TRIAL BALANCE, BUT BEFORE PREPARING FINAL ACCOUNTS

If an error is discovered after the closing of the books and final statements of accounts have been prepared by placing the difference of the trial balance to the Suspense Account, one-sided errors are corrected by passing rectifying journal entries, wherein the account in which error lies is given a further debit or credit as required, and the other aspect of the journal entry is covered by giving credit or debit to the Suspense account. Two-sided errors are rectified in the same way as they would have been rectified before preparing trial balance.

(iii) RECTIFICATION OF ERRORS AFTER PREPARING FINAL ACCOUNTS

At this stage the correction relating to errors affecting nominal accounts is carried out through profit and loss adjustment account. Balance of profit and loss adjustment account is then transferred to the capital account/s after the rectification of all the errors. The use of suspense account is also made wherever necessary.

By adopting this method, the businessman is able to rectify the errors of last year in such a way, that profit or loss of the current year is not influenced.

PROVISION FOR DOUBTFUL DEBTS AND DISCOUNT ON DEBTORS AND CREDITORS

Problem 1. What is the meaning of bad debts? Why is it necessary to create Reserve for:

(a) Doubtful Debts; (b) Discount on Debtors; and (c) Discount on Creditors.

Solution:

Bad Debts.

Bad Debts are irrecoverable debts from customers and are written off by debiting Bad Debts Account and crediting the personal accounts of the customers who have tailed to pay. The debit balance of bad debts account represents a loss and is transferred to Profit and Loss Account. This amount is then shown as a deduction from the amount of debtors on the Assets side in the Balance Sheet.

Reserve for Doubtful Debts

In addition to the actual bad debts, there may also be some likely bad debts. A scrutiny of the accounts of the individual debtors at the end of the period may show that the recovery of some of the debts is doubtful. The amount of doubtful debts is calculated either by carefully examining the position of each debtor individually and totalling the amount due from doubtful debtors, or by calculating a fixed percentage of total debtors. This percentage is usually based upon the past experience of the business.

When the provision or reserve for doubtful debts is created for the first time, Profit and Loss A/c is debited and the Reserve for Doubtful Debts is created. Reserve for Doubtful Debts is shown in the Balance Sheet as a dedcution from Sundry Debtors, as shown on the next page:

9.025

DALANCE SHEET

BALANCE SHEET					
Liabilities	Amount	Assets	Amount		
	Rs.		Rs.		
		Sundry Debtors	10,000		
		Less: Bad Debts written off	500		
			9,500		
		Less: Reserve for Doubt- ful Debts @ 5%	475		

Reserve for Discount on Debtors

Usually cash discount is allowed to the customers who make the payment of their dues within the stipulated time limit. Therefore, a provision is made for the expected loss on account of discount, that will have to be allowed to the firm's debtors on payment of their accounts. The main object in so doing is to see that the items of Sundry Debtors is not shown in the Balance Sbeet at anything beyond its likely realisable amount. No discount is allowed on the debts that become bad. Thus, this provision is calculated on the amount of good debtor only, i.e. on the amount of debtors less bad debts written off less the provision for doubtful debts.

This provision is made by way of a certain percentage on the amount of good debtors. Profit and Loss Account is debted and Provision for Discount on Debtors account is eredited. The credit balance of the Provision or Reserve for Discount on Debtors account is then shown by way of deduction from the item of Sundry debtors on the Assets side of the Balance Sheet:

BALANCE SHEET

BALANCE SHEET				
Liabilities	Amount	Assets	Amount	
	R5.		Rs.	
•		Sundry Debtors Less: Bad debts written off	10,000 500	
			9,500	
•		Less: Reserve for Doubtful Debts @ 5% on	1	
		Rs. 9,500	475	
			9025	
		Less: Reserve for Discount on Debtors @21% on		
		Rs. 9,025	226	
			8,799	

Provision for Discount on Creditors

Prompt payments to creditors enables a businessman to receive discount from them. Thus Provision for Discount on Creditors is provided for an expected gain in the shape of discount that will be received from the creditors for making timely payments to them. This is calculated generally by way of a certain percentage calculated on the balance of the creditors on the last day of the accounting period. Provision for discount on Creditors account is debited and the Profit and Loss account is credited. The debit balance on Provision for discount on Creditors account is shown by way of deduction from the item of Sundry Creditors on the Liabilities side of the Balance Sheet, as shown below:

BALANCE SHEET

Liabilities	Amount	Assets	Amount
	Rs.		Rs.
Sundry Creditors	8,000		
Less: Provision for Discount on Creditors @ 2½% on Rs. 8,000	200		
	7,800		

Problem 2. On 1st January 1964 Messrs Gokal & Co., had a bad debt provision of Rs. 650. On 31st December 1964, the total debts amounted to Rs 18,400 of which Rs. 400 were bad and had to be written off. The firm wants to maintain the Bad Debts Provision at 5 per cent of the debtors.

On 31st December 1965, total debts amounted to Rs. 10,320 out of which Rs. 320 had to be written off as bad debt. The provision to be maintained at 5% of the debtors.

Show the Bad Debts Account and Bad Debts Provision Account for 1964 and 1965. (11.B. Part 1, November 1966)

Note. The amount of the provision required has been calculated by deducting the amount of the bad debts from total debts.

Problem 3. On 31st December 1965, the debtors of Messrs X, Y, Z totalled Rs. 50,000 and a provision of 5% was made for bad and doubtful debts in 1966, total debts written off were Rs. 1,400. The debtors on 31st December 1966 were Rs. 40,000. In 1967, the total bad debts were Rs. 600 and the debtors on 31st December 1967 were Rs. 25,000. The provision of bad and doubtful debts has been maintained at 5%.

Show the Bad Debts and Provision for Doubtful Debts Account for the years 1966 and 1967.

Less: Reserve for Doubt ful Debts as of 1.1.1970		2,100		
To Reserve for Discoun on Debtors for the period				
Add: Discount allowed during the period	1,700			
	4,075			
Less: Reserve for Dis count on Debtors a on 1.1.1970		2,175		

BALANCE SHEET as on 31st December, 1970

Liabilities	Amount	Assets	Details =	Amount
,	Rs.	Sundry Debtors: Less: Reserve for	Rs. 50,000	Rs.
		Doubtful Debts @ 5% on Rs. 50,000	2,500	
		Less: Reserve for	47,500	
		discount on Debtors @ 5% on Rs. 47,500	2.375	45,125

Problem 5. From the following particulars prepare (1) Reserve for Doubtful Debts Account, (2) Reserve for Discount to Debtors and (3) Reserve for Discount on Creditors for both the years.

Balances as on 1st January, 1970:

Reserve for Doubtful Debts Rs. 1,000.

Reserve for Discount to Debtors Rs. 500 and Reserve for Discount on Creditors Rs. 400.

Total Debtors as on 31st December, 1970 were Rs. 25,000 after writing off Bad Debts Rs. 600 and allowing discounts Rs. 200.

Total Debtors as on 31st December, 1971 were Rs. 20,000 after writing off Bad Debts Rs. 600 and allowing Discounts Rs. 50.

Total Creditors as on 31st December 1970 and 31st December 1971 were Rs. 15,000 and Rs. 10,000 respectively.

Discounts received during the years were Rs. 300 and Rs. 50.

Provide 5% as Reserve for Doubtful Debts, $2\frac{1}{2}\%$ as Reserve for Discount on Debtors and 2% as Reserve for Discount on Creditors.

DEPRECIATION

Problem 1. Explain the different methods of providing Depreciation. (11B Part 1. October 1972)

Solution. All the Assets have either a definite or an estimated passes, their usefulness diminishes with the result that they have to be discarded when they are found useless. This diminishen in value of the Assets consequent upon wear and tear, obolescence efflux of time of permanent fall in its market value is known as Depression.

The method of providing for depreciation is to estimate how less the Asset in question will be of use to the business and then to charge a proportionate amount to the Profit and Loss Account each year.

he assets become useros value. Further, if the loss sustained by way to zero or to their scarp value. Further, if the loss sustained off to Profit and k value may also be brought preciation in the value of the assest is not charged off to profit and account each year, the annual final accounts will fail to show the Credit facts.

The Journal Entry for providing depreciation is: Amount Amount Rs. P Rs. P.

Particulars

1e

This entry is passed every year with the amount of depreciation of Cr.

that year. The effect of such an entry would be to reduce the book value of the Asset concerned from year to year and also to enable such a loss

to be charged to Profit and Loss Account of each year. PROFIT & LOSS ACCOUNT

Amount Particulars Rs. P. Amount $\mathtt{Dr.}$ Particulars Rs. P. To Depreciation on (name of the asset) BALANCE SHEET Assets

Details Amount Rs. P. Rs. P. Amount Name of the Asset: Liabilities Rs. P. i Less: Depreciation

Methods of Providing Depreciation

Different methods are adopted to write off depreciation. Straight Line Method. (Also known as Fixed Percentage iginal Cost Method): Under this method, a fixed percentage on iginal cost of the asset is charged each year so that the asset acci

may be reduced to zero or to its scrap value at the end of a de period representing its estimated life. It is calculated as:

Amount of Depreciation = Original Cost — Estimated scarp It may also be expressed in terms of percentage of the origin

If the life is 10 years and scarp value is nil, the depreciation will be 10% of the cost every year.

Diminishing Balance Method. Under this method also, the cost of the asset is written off over its estimated useful life. A certain percentage is applied to the book value at which the asset stands in the book in the beginning of the year.

Depreciation at the end of first year Original Cost × Rate of Dep.

Depreciation at the end of second year = *Written Down Value × Rate

*(Written Down Value=Original Cost - Depreciation provided). The procedure will be the same in the next years.

Digits Method. The depreciation is calculated annually by the under-noted formula.

Depreciation = (Cost—Estimated scrap value) × Remaining life of the asset

Total of all digits representing the life in years

Total of all digits representing the life in years

For example if the life of an asset is 5 years, the total of the digits

is 15, i.e., 54.4+3+2+1. In the first year, the depreciation is Cast-Estimated scrap value $\times \frac{5}{12}$. In the next year, the depreciation

will be (Cost-Estimated scrap value) $\times \frac{4}{15}$, and so on.

Revaluation Method. The market value of the asset concerned is ascertained. Between the market value and the cost price, the lesser will be taken into account. The difference between the opening value and market value represents Depreciation. This method is generally used for providing depreciation on assets like closing stock, loose tools and patents, etc.

Annuity Method. Purebase of the asset is considered as an Investment and so interest is charged on the opening balance of the asset each year at the rate agreed upon and a fixed amount is written off from the asset to the debit of Profit & Loss Account by way of depreciation. The amount of depreciation is ascertained by use of Annuity Tables. A specimen of such a table is given below:

ANNUITY TABLE

. Years	3%	31%	4%	4100	5%
5	0 218355	0.221481	0.224627	0 227792	0.230975
ь	0.142426	0.145477	0 148528	0.121610	0.154722
10	0.117231	0 120241	0-123291	0 126379	0.129505

This table shows how much is to be written off each year if the cost is Re. 1/- and the life and the rate of interest are envisaged.

For example, if the cost of an asset is Rs. 20,000, the rate of interest is 5% and the life is 5 years, the annual depreciation required will be Rs. 4,619.50 (Rs. $20,000\times0.230975$). The amount of depreciation includes interest at the stipulated rate, which will be credited to Profit & Loss Account at the end of each year as shown here below:

Sinking Fund Method. The asset is allowed to stand in the books at its original cost. A lixed amount is provided as depreciation and is debited to the Profit and Loss Account each year; and a corresponding amount of cash is invested every year in gilt-edged securities, the amount being such as will, during the life of the asset accumulate at compound interest to the sum required to replace the asset. This amount is determined with the help of Sinking Fund Table. A specimen of Sinking Fund table is given below:

SINKING FUND TABLE

Years	3%	31%	4%	41%	5%
5	0.188320	0.186481	0.184627	0 182792	0.180975
8	0 112456	0 110477	0.108528	0.106610	0.104722
10	0.087231	0.085241	0.083291	0.081379	0.079505

The table shows how much amount is to be invested if Re. 1/- is to be collected within a certain period, if interest can be earned at a certain stipulated rate

For example, if the interest is receivable @ 5%, the estimated life of the asset is 5 years, and the value of the asset is Rs. 20,000, the annual amount required will be Rs. 3,619-50 (0180975x/Rs. 20,000). If this amount is invested each year and the interest received @ 5% p.a. is also reinvested, at the end of 5 years Rs. 20,000 will be available. The annual amount will be the amount of the annual depreciation.

Insurance Policy	Section	An incurance notice is and	

Insurance Policy Method. An insurance policy is taken out for the amount required to replace the Asset at the end of the period of its

DEFRECIATION 2.65

effective life. The amount of the premium payable to the Insurance Company each year is provided as depreciation.

Depletion Method. The total cost of the mine or quarry (where this method is used) is divided by the estimated quantity of coal or other minerals to be raised in order to calculate the rate of depreciation per tonne. This rate is multiplied by the output of coal or minerals during a particular period, which is the amount of depreciation to be charged on that mine or quarry during that period.

Machine Hour Rate Method. The total cost of the machine is divided by the number of estimated hours of the life of machine, in order to calculate the rate of depreciation per hour. This rate is multiplied by the working hours of the machine during the period, which gives the amount of depreciation to be charged.

Depreciation on Replacement Cost. In times of rising prices, for the purpose of calculating the amount of depreciation to be charged each year, the replacement cost of the asset at the end of its effective life is taken into account. This will insure sufficient fund to replace the old asset at the end of its working life.

Problem 2. A company whose accounting year is the calender year, purchased on 1st April 1967 machinery costing Rs. 30,000.

It purchased further machinery on 1st October 1967 costing Rs. 20,000, and on 1st July 1968 costing Rs. 10,000.

On 1st January 1969, one-third of the machinery which was installed on 1st April 1967 became obsolete and was sold for Rs. 3,000.

Show how the machinery account would appear in the books of the company. The depreciation be charged at 10% p.a.

(1 1 B. Part 1, November 1970)

Solution: In the Books of the Company.

Problem 4. A company writes off depreciation on straight line basis on machinery at 10%. On 31st December 1975, the position was as under:

Cost of purchases to date 52,570
Depreciation written off to date 25,670

During 1976, an addition of Rs 2,480 was made to machinery A machine bought in 1972 for Rs. 2,800 was sold for Rs 800 during the year.

No depreciation is to be provided on assets sold during the year, while full depreciation is to be provided on assets acquired during the year.

You are required to show the Machinery Account for the year 1976. (Show your workings fully.)

Problem 5. A company writes off depreciation at 10% p.a. on

the diminishing balance. On 1st January 1971 the machinery account showed a balance of Rs. 1.49,000. It was discovered in 1971 that:

⁽a) Heavy repairs effected to Plants and Machinery (completed on 30th June 1969) were debited to the Machinery Account. The amount was Rs. 15,000 : and

⁽b) A Machine cost Rs. 6,000 was entered in the Purchase Book on 1st October 1969.

The expenses on installation, Rs. 400 were debited to General Expenses Account.

Necessary corrections were to be made in 1971. On 30th June 1971 a machine which had cost Rs 20,000 on 1st January 1969 was disposed of for Rs. 15,000 and a new machine costing. Rs. 30,000 was installed on the same date, the expenses on installing the same being Rs. 500.

Show the machinery accounts for the year ended 31st December 1971. Please show your working in detail.

Problem 6. Reliance Ltd. writes off depreciation on Plant and Machinery at 10% pa. on the Reducing Balance Method. On 1st January 1976 the Plant and Machinery Account showed a balance of Rs. 29.800.

It was discovered in 1976 that:

(1) Repairs effected to the Plant on 30th June 1974 were debited -to Plant and Machinery Account. The amount was Rs. 3,000.

(ii) A Machine costing Rs. 1,200 was entered in the Purchases Book on 1st October 1974. The expenses on installation Rs 80 were debited to General expenses account.

Necessary corrections were to be made in 1976.

During the year, on 30th June, a machine which had eost Rs. 4,000 on 1st January 1974 was sold for Rs. 3,000 and a new machine costing Rs. 6,000 was installed on the same date, the erection expenses being Rs. 100.

Problem 7. A Company purchased second-hand machinery on 1st January 1974, for Rs. 37,000 and immediately spent Rs. 3,000 on its erection. On 1st July 1975, it purchased another machine for Rs. 10,000 and not 1st July 1976, it sold off the first machine for Rs. 28,000 and bought another for Rs. 25,000. On 1st July 1977, the second machine was also sold off for Rs. 2,000.

Depreciation was provided on the machinery at the rate of 10% p.a., on the original cost annually on 31st December. In 1975, however, the Company changed the method of providing depreciation and adopted the written down value method, rate of depreciation being 15% p.a.

Give Machinery account for the four years commencing from the acquistion of first machine. Compute to (I.I.B. Part 1, November 1979) the nearest rupee. Girc full working.

Problem 8. A company purchased a lease for Rs. 30,000 on 1st January 1976. It is to be renewed at the end of three years. For this purpose a depreciation fund is established. The depreciation fund investments will realise 5%. Sinking Fund Table shows that Re. 0.317209 must be invested each year to obtain Re. I at the end of 3 years, the rato of interest being 5%.

On 31st December, 1978 the investments were realised for Rs. 19,400. A new lease was purchased on the same date for Rs. 35,000. The balance at hank before realisation of investments was Rs. 20,000, Give Journal entries in the books of the company.

(I.I.B. Part I. October 1980)

DEPRECIATION

(Trial Balance and preparation of Trading and Profit and) (Loss Account and Balance Sheet of a Sole-Trader-Reserve) and Provisions-Sinking and Reserve Funds.

TRIAL BALANCE

Problem 1. What is a Trial Balance? Discuss the main objects and methods of preparing Trial Balance.

Solution. In the Double entry system of book-keeping, every debit has its corresponding credit and vice-versa.

From the Journal, the Double aspect of every transaction is given effect to by at once debiting one account and crediting the other account.

From the Cash Book, the debit side represents cash receipts and individual transaction are posted to the credit of their respective accounts. The credit side represents cash payments, and each amount paid is debited to the perional or other account concerned. The amounts as entered in the Cash or Bank columns represent themselves the debits and credits to Cash Account or Bank Account. The monthly total of the debit discount column is debited to Discount Account, whereas the various personal accounts concerned get individual credit. Similarly, the monthly total of the discount received column is credited to Discount Account and the personal accounts concerned get individual debit.

From the Purchases Book, each individual item is credited to the suppliers account and the periodic totals of the book are posted to the

debit of Purchases Account.

From the Sales Baok, the postings are to the debit of each customer account and Sales Account is credited with the periodic totals of the book.

Thus, for every debit or a series of debits, there must be a corresponding credit or a series of credits for an equal amount. Hence, the sums of the debits amount must be equal to the sums of credits amount of the ledger (including Cash Book) at any date.

When an account is balanced, equal debits and credits are cancelled accounts each other. Therefore, if all the accounts of the ledger are believed, the total of all debit balances must be equal to the total of all

ereda balances on the same date.

The statement in which debit and credit balances or totals are noted closed and thrally totalled up, as to ascertain whether they are equal, is called a Teral Balance.

Objects of Preparing a Trial Balance

(1) It past the balance of all the accounts of the ledger. The before of pay account can be found as a glance at the Trial Balance well out going through the pages of the ledger.

(2) It is a check on the accuracy of posting. If the trial balance

STATE OF TANKE OF

- (a) that both the aspects of each transaction are recorded, and (b) that the books are arithmetically accurate.
- (3) It facilitates the preparation of Profit & Loss Account and the

Preparation of Trial Balance

A Trial Balance is usually prepared on loose sheets ruled in a form similar to that of the Journal, i.e., with the debit and credit money columns side by side. Each account is given a line, and the name of the account is written in the particulars column. The first column is used for entering the folio of the ledger on which the account appears, A precimen of Trial Balance ruline is eiven below:

TRIAL BALANCE OF M/sas on.....

L.F.	Name of Account	,.	• •		bit ance atal),	Bala	Credit Balance (ar Total)	
		•		Rs.	P.	Rs.	P.	

A Trial Balance could be prepared in two ways: : ;

(1) By putting both the debit side total and credit side total of each account.

(2) By putting the net balance of the individual accounts. i.e., either the dehit or the credit as the case may be.

The second method is more commonly used in practice, as it makes, the calculations casy and facilitates the preparation of final statements of accounts.

An important point to be borne in mind in the preparation of the Trial Balance is to include the Cash balance and the Bank balance as Indicasted by the Cash and Bank columns of the Cash Book. The reason is, that these columns represent Cash and Bank Accounts, and it is only for convenience that Cash and Bank transactions are recorded in a separate book instead of being entered in the ledger accounts.

Problem 2. On 1st March 1974, the books of accounts of Mr. A disclosed the following position:

Cash on hand Rs. 130; Bank overdraft Rs. 100; Debtor—G. Basu Rs. 350; Stock in hand Rs. 3,860; Premises and fittings Rs. 15,000; Sundry creditors—J. Ram Rs. 960; W. John. Rs. 1,060.

Prepare the opening Balance Sheet, Journalise the following transnctions and prepare a Trial Balance as on 31st March 1974 from the following particulars: 1974

Mar. 3 Sold on credit goods to G. Basu in 10 bags for Rs. 16 per bag. The bags were non-returnable and as suc Rs. 2 per bag was extra charged.

Mar. 6 W. John was paid his dues by cheque, allowed Rs. 1 discount.

Mar. 10 Paid wages in cash Rs. 50.

Mar. 14 Bought on credit from J. Ram goods for Rs. 2,550 J. Ram allowed trade discount at 5%.

Mar. 17 J. Ram drew a bill for Rs. 2,000 and discounted the same

after acceptance.

Mar. 21 Cash sales to date amounted to Rs. 155. Paid the amounted to Rs. 155.

into Bank with the exception of Rs. 30 which was retained for office use.

Mar. 24 G. Basu returned goods as damaged. Agreed to allow him credit of Rs. 30 for the same.

Mar. 26 Mr. A brought in Rs. 1,000 as additional Capital and patthe same into Bank.

Mar. 27 Received from a sub-tenant Rs. 50 for premises sub-let.

Mar. 29 G. Basu paid Rs. 300 on account. Paid the same in Bank.

Mar. 31 Paid in cash electric light bill Rs. 12.
(I.I.B. Part I, November 197

Fixed Assets	20,000	30,000
Creditors Debtors	60,000	
	3,20,00	3,20,000

Working Notes:

*1. Cost of goods sold=Stock of goods in hand in the beginning
+Net Purchases made during the year
+Direct expenses paid for the purchase
-Stock of goods in hand at the close c
the year.

In the given problem:

Cost of Goods sold=Rs. 1,50,000; Opening Stock=Rs. 60,000 a Closing Stock=Rs. 40,000.

But, the amount of Purchases is not given. Therefore, to calcul the mosing figure, the abovesaid formula of cost of goods sold will applied as under:

Purchases—Rs. 40,000 (Closing Stock)

- Cr Purchases Rs. 1,50,000-Rs. 60,000+Rs. 40,000-Rs. 1,30,000
- 2. In case the closing stock is shown as a debit balance is trial balance, it will be taken as an asset in the Balance Sheet. But it can closing stock will be treated as an adjustment.
- 3. Debtors and Expenses always have debit balance and cothe credit balance.

FINAL ACCOUNTS

Problem 1. Why are the Final Accounts prepared? Explain the procedure for the preparation of final statements of accounts.

Solution. One of the main objects of maintaining accounts is to find out the profit or loss made by the business at the end of periodic intervals and to ascertain the financial position of the business as on a given date.

The above-noted objects can be achieved by preparing final statements of accounts at the end of each accounting period, which consist of:

- 1. Profit and Loss Account, and
- 2. Balance Sheet.

The Profit and Loss Account is generally divided into two parts;

- (a) Trading Account, and
- (b) Profit and Loss Account.

Once the Trial Balance is extracted and errors rectified, Trading and Profit and Loss Account is prepared by transferring from the Trial Balance, all Closing Entriv

Preparation of Trading Account

The Tradian Account: 1 1

excess of the cost of goods sold over the net sales,

On the debit side of the Trading Account will be found the followine items:

- I Stock of Raw Materials, Work-in-progress and Finished Goods at the commencement of the trading period (Opening Stock).
- 2. Cash and Credit pur haves of goods which are for resale purposes less the value of such purchases which have been returned (Cash Purchases+Credit Purchases-Returns outwards, i.e., Net purchases)
- 3. Direct expenses on the purchase of goods, Ie., all expenses which have been incurred before the goods become ready for sale such as Wages, Carriage inward, Manufacturing expenses, Coal, Water and Gas, Factory lighting, Freight, Octron, Factory rent and rates, Excise duty, Custom duty on Imports, Factory instrance, Deprecation on Factory Machinery, Lactory Manager's salary, Consumable stores, etc.
 - On the credit side of the Trading Account will be found :
- Cash and Credu sales of goods which were purchased for resale purpose, less the value of the goods returned by the customers (Cash Sales + Credu Sales - Returns Inwards, i.e., Not Sales).

2. Stock of Raw Materials, Work-in-progress and Finished Goods on hand at the end of the trading period.

In order to ascertain the value of Closing Stock, a list of all goods in stock after physical checking is prepared (this is known as Stock-Taking). This stock in hand is valued at cost or realisable value which ever is less. It is valued on conservative basis, i.e., expected profits are ignored but possible losses are duly provided for. The value of Closing Stock is brought into account by means of an adjusting entry. Stock (Closing) A'e is debited because the unsold goods represent an Asset. The Trading A'e is credited to arrive at the profit made on buying and selling of goods. The credit balance of the Trading Account represents the Gross Profit on trading for the period and is transferred to the credit of Profit and Loss Account. If there is a debit balance in the Trading Account, it represents Gross Loss and is debited to the Profit and Loss Account.

Preparation of Profit and Loss Account

This account is prepared to find net profit or loss resulting from the transactions during a trading period.

The Gross Profit shown by the Trading Account is first shown on the credit side of the Profit and Loss Account, but if there is Gross Loss, that would be shown on the debit side. This account is credited with the items of miscellaneous incomes such as Rent, Commission, Discount, Interest, Dividend, etc., which are having credit balances in the Trial Balance. This account is debited with revenue expenditures, i.e., with all debit balances of the Nominal accounts from the Trial Balance (after adjustments), e.g., Rent, Salaries, Printing and Stationery consumed, Advertisement, Commission, Carriage outward, Packing charges, Insurance, Lighting, Postage and Telegrams, Telephone charges, Audit fee, Repairs, Maintenance, Discount allowed, Depreciation, Outstanding expenses, Bad debts, Interest on capital, etc.

The difference between the two sides of the Profit and Loss Account is either Net Profit or Net Loss of the business for the trading period. If the credit total is more, the difference would be Net Profit, if the debit total is more, it would be Net Loss.

The Net Profit or Net Loss is transferred to the credit or debit of the Proprietor's/Partner's Capital Account/s, as it is the owner who is entitled to profits or responsible to bear losses. Net Profit will increase his capital and Net Loss would reduce it.

Preparation of Balance Sheet

Balance Sheet is a statement prepared at regular intervals showing what a business owns and what it owes. It is a 'SHEET' of all the ledger 'BALANCES' of Personal and Real accounts as on a particular day.

Halance Sheet is prepared with a view to measure the exact financial position as at the close of business on the last working day of trading period, which is indicated by the Assets and Liabilities of the business on that date. The excess of Assets over Liabilities represent the Capital. Assets are the dredt balances and Liabilities are the credit balances.

Amou

Capital & Liabilities

A Balance Sheet has two sides—the left hand side is "Liabilities" sid and the right-hand side is the "Assets" side, as shown hereunder:

(Name of the business)

Problem 2. Explain the need and the points to be kept in min while preparing manufacturing account.

Manufacturing Account is prepared to reveal the cost of good manufactured in a particular period. Following points should be note while making this account.

- 1. Cost of Materials used. The opening stock of material purchases and carriage inward be added and the value of closing stoc of materials be deducted. Opening and closing stocks of finished goods ignored while preparing the Manufacturing account as they will appear to the Trading Account.
 - 2. Factory Expenses. All expenses incurred in the factory produce the goods be debited to this account, e.e., wages paid a labourer's, salaries to factory staff, factory rent and lighting, depreciation machinery, repairs of machinery, rower and fuel, etc.
 - 3 Work in Progress. It is valued at materials used, labor spent plus a reasonble share of other expenses. Work in progress the beginning should be added to and the work in progress at the end! deducted from the debt side of the Manufacturing Account.
 - 4 Sale of scrap material. The proceeds from the sale of wasta and scrap material should be credited to the Manufacturing Account.
 - S Cost of goods manufactured. The balance in the Man facturing Account represents the cost of goods manufactured and transferred to the debt side of the Trading Account.

Problems 3. Explain the aim for the preparation of Profit and Lors appropriation account in case of sole proprietorship or partnership

Solution. The aim of the Profit and Loss Appropriation Account is to show all dispositions, divisions and appropriations of the net profit. Thus, whereas all expenses incurred in arriving at the figure of net profit, such as interest on loan, depreciation, rent. sales, salaries, etc., are chargeable to Profit and Loss account, the appropriation account will be debited with such items as Manager's Commission (when intended to be a division of profits), interest on capital of a partner, transfers to reserves, salaries to partners, amounts written off, etc. Similary withdrawals from reserves or provisions no longer required should be credited to the Appropriation Account.

Problem 4. State points of difference between a Trial Balance, Balance Sheet and a Statement of Affairs. (II.B. Part I, May 1969)

Solution:

Trial Balance

To check the accuracy of the postings, a Trial Balance is prepared, which is ruled in a form similar to that of the Journal, i.e., with the debit and credit money columns side by side. In it the balances of all the accounts are written—debit balances on the debit side and credit balances on its credit side. The items in a Trial Balance relate to all types of accounts, whether they are Nominal, or Real or Personal Accounts. It is completed before preparing a Trading and Profit & Loss account. It can be prepared an any stage, without even making adjustments. Normally t'e Cloring Stock does not figure in the Trial Balance.

Balance Sheet

It shows readily the financial position of business at a given date by disclosing the amount of capital contributed and how the same has been inverted: the values of Assets and Liabilities and their nature. It is ruled like a 'T' type ledger account. The Capital and Liabilities of the business are shown on the left-hand side and the Assets and Properties are shown on the right-hand side. It contains the balances of only Real and Personal accounts. It is prepared after all the income and expenditure accounts (Nominal accounts) have been closed off by transfer to Irading and Profit & Loss account. The value of Closing Stock appears as an Asset in it. A Balance Spect cannot be prepared without making adjustments for outstanding and prepare items and without taking into account all events and transactions for the period.

Statement of Affairs

the trader who has maintained his books on Single Entry, he can obsertion his Lancied position in an approximate magnetic filled his Section of the profit of the profit of the profit of the period is action as by preparing one Statement of Affairs at the beginning of the period and the other at its close. The increase in the amount of Capital as at the close of the period, compared to the opening Capital, after adjustice therein any Deaming or fresh Contributions, will be the amount of his first lass for the period. The information secured from the preparation of a Statement of Affairs is by no means as reliable and as complete

Adarsh Library & Reading Room

Geeta Bhawan, Adarsh Nagar 18

ACCOUNTS FINAL

. JAIPUR-302 004. -

as that given by a Balance Sheet, because it is prepared partly from the ledger and partly from other sources. Information about cash balance is obtained from Cash Book, the details of the Sundry Debtors and Creditors is obtained from their personal accounts maintained in the ledget. The value of Closing Stock and other assets like Buildings, Machinery, Furniture, etc., is taken on the Assets side by ascertaining their value from the rough records or memory of the proprietor. The difference between the total of Assets and Liabilities will be Capital.

To ascertain the net nent of Profit & Loss is

prepared on the following lines:

STATEMENT SHOWING PROFIT OR LOSS

for the (Period) ended (dated)

Farticulars	Amount	
	Rs.	'Rs
Capital (at the end)		***
Add : Drawings during the period .		·
Less: Fresh Capital introduced	•••	***
Less: Capital in the beginning	***	***
Net Profit (or Loss)	-	***

Problem 5. How will you treat the closing stock under the following circumstances:

- (1) Stock on hand. ~
- (2) Stock on consignment (inward),
 - (3) Stock on consignment (outward).
 - (4) Stock of goods on sale or return.

(1.1.B. Part 1. Navember 1970)

Solution:

(1) Stock on Hand:

Usually there is no account to show the value of goods in hand at the end of the trading period. It is incorporated in the books of accounts by passing an adjustment entry:

Particulars		LF.	Debti Amount	Credit Amount
			Rs.	Rs.
Stock A c	Dr			
To Trading A c				

(Being the value of Closing Stock

recorded as on)

FINAL ACCOUNTS

For the above purpose, at the end of the financial period a list of all goeds in stock after physical checking is prepared, value is attached to each item at cost price or at market price, whichever is less, and the total value is recorded. Stock includes only of those goods which are normally bought and sold by that business concern.

The stock of goods on hand at the opening and closing of each trading period is taken into Trading Account for the purpose of arriving at the profit made on the buying and selling of goods. The debit to the Stock account represents an Asset and is shown in the Balance Sheet.

Generally the Closing Stock is given outside the Trial Balance, but when purchases are adjusted through opening and closing stocks, in that case Closing Stock will have a debit balance in the Trial Balance.

(2) Stock on Consignment (Inward):

When a person sends goods to another person on the condition that the receiver will try to sell the goods in the best possible manner and will remit the sale proceeds less expenses and his own remuneration, it is a transaction of Consignment. To the Principals, the goods thus sent out would be known as 'Outward Consignments' whereas to the Agents, they would be known as 'Inward Consignments.' Thepe rsons sending out the goods are called Consignors and those receiving the goods are called Consignors.

Unlike sales, the goods consigned to the Consignee remain the property of the Consignor so far as these are not sold by the Consignee. Consignee, being an agent for the Consignor, should not mix up his own stock of goods with the unsold balance of goods received on Consignment.

The Consignee does not record the stock on consignment in his books. He simply maintains a Memorandum Record of such consignment stock with him, because such goods do not belong to him, but are held by him merely as an agent for the Consignor.

(3) Stock on Consignment (Outward):

It is possible that all goods sent on consignment might not have been sold by the Consignee up to the date when the final accounts of the Consigner are prepared. While closing the Consignment Account, value of closing stock lying with the Consignee must be taken into account.

For the valuation of consignment stock a proportionate amount of the non-recurring expenses incurred up to the time the goods are brought to the place of the consignee, whether paid by the consignor or consignee, must be added to the cost price of the stock. The commission and other expenses (e.g., warehousing expenses, selling expenses, etc.) should not be expensed to the unsold stock. The cost thus ascertained is the value of consignment stock if it is less than the market price of such unsold stock.

The Stock on consignment is recorded in the books of the consignor by passing the following Journal entry:

Credit Deble Amount OUNTS L.F. Amount Particulars Dr.

ment Stock Ale

o Consignment Ale Being the value of unsold stock on

When goods are sent out on sale, on approval or return basis, it when goods are sent out on sale, on approval of return oasis, it mes sale only when the customer signifies his intention to purchase times sale unity when the customer stendies his intention to purchase goods or takes some action whereby it is indicated that he has decided To record such transactions, customers accounts are opened in a

(118 Part | November 1973) (1) Loan (2) Overdraft (3) Cash Credit.

Bank advances may be granted in various forms, such

In a loan account the errore amount is paid to the as loans, overdrafts, cash credits, etc to Lorent me and necessary the course amount to pain to the botrower at one time either in cash or by transfer to his current account. porrower at one time entire in cash of extraorier to his current account. No subsequent debit is allowed except by way of interest and expenses. No sumequent occur is answer except to was or instead and expenses. The Interest is charged at periodic interest unless otherwise agreed. The amount is generally repayable wholly at one time. In the case of term amount to renerate repayable which at the line on the security of their loans where the advances are made to industries on the security of their toans where the advances are made to industries on the security of their fitted assets, the "sans tre general"s repayable by instalments over a

(2) Overdraft
being in red 1 ar time in debit.

there times in debit. number of years range is the factor as the dens in control of the control of th temet is allowed to withdraw in excess of the credit bal

in his current account. A limit is generally specified, which enables a customer to draw over and above his own balance up to that limit and he can save interest by reducing the debit balance, whenever he is in a resition to do so.

The facility is granted for a short period, after the expiry of which

the customer is expected to repay the advance.

Interest is charged on the daily debit balances outstanding in the account.

Overdrast is allowed either on a clean basis or a collateral security may be lodged.

(3) Cash Credit. It is an arrangement under which a customer is allowed an advance upto a certain limit against a security. It is essentially a drawing account against credit granted and is operated in the same way as an overdraft account. The borrower can provide alternative securities from time to time in confirmity with the terms of advance and according to his own requirements. He is given the right to make withdrawals according to the drawing power, calculated by the Bank after considering the margin requirements and the specified sanctioned limit.

If there is a good turn-over in the account and there are no adverse factors, a cash credit limit is allowed to continue for years together.

Borrower is allowed to withdraw the amount from this account according to his requirements. Interest is charged on daily balances (debit) at the stipulated rate,

Problem 7. Mr. A carried on business under the name of A & Co. From the following information prepare the final accounts for the year ended 31st December 1967:

FINAL ACCOUNTS

ī

(a) Salaries. The firm has paid a sum of Rs. 11,000 towards salary during the year ended 31.3.1976 as shown in the Trial Balance. The total amount due on this account is Rs. 12,000 as shown on the debit side of the Profit & Loss A/c.

Thus a sum of Rs. 1,000 is outstanding towards Salaries. In Short: Rs.

Salaries due for the period 12,000 11,000 Less Salaries paid Salaries outstanding 1.000 (b) Rent. An amount of Rs. 2,400 is due on this account as shown on the debit side of the Profit & Loss Account. The total amount paid during the period is only Rs. 2,200 as given in the Trial Balance.

Thus a sum of Rs. 209 is outstanding towards Rent.

In Short:	Rs.
Rent due for the period Less: Rent Paid	2,400 2,200
Ecut outstanding	200

The adjusting journal entry for this will be:

Date	Particulars	L.F	Debit Amount	Credit Amount
1976			Rs.	Rs.
March 31 Salaries Rept Ag	c ·	Dr. Dr.	1,000 200	
To Li expen	ability for outstanding ses			1,200

(4) Motor-car: Rs 16,000

The book value of the Motor-car is Rs. 20,000 as shown in the Trial Balance. Rs. 2,600 have been debited to the Profit & Loss Account on account of depreciation on it. However, in the Balance Sheet Rs. 4,000 have been deducted as depreciation, which means that the excess Rs. 2,000 charged are recovered from Shri Deepak Patel, the proprietor on account of the private use of the Car made by him.

Henze the value of the Car is Rs. 16,000.

In Short: Book value as per last year	·	Rs. 20,600
Less Depreciation: Debited to P & L A'e Debited to Drawings A/e	Rs. 2,000 Rs. 2,000	4,000
	Million Annual A	16,000

The adjusting entry for this is:

1976 3000		**************************************		Rs.	Rs.
	ating on Miltorious Afeil Si Prignice Allo Situations are	Dr. Dr.		2,600 2,600	4 (

(5) Deepak's Drawings Account: Rs. 20,000

Deepak's drawings as shown in the Trial Balance are Rs. 15,000. It is, however, noticed from the Trial Balance that a sum of Rs, 6,000 has been incurred on account of Motor-car expenses, but only half of it, i.e, Rs. 3,000 have heen charged to the Profit & Loss Account. This means that the excess Rs. 3,000 has been recovered from the proprietor on account of the private use of the Car made hy him. Further, he has heen dehited with Rs. 2,000 on account of half share of depreciation on Motor-car (as explained in 4 above). The total Drawings of the proprietor thus comes to Rs. 20,000.

prietor thus comes to Rs. 20,000.		7	• •
In Short:	,		Rs.
Amount withdrawn during the year			15,000
Add.One-half share in the Motor-car expenses on account of private use	•		3,000
Add. One-half share in the Depreciation on Motor car on account of private use	•		2,000
1			20.000

The adjusting entry will be passed as under:

Date	Particula	ırs		· L.F.	Debit mount	Credit Amount
1976 Mårch				Rs	·.	Rs.
	Drawings A/e	-	Dr.	5,00	00	
To Motor-car expenses A/c To Depreciation on Motor-car A/c			•	3,000 2,000		

Problem 13. Shri Mohanlal is the proprietor of a business. The following Trial Balance was prepared from his hooks as on 31st March, 1978:

TRIAL BALANCE

Debit	Rs.	Credit	Rs.
Land and Building	40,000	Sales	4,68,100
Purchases	3.26,700	Dividends	960
Returns	2,500	12% Bank Loan	40,000

Annual Annual Annual Enter	MARKON I JAP I			

Working Notes:

Tir

Re: Adjustment No. 2

(A) The goods were sold at a profit of 25% on sales, which means that:

If relling price is Rs. 100, profit is Rs. 25

But profit is always calculated on cost price, thus Cest Price = Selling Price -- Profit

Rs. 75 = Rs. 100 - Rs. 25

Hence, Rs. 25 is the profit on Rs. 75, which is 1/3rd of the Cost Price.

- . In this case purchases were made for a sum of Rs. 33,000, therefere, Protat comes to Rs. 11,000, and the sale proceeds Rs. 44,000.
- (B) The profits and losses of Joint Venture are to be borne equally by Mcharlel and Robarlel. This will be arrived at as under:

JOINT VENTURE ACCOUNT

RESERVES AND PROVISIONS SINKING AND RESERVE FUNDS

Problem 1. Distinguish between 'Provision' and 'Reserve'.

Solution. Every business is full of risks and uncertainties and in order to save the concern from such mishappenings and undesired events, it is necessary for every business to make provisions and reserves.

Provisions. Provisions mean any amount written off or retained by way of providing for depreciation, renewals or diminution in the Value of assets; or retained by way of providing for any known liability of which the amount cannot be determined with substantial accuracy. (If the amount of a liability can be ascertained, it is classified as a liability and not as a provision.)

The following are instances of amounts retained in the business out of carnings for different purposes, which are known as Provisions:

- (1) Provision for Depreciation on Assets.
- (2) Amount set aside for writting off Bad Debts, Provision for Doubtful Debts, Provision for Discount on Debtors, etc.
- (3) An appropriation made for payment of taxes still to be assessed.
- (4) Amount provided for meeting claims which are admissible in principle but the amount whereof has not been ascertained, i.e., Provision for Contingent Liabilities.
 - (5) Provision for Repairs and Renewals, etc.

Provision is a charge against profit, and it is debited to Profit & Loss Account before arriving at the figure of net profit or loss.

Reserves. Reserve means any amount which is appropriated out of profits as a matter of financial prudence to save the concern from prespective losses and liabilities. It is not meant to cover any liability, contingency, commitment or reduction in the value of an asset. Reserves are in fact provided for increasing the working capital of the business, to strengthen its financial position. Provisions that ultimately prove to be in excess of amounts required or have been made too liberally, are Reserves.

Problem 2. What is the difference between (1) General Reserve, and (2) Specific Reserve.

(I.I.B. Part I, October 1972)

Give short note on-Specific Reserve.

(I.I.B. Part I, May 1969)

Solution. Reserves are of two kinds:

- (1) General Reserve, and
- (2) Specific Reserve.

- (1) General Reserve. General reserve is created only to strengthen the financial position of the business and to keep funds available for any future contingency or expansion that may be required. This represents accumulation of profit set areast one of available profits. To create the General Reserve, P ount is debited and General Reserve Account and a Profit and Loss Account, what a debit balance cannot appear side by side in the Balance Sheet—one of the two will be closed by transferring to the other account.
 - (2) Specific Reserve. This reserve is created for specific purposes, such as Dividend Equalisation Reserve, Debentures Redemption Reserve, etc. Even if the Profit & Loss Account show the balance of any specific reserve is the alternative of the Specific Reserve is the other

Problem 3. Give short note on-Secret Reserve.

(I I.B. Part I, May 1969)

Solution: Secret Reserve. A secret reserve is a reserve the existence of which is not disclosed in the final accounts of the concern. It is created by showing lesser value of the Assets or higher value of the Liabilities, as e.g.,

- (a) By charging excessive depreciation;
- (b) By writing down assets such as Premises, Stock in-trade, Goodwill, etc., below their real values;
- (c) By creating excessive provisions for Bad Debts, Discounts and other Contingencies;
- (d) By charging capital expenditure as revenue expenditure, e.g., additions to buildings charged to repairs account;
- (e) By suppression of sales;
- (f) By showing reserves as creditors;
- (g) By showing a comingent hability as an actual liability, or by showing an asset as a contingent asset.

Creating secret reserve is advantageous to a concern on account of the following reasons:

- (1) It increases the working capital of the concern.
- (2) It conceals large profits made by the business.
- (3) Extra-ordinary losses can he met without disturbing the financial strength as disclosed in the final accounts.
 - (4) Uniform rate of dividends can be maintained.

Creation of secret reserve leads to the following disadvantages:

- (i) The final accounts of the concern do not show the actual results of trading and the true financial position.
- (2) The amount of secret reserves can be mis-utilised.

(3) As the assets are shown at a lower figure, it may be disadvantageous for the concern when a claim for loss by fire is made by it to the 3.73

Under the provisions of the Indian Companies Act, the creation of Insurance Company.

secret reserves is not allowed except for the Banking. Insurance and Electric Supply Companies. Any other company must seek the permission of the Central Government for creating secret reserves.

Problem 4. Give short note on Reserve Fund; Reserve Liability. (I.I.B. Part I, May 1969)

Reserve Fund: The term Reserve is used if the amount represented by such reserve is utilised in the business itself. If the amount standing to the credit of the reserve is invested outside the business in Securities, the reserve will become Reserve Fund.

Reserve Liability. It is represented by that portion of the capital of a company which has not been called up and which the company by a special resolution has declared not to be called up, except in the event of winding up of the company. It is also known as Reserve Capital.

RECEIPTS & PAYMENTS ACCOUNT, INCOME & EXPENDITURE ACCOUNT, AND BALANCE SHEET

Problem 1. What do you understand by Receipts and Payments Account and Income and Expenditure Account?. Describe the procedure for converting a Receipts and Payments Account into an Income and Expenditure Account.

Solution. There are certain institutions such as Clubs, Societies, Associations, Hospitals, Educational Institutions, Trade Unions, Charitable institutions, etc., which are established only for the purpose of reodering service and not for carning profits. It is necessary to maintain proper accounts in such concerns to avoid or minimise the chances of misappropriation and embezzlement of members money. The following are the main hooks which are normally kept by such institutions:

- (1) Register of members,
- (2) Minutes book to record the proceedings of meetings,
- (3) Cash Receipts Journal,
- (4) · Cash Payments Journal,
- (5) Ledger, and
- (6) Journal proper.

With the help of the above noted 3rd, 4th and 5th books, final statements of these institutions are prepared for the perusal of the memhers. These final statements consist of:

- (a) Receipts and Payments Account,
- (b) Income and Expenditure Account, and
- (c) Balance Sheet.

(a) RECEIPTS AND PAYMENTS ACCOUNT :

: It is a summary of actual cash receipts and payments covering a particular period. The receipts are cotered on the dehit side and the payments on the credit side. This account commences with the opeoing halance of cash io hand/cash at bank, and similarly closes with the halance of cash/haok at the end of the period.

All cash received and paid during the period, whether relating to that period, past or future, on account of capital or revenue, would be included in it. As it is mere a summary of eash transactions and include any incomes or expenses outstanding.

(b) INCOME AND EXPENDITURE ACCOUNT:

This is a revenue account and includes all income earned during that given period, whether actually received or not, and all expenditure incurred for the institution, whether actually paid or not.

The incomes are shown on the credit side and the expenses on the debit side. It records only the revenue items, and serve to indicate the surplus, i.e., excess of income over the expenditure during the period, or the deficit, i.e., the excess of expenditure over the income during that period.

(c) BALANCE SHEET:

It contains the particulars of all assets and liabilities of the concern at the date at which it is made up. The excess of the assets over liabilities is called the Capital Fund: Separate funds accounts are kept for the amounts raised for special purposes.

CONVERSION OF RECEIPTS AND PAYMENTS ACCOUNT INTO AN INCOME AND EXPENDITURE ACCOUNT

The undernoted steps are followed for the captioned purpose:

- (i) Exclude opening and closing Cash/Bank/balances.
- (ii) Eliminate all items of capital receipts and payments.
- (iii) Analyse the items of revenue nature on the receipts (debit) side, and exclude incomes of the previous period, or any income received in advance for the next period.
- (iv) Provide for accrued incomes, i.e., the incomes learned during the period but not yet received.
- (v) Analyse the items of revenue nature on the payments (credit) side, and exclude expenditure of the preceeding period or the succeeding period.
 - (vi) Provide for expenditure due but not yet paid.
 - (vii) Provide for depreciation, bad-debts and any other item, which would affect the net income of the concern.

PREPARATION OF BALANCE SHEET

Balance Sheet will be prepared keeping in view the following points:

(i) The assets appearing in the previous year's Balance Sheet should be adjusted for any sale or purchase during the period and the depreciation. In case of sale, only the book value of the asset sold should be deducted from that asset account. The difference in the book value and the actual sale proceeds is treated as profit or loss on sale of asset and is entered in the income and expenditure account for the period.

For the sale of any asset, the amount will be shown on the receipts side of the Receipts and Payments Account and the purchase of any asset will be shown on the payments side of the above said account.

(ii) Prepares propaid and Incomes accound but not yet received will also appear an the Assets sude of the Balance Sheet.

Grand to

- (iii) If any advance has been given to a person, the amount will appear on the payments! side and any recovery from him will be oo the receipts side. The net receivable amount will be shown as an asset in the Balance Sheet.
- (iv) The liabilities appearing in the previous year's Balance Sheet should be adjusted for any payment made against them, which information is provided by the Receipts and Payments account.

1 od incomes receiv-

id on the receipts
amount less any repay
own on the habilities

(rii) Special receipts like donations for huildings, etc. will he shown as a fund for that purpose on the liabilities side.

"(viii) 'The capital fund appearing in the previous year's Balance Sheet will be adjusted for the current year's surplus or deficit as shown by the Income and Expenditure account and the net amount will be shown in the Balance Sheet on the labilities side. Life membership fees, and entitance fees; if capitalised, will also be added in the Capital Fund.

Problem 2... Mention the important points of distinction between a Receipts & Payments Account and an Income & Expenditure Account.

(I.I.B. Part I, April 1980)

Solution: The distinguishing features of the above mentioned two forms of accounts are briefly enumerated below:

Receipts and Payments Account

Income and Expenditure Account

- (1) It is a summarised and classified form of Cash and Bank transactions and the transactions are entered oo the same side as in the Cash Book. It starts with the opening Cash or Book balance (on the debit side) or Bank overdraft (on the credit side). It is dehited with all sums received and credited with amounts paid out.
- (2) The halaoce of the account at the eod of the period represents the difference between the amount of cash received and paid out. It is always in debit except where there is bank overdraft.
- (1) It is drawn up in the same form as the Profit and Loss 'Account. Expeoditure of revenue nature only are shown on the dehit side, and iocomes' of revenue nature are shown on the credit side. It does not start with an opening halaoce. 1
- (2) The closing halance représents the amount by which the income exceeds the expenditure or viceversa. It shows either the net surplus; or deficit on the working of the concern for the period.

Prepaid expenses and prepayments of income during the last period pertaining to the current

period are included.

- (4) All the receipts and payments, whether of a revenue nature or capital nature, are included in the account.

 (4) Expenditure of a revenue nature only is shown on the Debit side, and income of revenue nature is shown on the credit side. Capital receipts and expenditures are not taken into account.
 - (5) It records all receipts and payments during the period, whether or not they actually relate to that period.

 (5) It contains only those items of income and expenditure relevant to the period of account whether received or paid out as well as those which have fallen due for payament or have accrued for recovery. Prepaid expenses and pre-payments of income during the period are excluded.

Problem 3. From the following particulars prepare:

Rent Printing	100 75	175	Add: Purchased in 1970	2,500	12,500
,			Accrued Intererst		150
Capital Fund: brought forward	15,575		Outstanding Subscriptions		325
Add: Surplus for the year			Library Books:	1,000	
1970 2,570	2,570	18,145	in 1970	300	1,300
			Furniture & Fittings	1,475	
			Add: Purchased in 1970	400	1,87
		18,320			18,320

### Working Notes:

(a) The Receipts and Payments account of the society will be prepared as shown hereunder:

### RECEIPTS AND PAYMENTS ACCOUNT OF MUSICAL SOCIETY for the year ended 31st December, 1970

Receipts	Details	Anount	Poyments	Details	Amount
	Rs.	Rs.		Rs.	Rs.
o Balance b/d		3,000	By Rent		600
o Subscription	s*	0,000	By Printing		150
1969	400		By Advertising		200
1970	2,100	2,500	By Sundries		55
17/10			By Govt. Securities	S	2,500
Entertainment &		By Furniture		400	
Lectures	,	1,000	By Library Books		300
		6,500		;	205 مىر

Total b/fd To Interest on Securities:	6,500	Total b/fd By Cost of entertainment By Creditors for 1969	4,205 750 425
1969	125	By:Balance c/d	2,170
1970	350 475		
The Sale of old chair To Entrance fees	75		
	7,550	,	7,550 ===

- (b) It has been assumed that out of subscriptions for Rs. 2,500, received during the year 1970, Rs. 400 related to the outstanding subscriptions for 1969.
- (c) Interest on securities Rs. 475 received is assumed to be inclusive of accrued interest for 1969 Rs. 125.
- (d) Entrance fees has been treated as a revenue income.
- (e) Book value of old chair is assumed to be nil and the sale proceeds have been taken as income.
- (f) It is assumed that the outstanding creditors of 1969 have been paid during 1970.

Problem 5. The following is the Receipts and Payments Account of a Cultural Society for the year ended 31st December 1977.

Receipts	Amount	Payments	Amount

	21,420		21,420

You are required to prepare the Income and Expenditure Account of the Cultural Society for the year ended 31st December 1977 and Balance Sheet as on that date after considering the following:

- (i) The Society has 1,800 members each paying annual fees of Rs. 10. Subscription amounting to Rs. 90 were still in arrears for the year 1976.
- (ii) Stock of stationery on 31st December 1976 was Rs. 125 and on 31st December 1977 was Rs. 87.

#### (iii) Entrance fees are to be capitalised,

- (iv) Salary of Rs. 550 for December 1977 is outstanding. Expenses accrued on 31st December 1976 were Rs. 132. The Society lad paid Rs. 500 in 1976 for telephone charges out of which Rs. 125 related to the year 1977.
- (v) On 31st December, 1976 premises stood in the books at Rs. 24,500 and Investments at Rs. 6,500.
  - (vi) Depreciate fixed assets by 5%.

(I.I.B. Part I, August 1978)

1114

#### Working Notes:

(1) The Cultural Society has 1,800 members each paying annual subscription of Rs. 10. Therefore, the total subscription for the year will be Rs. 18,000 (Rs. 10×1,800). The society has received only Rs. 16,200 towards subscriptions for 1977, bence a sum of Rs. 1,800 (Rs. 18,000–Rs. 16,200) is outstanding for 1977.

(2) Calculation of Capital Fund as on 1st January 1977.

BALANCE SHEET OF THE CULTURAL SOCIETY
as on 1st January 1977

as on 1st sanuary 1777					
Amount	Assests	Amount			
·Rs.		Rs.			
3,100 132	Cash on hand Subscriptions	1,500			
29,808	outstanding	290			
·	Stock of Stationery Telephone charges paid	125			
	in advance for 1977	125			
,		24,500			
	Investments	6,500			
	·	33,040			
==	•	===			
	Rs. 3,100 132	-Rs. 3,100 132 29,808 Subscriptions outstanding Stock of Stationery Telephone charges paid in advance for 1977 Premises Investments			

but subscriptions amounting to Rs. 90 were still in arrears for the year-1976 Thus, the total amount of subscriptions outstanding as on 31.12.1976 were Rs. 290 (Rs. 200+Rs. 90).

Problem 6. The following is the Receipts and Payments Account of Free Medical Aid Society for the year ended 31st March; 1977:

#### RECEIPTS AND PAYMENTS ACCOUNT for the year ended 31st March, 1977

Receipts .	Amount	Payments	Amount

## Working Notes:

# (1) Calculation of Capital Fund as on 1st April 1976:

BALANCE SHEET OF FREE MEDICAL AID SOCIETY

as on 1st April, 1976

Liabilities	Amount	Assets	Amount
	· Rs.		Rs.
Subscriptions received		Buildings	40,000
for 1976-77	1,000	Equipments	21,0:0
Creditors for medicines	8,000	Stock of Medicines	10,000
Capital Fund	1,69,500	Subscriptions	
(Balancing figure)		outstanding for 1975-76	500
		Investments	1,00,000
•		Cash on hand.	7,000
,	مريجينة محميين فسيهي ويحسين	• ,	
	1,78,500		1,78,500
	======	•	

#### (2) Calculation of Investments:

Interest received on investments at 7% for one year is Rs. 7,000. Therefore, value of investments as on 1-4-1976 will be:

Rs.  $\frac{7,000 \times 100}{7}$  = Rs. 1,00,000

Problem 7. From the following (1) Balance Sheet as on 31st December 1970, (2) Receipts and Payments account for the year ended 31st December 1971, and (3) The other particulars given prepare Income and Expenditure Account for the year 1971 and a Balance Sheet as at 31st December 1971 of Western Sports Club:

# B CAPITAL AND REVENUE EXPENDITURE

Problem I. Describe briefly the distinction between Capital Expenditure and Revenue Expenditure.

(LI.B. Part I, May 1970)

#### Solution:

To understand the fundamentals of accountancy, it is highly essential for a person maintaining accounts to know the clearcut distinction between Capital and Revenue expenditure. In view of the fact that in preparing the final accounts all revenue items are recorded in the Revenue Account, i.e., the Trading and Profit and Loss account, and all items of capital expenditure are presented in the Balance Sheet of the concern, it follows that this distinction should be rigidly observed. Failure or neglect to discriminate between the two will faistfy the whole of the results of accounting. For example, if an expense of a revenue nature is debited to some asset account, it will result in inflating the profits, and vice-versa.

#### Capital Expenditure:

An item of expense that brings into existence an asset of lasting value, which is intended to be continually used in the business for the purpose of earning revenue, is Capital Expenditure. In a general way all amounts spent for acquiring Lands, Buildings, Machinery, Furniture Patents, Vehicles, etc represent Capital Expenditure.

Expenditure which increases the profit earning capacity either by increasing the output or by reducing the cost is also treated as Capital

Expenditure (if its benefit is likely to be available over a number of years).

The cost of any additions to assets is also considered Capital Expenditure so long as it results in increasing their usefulness to the business or their life.

(Capital assets are acquired by a business not for resale but for being employed for the purpose of carrying on business.)

The benefit of such expenditures is not fully consumed in one year, but spread over several years.

#### Revenue Expenditure:

All expenses incurred for establishment, conduct and administration of the business are coming under this category. Examples are Salaries, Rent, Taxes, Stationery, Postage, Advertising, etc.

Further, all expenses on repairs, replacements and renewals of existing assets, or defending one's title to them are also Revenue Expenditures. Such expenses do not in any way add to the earning capacity of the assets, but serve to maintain them in an efficient working order.

All expenses incurred for improving or adding to the value of stocks by moving them from one place lo another are also included in this category of expenses. Thus, an expense on the purchase of Raw Materials, Freight, Cartage, Insurance, etc., are considered revenue expenditure.

It consists of expenditure incurred in one period of account, the full benefit of which is consumed in that period.

Problem 2. Eastern Industries Ltd., removed their factory to a more suitable premises in West Bombay.

- (a) A sum of Rs. 9,500 was spent on dismantling, removing and re-installing Plant, Machinery and Fixtures.
- (b) The removal of Stock from the old Factory to the new cost Rs. 1.000.
- (c) Plant and Machinery which stood in the books at Rs. 1,50,000 included a machine at a book value of Rs 3,400. This being obsolete was sold off at Rs. 900 and was replaced by a new machine which cost Rs. 4,800.
- (d) The freight and cartage on the new machine amounted to Rs. 300 and the erection charges Rs. 550.
- (e) The furniture appeared in the Books at Rs. 15,000. Of these, some portions of the book value of Rs. 3,000 was discarded and sold at Rs. 1,200. New furniture of the value of Rs. 2,400 was acquired.
- (f) A sum of Rs. 2,200 was spent on painting the new factory. Please state which items of Expenditure would be charged to capital and which to Revenue.

## (IIB. Part I, February 1966)

## Solution;

(a) Rs. 9,500 expended on dismantling, removing and re-installing Plant, Machinery and Fixtures will have to be treated as revenue expendi-

ture It may be treated as deferred revenue expenditure item and spread over a term of years say 3 to 7 years and a proportionate amount be charged to revenue every year.

- (b) Rs. 1,000 being the eost of removal of stock from the old factory to the new premises does not add to the value or the profit earning capacity of the stock and as such, it will be treated as a revenue expenditure.
- (c) The difference of Rs. 2,500, between the book value of the machine (Rs. 3.400) and its sale proceeds (Rs. 900), will be charged as -Revenue expenditure, to be shown as a loss on sale of assets. Rs. 4.800. spent for purchasing a new machine in place of old one will be capitalised, I e., it will be treated as capital expenditure.
- (d) Freight and cartage Rs. 300 and erection charges Rs. 550 on the new machine are capital expenditures, as they are in connection with the acquisition of a new asset.
- (e) Rs. 1.800 the difference between the book value of the furniture discarded (Rs. 3,000) and the amount realised there from (Rs. 1,200) will have to be treated as Revenue expenditure, as loss on sale of assets. Rs. 2,400 the cost of new furniture will be treated as Capital expenditure.
- (f) An amount of Rs. 2,200 spent on painting a new factory is Capital expenditure and will be added to the cost of new building, because this amount belongs to the new construction.

Problem 3 A firm of builders purchased a plot of free-hold land for the purposes of constructing new offices thereon for its own use. The office building was erected on an area eovering one quarter of the site, using the firm's own labour and materials. The remaining land was used by the firm for building bouses which were sold to the public in separate lots.

Describe how the cost of the land and buildings erected thereon. should be dealt with in the books of the firm. Solution:

(I.I B. Part I. May 1970)

In the above cited problem, it is quite evident that the office building was erected on an area covering one-quarter of the site, using the firm's own labour and materials, thus, the total cost incurred for the purchase of plot, payment of wages and of materials purchased will be divided in the ratio of 1:3, ie, 25% and 75% 25% of the cost will be treated as Capital Expenditure and 75% as Revenue expenditure.

Following journal entries will be passed for the purpose:

#### JOURNAL ENTRIES Debit Credit SI. Particulars L.F. Amount Amount Rs. Rs (1)Free-hold Land A/c Dr.

To Bank A/c (Being the cost paid for purchasing a a plot of free-hold land)

Dr. Dr. Wages A/c Material A/c (Being the amount paid to labourers and the amount incurred for purchase of materials) Dr. Office Building A/c To Free-hold Land A/c To Wages A/c To Material A/c (Being 1th of the costs incurred on purchase of land, payment of wages and purchase of material transferred to office building account) Note: Office Buildings will be shown as an asset in the Balance Sheet. Dr. Buildings for Sale A/c To Free-hold land (4) To Wages A/c To Material A/c (Being 3th of the costs incurred on purchase of land, payment of wages and purchase of materials transferred to the Buildings for sale (revenue A/c). Dr. Bank A/c **(**5)

To Buildings for sale A/c (Being the sale proceeds of the houses sold to the public in separate lots)

Note: If all the houses are sold by the end of the accounting period, any credit balance left in the 'Buildings for Sale Account' will be transferred as profit in the Profit and Loss account and if there is a debit balance in the said account, it will be transferred to the Profit and Loss account as a loss.

If all the houses are not sold by the end of the accounting period, the cost of the unsold houses will be treated as Closing Stock, to be shown once on the credit of Trading Account and then on the Assets side in the Balance Sheet.

(Bills of Exchange and the Treatment thereof

#### BILLS OF EXCHANGE

Problem 1. What are the advantages of the use of Negotiable Instruments like Bills of Exchange, Cheques and Promissory Notes? (11.B. Part I, May 1972)

Give short notes on Bill of Exchange; Promissory note.

(I.I.B. Part I, May 1969)

Write short notes on D/D; Promissory notes.

(I.I.B. Part I, November 1970)

Explain briefly from a Bank's view point:

(1) D/D, (2) P/N

(II.B. Part I, Navember 1973)

Explain briefly :

(1) P.N.; (2) Bill of Exchange; (3) D/D.

(I I.B. Part I, May 1975)

Solution. A seller does not always get cash in immediate payment for goods sold. He is generally ready to grant cash, but whats some written undertaking or agreement from the buyer to pay the amount after a specified period. This written agreement or undertaking takes the form of a Bill of Evchange or Promisory Note. This paper will serve as a legal document to prove that purchaser is the debtor of the seller. If the purchaser refuses to make the payment in future, the seller can go to the court.

A Bill of Exchange, Promissory Note or Cheque is called a Negotiable Instrument. It is a document which, by endorsement and delivery, or by mere delivery, passes the full title of the instrument to the transferee.

There are obvious advantages in using negotiable instruments:

(a) They fix the date of payment—the creditor knows when he will get money and the debtor knows when he will have to pay.

(b) The seller may wait until the period of the instrument is matured and get the payment at that time, or he may encash it by getting the document discounted from a bank, or may transfer it to his own creditor for the purpose of settling his account with him.

(c) They facilitate the prosecution of recovery action in the event

of buyer's default.

Bill of Exchange: It is "an instrument in writing, conting an

unconditional order signed by the maker, directing a certain person or to the bearer of the instrument."

(Indian Negotiable Instrument Act, 1881 Sc. 5)

There are three parties to a Bill of Exchange:

- 1. The Drawer. He is the creditor (Seller) and draws a bill of exchange on the debtor (Purchaser).
- 2. The Drawee or the Acceptor. He is the person on whom the bill is drawn, i.e., the debtor. A bill drawn by the drawer must be accepted by the drawee, which will be a proof of the willingness of the drawee that he agrees with the contents of the bill.
  - 3. The payee. The person to whom the amount of the bill is to be paid. Sometimes, the drawer and the payee can be one party.

Promissory Note: It is an "instrument in writting (not being a bank note or a currency note) containing an unconditional undertaking, signed by the maker, to pay a certain sum of money only to, or to the order of a certain person, or to the bearer of the instrument."

(Indian Negotiable Instrument Act, 1881 Sc. 4)

There are two parties to a Promissory Note:

The Maker. The person who makes the note and undertakes 2. The payee. The person in whose favour the Note is made.

All Bills and Promissory Notes which are not expressed to be payable on demand, at sight or at presentment, are due for payment on the third day after the day on which it is expressed to be payable. For all 'after date' or 'after sight' bills, these three extra days are known as Days of grace.

Cheque: A cheque is a written order drawn by a customer of a bank instructing his banker to pay on demand a specified sum of money o the person named therein or to his order or to the bearer.

In other words, cheque may be defined as "A bill of exchage drawn. banker payable on demand."

Demand Draft: This term is used for an instrument drawn by a Bank upon another bank, or upon one of his own branches or on his local or foreign correspondent.

Bank's Demand Drafts are commonly used in making remittances of money from one place to another. These are payable on demand, but .are never bearer. '

Problem 2. Explain the accounting treatment of a bill of exchange. What entries should be passed when a Bill Receivable is dishonoured by non-payment after it has been dealt with in any one of the following ways:

- (1) when it is retained till maturity by the Recipient;
- (2) after it has been discounted with the Bankers;
- (3) after it has been endorsed over to a Creditor; and
- (4) after it has been sent to the Bankers for collection?

(I.I.B. Part I, November 1969)

Problem, 3 Write short note on Accommodation Bill.

. (I.1.B. Part I, November 1970)

Solution. Sometimes bills are drawn and accepted to belp a friend who is temporarily in need of money. This is done hy means of drawing, accepting and discounting accommodation hills,

. "An Accommodation Bill is a bill of exchange for which no consideration is given by the drawer to the acceptor, but which has been drawn and accepted by the parties concerned for their mutual accommodation with a view to raise money by negotiating it."

After acceptance, such a bill of exchange is discounted at the bank-the money so realised is utilised by the friend in need of money (drawer) for the period of the bill and he-(drawer) -makes-the payment of the hill to the acceptor before maturity to enable bim to meet the bill on the due date.

Sometimes the eash proceeds of the bill discounted from the hank are utilised by both the parties. After getting the accepted hill discounted from the the drawe the drawe.

drawee to enable bim to meet the hill.

In other cases, the two persons in need of money draw bills on each other for equal amounts. After acceptance, they get the bills discounted with their bankers. Each of them keeps with him the cash proceeds of the bill discounted by him and also bears the discount charges of the bill. Each of them meets his own acceptance on the due date.

The accounting treatment for an accommodation hill is the same as for an ordinary trade bill. However, there are certain additional entries in it for remittances to be made by the drawer to the drawee and vice-versa.

Problem 4. B owes C a sum of Rs. 600. On 1st January, 1966 he gives a Promissory Note for the amount for 3 months to C who gets it discounted with his hankers for Rs 590. On the due date the bill is dishonoured, the hank paying Rs, 5 as Noting Charges. B then pays Rs. 200 in cash and accepts a hill of exchange drawn on him for the halance together with Rs. 10 as interest. The hill is for 2 month and on due date it is again dishonoured, C paying Rs. 5 as Noting Charges.

Pass Journal Entries in the books of C.

(I.I.B. Part I, November 1967)

### Solution:

Problem 5. Deepal owed Sheetal Rs. 70,000 for which she accepted a Bill drawn on her by Sheetal payable after 3 months from 1st April 1982.

On the 4th April, the Bill was discounted by the Drawer with her bank for 95% value. The Bill was not met on the due date and the Bank, therefore, debited the same to the Drawer's account with Rs. 10 incidental charges and Rs. 40 overdue interest, on the 10th July. The drawee settled the Bill value together with costs on 11th July.

Pass Journal entries, with full narration, in the books of Deepal and Sheetal, for the above transactions.

(I.1.B. Part I, November 1982)

Problem 6. On 1st April 1980, Vijay draws a bill for Rs. 6,000 on Dev for a period of four months. The bill is duly accepted by Dev. On 5th April, Vijay endorses the bill in favour of Chetan. However, on 25th July, Dev approaches Vijay and requests that the bill be renewed for a further period of four months at 10% interest per annum. Vijay agrees and paid the necessary money to Chetan on 4th June. The bill was duly accepted and paid by Dev. Pass the necessary Journal entries, with full narration, to record the above in the books of Vijay.

**Problem 9.** On 1st January 1979, Bimal drew on Chetan three Bills of Exchange in full sattlement of claims; the first for Rs. 14,000 at one month, the second for Rs. 16,000 at two months and the third for Rs. 18,000 at three months. The bills were duly accepted by Chetan.

The first bill was endorsed by Bimal to his creditor Tarun on 3rd January 1979, the second Bill was discounted on 15th January 1979 for Rs. 15,900 and the third bill was sent to bank for collection on 4th February 1979. All the bills were duly met on maturity except the second Bill which was dishonoured, noting charges being Rs. 240. Bimal charged Chetan Rs. 300 for interest and drew on him a fourth bill for two months for the amount due. The fourth bill was duly met on maturity.

Pass Journal entries (including narration) in the books of Bimal.

(I.I.B. Part I, November 1979)

Decer	Problem 13. Whilst closing the nber 1972 a sum of Rs. 600 due t	books of a	accounts as	on 31st

Problem 13. Whilst closing the books of accounts as on 31st December 1972 a sum of Rs. 600 due by B to A was written off as had deht. However, in order to keep the business transactions going, Mr.3B paid to Mr. A oo 10th January 1973 a sum of Rs. 500 in full or final settlement of the amount due.

After taking into consideration the following transactions, show (1) B/R Account, (2) Mr. B's Account, and (3) Rad debts Account in the hooks of Mr. A:

1973

Jan. 11 Sold goods to B for Rs. 1,200. B paid Rs. 200 in cash and accepted a bill for Rs. 1,000 at one month. This bill was discounted with the Bankers for Rs. 998.

Feb. 14 The above bill was dishonoured. Bank charging Rs. 5 as notarial charges.

,, 15 B accepted a new bill for Rs. 1,000 at two months in licu of the above bill, paying notarial charges and Rs. 15 as interest in cash.

Apr. 18 B met his bill by paying Rs. 550 in cash and accepted a fresh bill for Rs. 475 at 3 months with interest.

June 1 B became insolvent and 50 per cent of the amount due by his estate was distributed amongst his creditors.

Journal entries are not required.

(I.I.B. Part I, May 1973)

Problem 15. On 1st October 1969, A drew a bill on B for Rs. 500 and B drew a Bill on A for a similar amount, both the bills for a term of 3 months. Both the bills were discounted at the Bank. The Bank charged Rs. 8 for discount. On the due date B met his hill. A, however, notified B of his inability to meet the bill and B, therefore, had to take it up. A paid B Rs. 200 on 3rd January 1970 and accepted another bill. drawn by B at two months' date for Rs. 307 including interest. This acceptance having been met by A on the due date.

Pass journal entries in the books of both the parties.
(I.I.B. Part I., May 1970)

Problem 16. X draws a bill for Rs. 1,500 and Y accepts the same for the mutual accommodation of both of them to the extent of X 2/3rd and Y1/3rd. X discounts the same for Rs. 1,410 and remits 1/3rd of the proceeds to Y. Before the due date, Y draws another bill for Rs. 2,100 on X in order to provide funds to meet the first bill. The second bill is discounted for Rs. 2,040 with the help of which the first bill is met and Rs. 360 are remitted to X. Before the due date of the second bill, X becomes bankrupt and Y receives a dividend of 50 p. in the rupee in fully satisfiaction.

Pass the necessary journal entries (with full narration) in the books of Y.

Problem 17. Lalji draws a bill for Rs. 4,:00 on Palji on 2nd January 1980 for 3 months. Lalji gets it discounted with the Bank for Rs. 4,410; and on 3rd January remits one-third of the amount to Palji, which Palji receives on 5th January. On the due date, Lalji fails to remit amount due to Palji; but he accepts a bill for Rs, 6,300 for 3 months ich Palji discounts for Rs. 6,165 and remits Rs. 1,110 to Lalji. Before a maturity of the renewed bill, Lalji becomes insolvent and only 50% was realised from his estate on July 10. Pass Journal entries, with full narration. in the books of Lalii.

Account.

The Debtors and Creditors on 30th June-1980 in the books of Ram & Co. were as under :-Rs. Cieditors . Rs. Debtors G. Godse' A. Ahmed 450 500 787 H: Holmes: 620. B. Behram C. Corrimji 1,225 . Li. & Company 985 2,100 J. Jack 1.750 D. Dawn E. Rao K! Raman': 1,500 975 1,800 F. lyer LJ Mehtav 727

The Bank Balance on 30th June 1980 was Rs. 4,320. All acceptances of Ram & Co. were made payable at their bankers, the Bank of Baroda:—

1980

- July 2 Drew on A. Ahmed Bill No. 1 at one month after date for Rs. 430 allowing them discount Rs. 20, payable at State Bank of Patiala.
- July 4 Received acceptance from B. Behram for Rs. 500 at 2 months date payable at Bank of India, Bill No. 2.
- July 6 Accepted H. Holmes draft of the 2nd instant at 2 months date for Rs. 600 in full settlement of account, in favour of Haridas & Co., Bill No. 101.
- July 3 Bills Receivable No. 1 was discounted for Rs. 420.
- July 5 Discounted B. Behram acceptance with our Bankers receiving Rs. 480.
- July 7 Gave G. Godse our acceptance at one month's date for Rs. 500 in favour of Vinayak Bros., Bill No. 102.
- July 8 Received D. Dawn acceptance of our draft at three months date for Rs. 2,075 in full settlement of their account payable at Bank of Baroda, Bill No. 3.
- July 10 C. Corrimji forwarded us X's acceptance to them for Rs. 1,225 payable at the Union Bank. This bill was accepted on 15th June and drawn at 2 months date, Bill No. 4.
- July 15 Received J. Jack's draft on us for 13th instant at 2 months date in favour of R & Co. for Rs. 1,700; discount allowed Rs. 50. Returned same duly accepted. Bill No. 103.
- July 16 Returned duly accepted I. & Company draft for Rs. 970 in full settlement of their account at 2 months date in favour of Blance & Co. Bill No. 104.
- July 19 K. Raman forwarded us their draft dated 17th instant for Rs. 1,800 in favour of White & Co. at three months date for our acceptance. Returned same accepted. Bill No. 105.
- July 20 Received from E. Rao acceptance of our two drafts payable at the Central Bank of India at 2 months date for Rs. 800 and Rs. 700 respectively. Bill No. 5 and 6.
- July 21 Endorsed over E. Rao acceptance for Rs. 700 in favour of L. Mehta in full settlement of their account.
- July 25 Received from F. Iyer, R & Co's acceptance to him for Rs, 600 at one month's date payable at the State Bank of India, Bill drawn on 20th July. Bill No. 7.

Bill Nos. 101, 102, 103 were duly met by our Bankers. Bill No. 104 is renewed by us on 17th September by paying 18 Company Rs. 500 by cheque including Rs. 50 for interest and accepting new draft on us at three months date for the balance. Bill Nos. 4, 5 and 6 are dishonoured on due dates. Bill No. 7 is collected by us on the due date.

2.

Received on 2nd July B/R No. I for Rs. 430/- after allowing him discount of Rs. 20. The bill is got discounted on 3rd July for Rs. 420.

- Received on 4th July B/R No. 2 for Rs. 500/-. Bill got discounted on 5th July for Rs. 480. Balance due from him Rs. 287.
- 3. C Corrimji Rs. 1,225:

B. Behram Rs. 787:

Received on 10th July B/R No. 4 for Rs. 1,225/-. Bill is dishonoured on 18-8-80. Balance due from him Rs. 1,225/- excluding interest noting, charges, returning charges etc., if any.

#### 4. D. Dawn Rs. 2100:

B/R No. 3 received from him for Rs. 2,075 after allowing discount of Rs. 25. The bills fall due after 30th Sept. and as such represent due balance of Bill Receivable A/c.

### 5. E. Rao Rs. 1,500.

B'R No. 5 and B/R No. 6 for Rs. 800/ and Rs. 700/ respectively received from him. Bills are dishonoured on 23.9 80. Balance due from him Rs. 1,500/- excluding interest, noting charges, returning charges, etc.

## 6. F. Iyer Rs. 975:

B/R No. 7 received from him for Rs. 600. Bill is collected on 23.8.80. Balance due from him Rs. 375.

Note: Debtors outstanding are Rs. 3,387+B/R A/e balance Rs. 2,075+cash received from debtors amount to Rs. 1,500 + discount allowed to them Rs. 75=opening balance of debtors for Rs. 7,037.

#### Creditors (Total Rs. 6,382)

## 7, G. Godge Rs. 500:

B/P No. 102 for Rs. 500 accepted by us and its payment is made on 10,8.80.

#### 8.. H. Holmes Rs. 620:

B/P No. 101 accepted for Rs. 600/, Rs. 20 discount allowed hy him. Bill is paid on 5.9.80.

#### 9." I & Co. Rs. 985:

B/P No. 104 accepted for Rs. 970, they allowed discount of Rs: 15. B/P got renewed on 17.9.80 by paying Rs. 500 in Cash and accepting B/P No. 106 for Rs. 500 (Rs. 470 for the balance and Rs. 30 towards interest payable). This bill is due after 30.9.80 and as such included in the balance of B/P A/c.

## 10. J. Jack Rs. 1.750:

B/P No. 103 accepted for Rs. 1700, he allowed discount of Rs. 50. Bill is paid on 16.9.80.

## 11. K. Raman Rs. 1,800:

B/P No. 105 accepted for Rs. 1,800. Bill is due after 30.9.80 and included in the balance of B/P A/c.

## 12. L. Mehta Rs. 727:

On 21st July B/R No 166 for Rs. 700 endorsed to him and he allowed discount of Rs 27. The said B/R is dishonoured on 23.9.80. Balance due to him is Rs. 727.

N. te: Creditors outstanding Rs. 727+B/P A/e balance Rs. 2,300+Cash paid to them amount to Rs. 3,300 + discount allowed by them Rs. 83=opening balance of creditors Rs. 6,332 + Interest payable on renewal of the bill Rs. 30.

Sectional System of Self-Balancing Legders (Simple Problems Only)

## A

## SELF-BALANCING LEDGERS

Problem 1. What do you understand by the system of self-Balancing Ledgers?

Solution. In the big business firms, where a number of ledgers are kept, it is not easy for the accountant to trace book-keeping errors, if the combined balances of all the ledgers are taken down in the shape of a trial balance. In order to reduce to a minimum the trouble and time involved in locating the errors, generally the system of Self-Balancing or Sectional Balancing of ledgers is employed.

For a proper working of the Self-Balancing System, generally three

types of ledgers are kept:

accounts of the customers to whom goods are sold on credit.

(2) Suppliers or Purchases or Bought or Creditors: Ledgers containing the accounts of persons from whom goods are bought on credit.

(3) General Ledgers to keep all other accounts, i.e., the Real and Nominal accounts and the Personal accounts which do not relate to trade Debtors and trade Creditors.

In order to make each ledger Self-Balancing, the ledger which contains debit entries should be provided with a credit entry also and vice-versa. To accomplish it, an extra account called 'General Ledger Adjustment Account' is opened in the Sold and Bought Ledgers. In the General Ledger two adjustment accounts are opened called the Sales Ledger Adjustment Account and Bought Ledger Adjustment Account. To these adjustment accounts in each ledger will be posted contra entries of those that are already recorded in the same ledger. These contra entries will be made in monthly or other periodical totals. By doing this, the double entry of every transaction is recorded in the same ledger and, therefore, a separate Trial Balance can be extracted from each ledger.

## Self-Balancing of the Sales Ledger

All Debtors accounts are opened in the Sales Ledger and in order to make this ledger Self-Balancing, a General Ledger Adjustment Account is opened in this ledger. All entries appearing on the debit side of individual Debtors accounts (Opening Balance, Sales, B/R dishonoured, Interest and expenses charged, etc.) will be shown on the credit side of the above said adjustment account. Similarly, all credit entries of the individual Debtors accounts (Cash received, Discount allowed, Bills

accepted by them, Allowances given, Bad debts written offi etc.) will appear on the debit side of the General Ledger Adjustment Account.

Simultaneously, a Sales Ledger Adjustment Account is opened in the General Ledger to make it Self Balancing. All entries appearing on the debit side of the individual Debtors accounts are debited to this account and all credit entries in the individual Debtors. credited to the Sales Ledger * The Sales Ledger Adjustment . . sents a summarised Dehtors Account.

### Self Balaucing of Bought Ledger

All Creditors accounts are opened in the Bought Ledger and in order to make this ledger Self-Balancing, a General Ledger. Adjustment-Account is opened in the Bought Ledger. All entries appearing on the credit side of the 'individual' Creditors 'accounts (Opening balance Purchase made, Interest payable, Expenses payable, Bills payable dishonoured, eter) will be shown on the debit side of the above-said account. Similarly, all debit entries of the individual Creditors accounts (Cash mild Continue repaired Billy nounble accounted Returns puttyands pin)

accounts' are dehited to the Bought Ledger Adjustment Account (in General Ledger). The Bought Ledger Adjustment Account in the General Ledger thus represents a summarised Creditors Account.

#### Self-Balancing of the General Ledger .

Contract to

As a result of the adjustments in the Sales Ledger Ajustment Account and the Bought Ledger Adjustment Account in the General Ledger, the General Ledger is Self-Balanced as regards' the transactions relating to Trade Debtors and Trade' Creditors: As regards tother transactions, no extra adjustment is required, as both the debit and the credit in respect of each such transaction must have been made in different accounts in the General Ledger stself,

Note. When the goods are bought from and sold to the same person, as it does happen sometimes, two separate accounts should be opened-one in the Bought Ledger and the other in the Sold Ledger. At the time of settling the account with him, the smaller amount is transsferred to the greater.

Problem 2. Explain briefly the advantages of Self-Balancing System.

(I.I.B. Part I. October 1971)

Solution: The advantages of this system are:

(t) The accuracy of each ledger can be tested separately. If it is found that there is mistake or error in any one ledger, only that ledger and not the others need be checked.

- (2) It helps towards a speedy detection of errors and thus facilitates preparation of Final Accounts soon after the completion of the period.
- (3) If fixes the responsibility of each ledger-keeper, as to the blancing of ledgers under his charge, and the man responsible for the mistake can be called upon to work overtime to locate it.
- (4) It helps to prevent or detect fraud on the part of those in charge of any of the ledger.
- (5) The balances of trade Debtors and trade Creditors are readily available.
- (6) It enables preparation of interim accounts without personal ledgers having to be balanced, and
- (7) It provides a good method of office control. Efficient clerks can be easily distinguished from the inefficient.

Problem. 3 What is Sectional Balancing? Distinguish it from Self-Balancing Ledger.

Solution: Under the Sectional Balancing system, the correctness of the posting of the Sales and Bought legders is checked by preparing Total Debtors and Total Creditors Accounts in the General Ledger. The only difference between Self-Balancing ledgers and Sectional Balacing is that no adjustment accounts are prepared in the Sold or Bought Ledgers. These ledgers, therefore, cannot afford a Trial Balance. In the General Ledger, the Bought Ledger Adjustment Account is termed as 'Total Creditors Account' and the Sold Ledger Adjustment Account is termed as 'Total Debtors Account'. To check the accuracy of the Sales Ledger, the total of the individual balances of the customers are compared with the balance in the Total Debtors Account and the total of individual suppliers accounts balances is compared with the balance in the Total Creditors Account.

Double entry is complete only in the General Ledger.

Problem. 4 Set out the following particulars in the form of Sales Ledger Adjustment Account (in the General Ledger) on 31st December 1969:

•		Rs.
· Credit sales		50,000
Discounts allowed		2,000
Cash received		35,000
Bills accepted		5,000
Bad debts written off		1,500
Bills dishonoured		500
Bad debts previously written off, recovered		600
Credit sales returns		1,500
Balance as on 1st January 1969		10,000
Cash sales		1,200
	trrn n	,

(I.I B. Part I, May 1970)

Cr.

#### Solution:

Dr.

#### IN THE GENERAL LEDGER SALES LEDGER ADJUSTMENT ACCOUNT

Date	Particulars	Amount	Date	Particulars	Amount
1969		Rs.	1969		· Rs.
	To Balance b/d To General Ledger Adjustment A/c:		Dec. 31	By General Ledger Adjustment A/c: (in Sales Ledger)	
	(in Sales Ledger)			Discount allowed	2,000
	Sales	50,000		Cash	35,000
	Bills dishonoured	500		B/R	5,000
				Bad Debts	1,500
			n	Sales Returns	1,500
			Dec. 3	By Balance c/d	15,500
		60,500			60,500
		60,200			00°,500

#### Working Hints:

- (a) Cash sales and old bad debts recoverd will not appear in the Sales Ledger Adjustment Account in the General Ledger.
- (b) Bills accepted means here that bills have been accepted by the debtors of the firm, i.e., they are Bills Receivables.

Problem 5. From the following particulars draw up a Sales Ledger Adjustment Account in the General Ledger:

	Rs.
Opening Balance Dr.	1,250
Opening Balance Cr.	30 3,720
Sales	600
Cash Sales Cash received from debtors	2,005
Sales returns	317 130
Discount allowed	371
Bad Debts written off Reserve for Bad Debts	500
Old Bud Debts recovered	30 41
Allowances	130
B'R received B/R dishonoured	50
Closing credit balance	72
-	, , , , , , , , , , , , , , , , , , , ,

Bills receivable accepted b	y eustomers		. 2,600
Bills dishonoured			500
Closing Credit balance		•	1,440
-		(11.B. Part )	(, April 1979)

#### Solution:

## IN THE NOMINAL LEDGER SALES LEDGER CONTROL ACCOUNT

Dr.		•	Cr.
Particulars	Amount	Particulars	Amount
	Rs.		Rs.
To Balance b/d	25,000	By Balance b/d	600
To Sales	62,400	By Cash	40,100
To Bills dishonoured	500	By Discounts allowed	2,600
To Balance c/d	1,440	By Returns by customers	6,340
•	•	By Bad debts written off	7,420
		By Allowance to customers	840
		By Bills Receivable	2,600
		By balancing c/d	28,840
		(Balancing figure)	
	89,340		89,340
	===		_==-

## Working Hints:

- (a) Returns outwards during the year amounting to Rs. 2,400 are not to be entered in the Sales Ledger Control Account, since these represent purchases returned and as such relate to Purchases Ledger Control Account.
- (b) The undernoted items will not appear in the Sales Ledger Control Account because they are the transactions relating to the Profit & Loss Account:
  - (i) Reserve for bad debts created during the year
     (ii) Reserve for bad debts at the begginning of the year
     Rs. 10,000
     Rs. 5,000
  - (iii) Bad debts previously written off recovered in cash during the year Rs. 600

Problem 11. Chavan keeps his 'Sale Ledger' upon the "Self-Balancing principles". From the following data, please prepare the necessary 'Adjustment Account' as on 31st January, 1965:

1965 Rs. 1,25,420 Jan. 1 Total debtors balances on this day were Total goods sold to customers for the month 2,16,580 9,420 Total goods returned by customers for the month Total cash received from the customers for the month 1,56,210 Total discount allowed to customers for the month 9,680 Total acceptances received from customers during the month Total acceptances dishonoured by customers during

#### CONSIGNMENT ACCOUNTS

Problem 1. Write a short note on Consignment.

(I.I.B. Part I, November 1970)

Solution. If goods are sent by one person to another, who sells them on behalf of the first person, the transaction is known as Consignment. The person who sends such goods is known as the Consignor and the person to whom the goods are sent is known as the Consignee, To the principal or the consignor, the goods thus sent out would be known as 'Outward Consignments', whereas to the agent or consignee, they would be known as 'Inward Consignments'.

The Consignee is remunerated for his services by payment of commission, which is usually calculated as, n fixed percentage of gross sale proceeds. Where the consignee, in addition to selling the goods, undertakes the risk of had delts arising out of credit sales, he is paid additional commission known as 'de-t-redere commission'.

It is usual for the consignor to make out an invoice called a *Pro-forma Invoice' and send it to the consigner alongwith the consignment. Such a invoice contains the particulars as regards description, quality, quantity, price of the goods, marking, packing, details of any expenses incurred and also, sometimes, the mode of marketing.

Problem 2. Explain briefly: Account Sales.

(I.I B. Part I, May 1975)

Solution. The statement of account submitted by the Consignee to his Consignor, containing detailed particulars of sales made, expenses incurred for receiving and selling the goods, his commission, advance remittances if any made now or the net amount due to the consiguor, is described as 'Account Sales'.

Problem 3. Explain how the consignment transactions are recorded in the books of the consignor and the consignee.

Problem 4. How will you treat the elosing stock under the following erreumstances: For closing 'Goods sent on consignment Goods sent on account'

Trading

If there is loss on consignment.

Stock on consignment (outward); and Stock on consignment (inward).

(11.B. Part I, November 1970)

closing stock, if any, must be taken into account, so that the Balance, Sheet of the Consignor may show his true position and the Consigner of Account may also show the correct profit. The valuation of stock on consignment (outward) is done either at market price or cost price, whichever is less. Solution. (1) Stock on Consignment (Outward): When the consignment account is closed, the value of

However, cost price includes the rateable proportion of all those non-recurring expenses incurred by the consignor as well as by the consignee, which includes Cartage, Freight, Insurance, vic. Expenses incurred after the goods are well as by the consignee, which includes Cartage, Freight, Insurance, vic. The eost thus ascertained is the 19thus of Consignment Stock, is it is less than the market price of such unsold ought to the godown or shop of the ponsigner are not to be considered.

(2) Stock on Consignment (Inward): The unsold stock with the consignee is not his own stock, therefore, he does not record the same in his books. He simply maintains a memorandum record of such consignment stock with him.

Problem 5. Give short note on Goods in transit: Goods on Consignment.

(I.I.B. Part I, May 1969)

## Solution. Goods in transit

The problem of Goods in transit arises in 'Branch Accounts'. At the time of balancing, it may happen that goods may have been supplied by the Head Office to a Branch by loading the same on a rail or truck, but the same might not have reached the destination before or on the date of balancing the records. The result of this will be that the Branch will not credit the Head Office before the date of balancing, although the Head Office has debited the Branch.

In such circumstances, an adjusting entry is made in the books of the Head Office as under:

## JOURNAL ENTRY FOR GOODS IN TRANSIT

Date	Particulars	· · ·	L	.F. Debit	Credit Amount
				Rs.	Rs.
	Goods in transit A/c To Branch A/c		Dr.	•	
·	(Being the value of goo branch on (date) them on(date of	, but cre	edited by		

The balance of the 'Branch Account' in the Head Office books will now tally with the balance of the 'Head Office Account' in the Branch books.

The 'Goods in transit' account is shown as an Asset in the Head Office Balance Sheet.

The amount of 'Goods in transit' account is transferred to the branch account at the commencement of the next period, by passing reverse entry, i.e., 'the Branch' account is debited and 'Goods in transit' account is credited.

## Goods on Consignment

entry by the branch)

When goods are sent to the consignee, it is not treated as sales and as such 'consignee' is not treated as Debtor. Hence on sending the goods, no sales account is credited, but the amount is credited to Goods sent on consignment account, as shown hereunder:

#### JOURNAL ENTRY

Date	Particulars	LF.	Debit Amount	Credit Amount
	Consignment A/c Dr. To Goods sent on consignment A/c		Rs.	Rs.
	(Being Goods sent to(consignee) to be sold on our account)			

The balance in Goods sent on consignment account is transferred to Purchases Account in case of trading concerns and to Trading Account in case of manufacturing concerns, i.e. Goods sent on Consignment Account is debited and Purchases/Trading Account (as the case may be) is credited.

Problem 6. What adjustment entries are passed when the goods are consigned at invoice price, which is higher than the cost price ?

Solution. Somtimes, the consignor sends to the consignee the pro-forma invoice charging goods at higher price. Such a price is called as 'Invoice price' or 'Selling price'. The difference between the invoice price and the cost price of the good, is known as loading.

In order to ascertain correct profit or loss on consignment, adjustment entries are passed with regard to the following items recorded at the invoice price:

- (1) Consignment Stock at the beginning:
  - (a) Entering in the consignment account at invoice price:

    Consignment A/c

    Dr.

To Consignment Stock A/c

(b) To remove loading from the opening stock:

Stock Suspense A/c Dr.

To Consignment A/c

- (2) Goods sent on Consignment:
  - (a) On goods being sent at invoice price:

Consignment A/c D

To Goods Sent on Consignment A/c

(b) To remove the loading from the goods sent on consignment:

Goods sent on Consignment A/c
To Consignment A/c

- (3) Goods returned by the Consignee:
  - (a) On goods being returned at invoice price:
    Goods sent on Consignment A/c Dr.

To Consignment A/c

(b) To remove the loading in goods returned:

Consignment A/c

Dr.

To Goods sent on Consignment A/c

4) Consignment Stock at the end:

(a) For the value of unsold stock at invoice price:

Stock on Consignment A/c

Dr.

To Consignment A/c

(b) To remove the loading in Closing Stock:

Consignment A/c

Dr.

To Stock Suspense Λ/c

Problem 7. If consignment stock is destroyed or damaged, how is it accounted for ?

Solution. Goods sent on consignment may be lost, destroyed or damaged. The entries to adjust the loss of goods in the books of the Consignor will depend upon the type of loss, which may be either Normal Loss or Abnormal Loss.

(A) Normal Loss. Such a loss is due to the nature of the goods consigned, which may be due to loading and unloading, evaporation, drying, etc. This type of loss is inherent in the goods and is normal.

Such loss is allowed at the time of Stock left insold with the consignee.

Normal loss forms the part of cost, and as such the value of stock on consignment is increased proportionately due to such a loss. The total cost of the goods is considered to be for the quantity sent less the normal loss.

Consignment Stock is valued as under:

Total quantity sent--Normal loss in units

Units of stock on hand

No journal entry is passed for recording Normal Loss of goods.

(B) Abnormal Loss. Such a loss may arise due to mischief, badluck and inefficiency. Loss of goods due to the theft, flood, fire, war, earth-quake, riots, insects, breakage, etc. is of abnormal nature.

Abnormal loss has nothing to do with a particular consignment. It is, therefore, transferred to general Profit & Loss account, so that the profitability of any particular consignment is not affected.

The value of Abnormal Loss is calculated in the same way as the Stock on Consignment, *I.e.*, cost plus proportionate non-recurring expenses.

## Journal Entries for Abnormal Loss:

(1) When the loss occurs:

Abnormal Loss A/c

Problem 9. F. Bros. shipped goods to H. Bros. their agents oo 31st September and sent therewith a proforma invoice for Rs. 9,100 (goods Rs. 9,000, expenses Rs. 100). On 20th October, H Bros. sent an Account Sales, from which it appeared that a portion of the goods had realised Rs. 7,200; and deducting expenses Rs. 180, and commission, Rs. 400, he enclosed a draft at three months for the balance. The stock remaining unsold amounted, at invoice price plus expenses, Rs. 3,600. On 2nd November he sent another account sales, woich showed that the balance of the consignment had realised Rs. 5,700; which, less Rs. 150 expenses and Rs. 200 commission, he remitted by a three months' draft.

Show how the above transactions should appear in the books of F. Bros, as on 31st December.

Problem 13. H. Ltd. forwarded on 1st July 1972, 100 bicycles to B of Bombay at an invoice price of Rs. 200, the cost of each cycle being Rs. 150. It paid Rs. 1,000 for freight and insurance. On receiving the consignment B accepted a draft for 3 months drawn by H for Rs. 10,000. B paid Rs. 400 as rent and Rs. 250 as further expenses. By 31st December 1972 B had disposed of 80 bicycles at Rs. 205 each. B charges 6 per cent as commission.

Show ledger accounts in the books of H. Ltd. who closes its accounts on 31st December.

(I.I.B. Part I, May 1973)

Problem. 14 On Ist September 1974 goods of the value of Rs 1,00,000 were consigned by Mr. Patankar of Bombay to Mr. Mahadev, his Calcutta Agent at pro forma invoice price of 20% profit on cost. Mr. Patankar paid insurance and forwarding charges Rs. 6,000. Mr. Mahadev was allowed Rs. 3,000 per annum towards establishment expenses, 4% commission on gross sales and 4% del-credere commission. Mr. Mahadev paid Rs. 1,100 for Cartage, Rs. 2,000 for Godown rent and Insurance and incurred other Sundry Expenses of Rs. 900 in relation to the consigned goods. 90% of the goods were sold at a profit of 33\frac{1}{3}\% on cost. 5\% of the goods were destroyed by fire. An insurance claim of Rs. 8,000 was received from the Insurance Company by Mr. Mahadev. The balance 5\% of the goods was taken over by Mr. Mahadev at a valuation of Rs. 6,000. The accounts were settled on 31st December, 1974. Show the Consignment Account and Consignee's account in the books of Shri Patankar.

Problem 17. Mr. X of Bombay sent goods on consignment to Mr. Y of Ahmedabad on 30th August 1960. The cost of the goods was Rs. 60,000 but the invoice was made out at cost plus 25%. Mr. X incurred Rs. 5,000 as expenses.

Mr. Y received the goods on 4th September 1980 and immediately sent a promissory note for Rs. 30,000. He had to spend Rs. 6,000 as expenses.

On 31st December 1980 Y sent an account sales showing that 3/4 (three fourth) of the goods has been sold for Rs. 70,000 and 1/4 (one fourth) was still in stock.

Mr. Y is entitled to a commission of 6%. Mr. Y is also entitled to reimbursement of expenses. Along with the Account Sales, the necessary remittance was enclosed. A customer who had purchased goods on credit to the extent of Rs. 5,000 would not pay.

Please show the following accounts in the Book of Mr. X-

- Consignment to Ahmedabad A/c.
- Goods sent on Consignment A/c. (3) Stock on Consignment A/c.
  - (4) Consignment Stock Reserve A/c.

(5) Mr. Y's A/c. (I.I.B. Part I. April 1981)

### Solution:

Dr.

Ledger Accounts in the Books of Mr. X (I) CONSIGNMENT TO AHMEDABAD ACCOUNT

Date	Particulars	Amount	Date	Particulars	Amount

	O To goods sent on consignmedt A/e (Invoice Price) To Cash (expenses) To Y (expenses)	75,000 5,000 6,000	Dec. 31	By Y (Sale proceed of 3/4 of the good By Stock on consignment A/c (1 th of the good	s) 70,000 s
	To Y (Commission @ 6% on Rs. 65,000) [as per working note No.: 2] To Y (Oad debts)	3,900 5,000		at Invoice Price) [ns per working note: 1] By Goods sent on consignment A/c (Difference of	20,000
	To-Consignment stock reserve A/c (Unloading of 25% on east in the aalt of stock) [as per	· 6		Invoice value and cost)	15,000
	working note: 1 To Profit & Loss A	/c 6,350			
		1,05,000			1,05,000

Working Notes:

1. Calculation of stock on consignment	A/c	w .
j. Calculation of the	Rs.	Rs.
Cost of 1/4th of the goods	60,000/4	15,000
Add: 25% Margin of profit (loading)		3,750
Add: 1/4th of the consignor's expenses	5,000/4	1,250
,		20,000
•		====

2. Since sale of Rs. 5,000 has turned out to be a bad debt, no commission is allowed to Y on it. As such commission is calculated on total sales less bad debts i.e. Rs. 70,000—Rs. 5,000 = Rs. 65,000.

The amount of Bad Debts is debited to the consignment account as Del.-credere commission is not allowed.

### JOINT VENTURE ACCOUNTS

Problem 1. Write a short note on Joint Venture.

**-**

(I.I.B. Part I, November 1970)

Or
What is Joint Venture? Describe the various methods for recording

What is Joint Venture? Describe the various methods for recording the transactions on account of a Joint Venture.

Solution. Joint Venture is a temporary partnership between two or more persons who undertake jointly to complete a particular adventure, e.g., Joint Consignment of goods, underwriting of shares or debentures of a new Joint Stock Company, Construction of a Building jointly, purchase and sale of Plots, Cars, etc., and other similar temporary or seasonal business enterprise. The partners to a joint venture are called "Co-venturers", They agree to contribute a specific amount of capital and to share profits or losses in equal proportions or in any other agreed proportion.

Such arrangement may be limited to one transaction or may extend to a number of transactions. It may even be limited by reference to a period of time.

There are four different ways of maintaining the accounts of a Joint Venture:

1. Accounts to be kept by one of the Co-venturers. 3

- 2. Accounts to be kept by all the Co-venturers.
- 3. Accounts to be kept separately by opening a separate Joint Bank Account.
  - 4. Each Co-venturer recording only his own transactions.

First Method. One of the Co-venturers is entrusted the whole of the work of the Joint-Venture. Other Co-venturers contribute their share of investment. The person so appointed is given a commission or remuneration for his work. He keeps the complete accounts of the joint venture and, at the end of the joint venture; a scertains the profit or loss of the venture. The other Co-venturers are paid the amount contributed by them adjusted for their share of the profit or loss.

### ACCOUNTING TREATMENT

Transactions	Account to be Debited-	Account to be Credited
Amount received from other Co-venturers	Cash/Bank	Co-venturers
For purchasing goods for cash For purchasing goods on	Joint Venture	Cash/Bank
credit For supplying goods from his own stock	Joint Venture  Joint Venture	Suppliers
For goods supplied by Coventurers	Joint Venture	Co-venturers
For expenses incurred	Joint Venture	Cash/Bank
For making cash sales	Cash/Bank	Joint Venture
For goods sold on credit	Purchaser's	Joint Venture
For the commission earned by him  For the stock in hand taken over by him	Joint Venture	Commission
For stock taken over by Co-venturers	Co-venturers	Joint Venture  Joint Venture
For the profit on joint venture	Joint Venture	Profit and Loss (his own share Co venturers
For Loss on joint venture	Profit and Loss (his own share) Co-venturers (their shares)	(their shares) Joint Venture
On completion, for remitt- ing the amount due to Co-venturers	Co-venturers	Cash/Bank

Second Method. All the Co-venturers keep the accounts relating to the Joint Venture. Each of them opens the accounts of other Co-venturers and a Joint Venture Account.

### ACCOUNTING TREATMENT

Transactions	Account to be Debited	Account to be Credited
For cash purchase of goods by him	Joint Venture	Cnsh/Bank
For credit purchase of goods by him	Joint Venture	Suppliers
For expenses incurred by him	Joint Venture	Cash/Bank
For goods purchased by other Co-venturers	Joint Venture	Co-venturers
For expenses incurred by Co- venturers	Joint Venture	Co-venturers
For goods sold by bim for cash	Cash/Bank	Joint Venture
For goods sold by him on credit	Purchaser's	Joint Venture
For goods sold by the Co-venturers	Co-venturers	Joint Venture
For profit on Joint Venture	Joint Venture	Profit and Loss (his own share). Co-venturers (their shares)
For loss on Joint Venture	Profit & Loss (his own share) Co-venturers (their shares)	Joint Venture
For the final settlement with the Co-venturers:		
(a) for receiving the amount due from Co-venturers	Cash/Bank	Co-venturers
(b) for remitting the amount due to other Co-venturers	Co-venturers	Cash/Bank

Third Method. The Co-venturers open a Joint Bank Account, by paying their share of investment to this account. All the payments oo account of Joint Venture are made out of the Joint Bank Account.

A separate set of books is maintained for the Joint Venture.

## ACCOUNTING TREATMENT

Transactions	Account to be Debited	Account to be Credited
For amounts contributed		
by the Co-venturers	Joint Bank	Co-venturers
For purchase of goods on cash	Joint Venture	Joint Bank
For purchase of goods on credit	Joint Venture	Suppliers?
For expenses incurred	Joint Venture	Joint Bank
For eash sales proceeds	Joint Bank	Joint Veuture
For credit sales	Purchasers'	Joint Venture
For stock taken over by the Co-venturers	Co-venturers	Joint Venture
If there is profit on Joint Venture	Joint Venture	;
If their is loss on Joint Venture	Co-venturers (in their profit	Co-venturers (in their profit sharing ratio) Joint Venture
For settlement of the account of each Co-venturer, i.e., for making payment of the amount due to them	sharing ratio)  Co-venturers	Joint Bank

Note: When the accounts of the Co-venturers are settled, no balance is left in the Joint Bank Account.

Fourth Method. Each Co-venturer keeps a record of the transactions relating to him. He keeps a Joint Venture account, to which the amounts contributed by him to the Joint Venture or received on its account are debited or credited.

On completion of the Joint Venture, a Memorandum Joint Venture Account is made in which the amounts received or paid by each of the Co-venturer are included. This account shows the collective result of the income or expenditure relating to the Joint Venture. The balance of this account will represent the amount of profit or loss on the Joint Venture.

After ascertaining the profit or less on the Joint Venture, each of the Co-venturer records his share of profit or less in the Joint Venture account maintained by him.

Once this is done, the Joint Venture accounts in the books of each of the Co-venturer will show equal and opposite balances, ie., the total of the credit balances will be equal to the total of the debit balances.

#### ACCOUNTING TREATMENT

Transactions	Account to be Debited	Account to be Credited
For goods purchased by him	Joint Vecture	Cash/Bank/ Suppliers'
For expenses incurred by him	Joint Venture	Cash/Bank
For goods sold by him	Cash/Bank/ Purchasers*	Joint Venture
For his share of profit (as arrived at from Memorandum Joint Venture Account)	Joint Venture	Profit & Loss
For his share of loss (as arrived at from Memorandum Joint Venture Account)	Profit & Loss	Joint Venture
For settlement with Co-venturers:		•
(i) Amount payable	Joint Venture	Co-venturers
(II) Amount receivable	Co-venturers	Joint Venture

Notes. 1. All the Co-venturers will prepare Memorandum Joint. Venture Account with them separately after receiving details from other Co-venturers. This account does not form part of the Double Entry System. It is a nominal account disclosing profit or loss of the entire Joint Venture.

 Under this method, Joint Vecture Account is treated as a personal account, indicating the amount due from, or due to other Co-venturers.

Problem 2. A and B bought a collection of stamps on joint accouot. It was agreed that A should finance the traosaction and should receive at 74% per annum interest on the sum provided from the date of purchase to the date he received his share of the proceeds, and B should self the collection and should receive 5% on the amount realised. Any amount remaining thereafter be shared 'equally. B was to bear any expenses maid by him.

The collection was bought on 1st March for a sum of Rs. 2,000, A borrowing the amount from a friend at 6% per annum. Two months later B sold the same for Rs. 2 500. The expenses of sale came to Rs. 50. He cabled the appropriate amount to A, who immediately repaid the loan.

You are required to show how the transactions should be dealt with in A's ledger.

**Problem 5.** A B & Co. bought goods of the value of Rs. 10,000 and sent the same to X Y & Co., to be sold by them on a joint venture, profits bring divided into 2/3rds and 1/3rds. They also paid Rs. 500 for freight, insurance and cartage and drew on X Y & Co. for Rs. 3,000 en account. The bill was discounted by A B & Co. for Rs. 2,920.

XY & Co. paid Rs. 500 for dock dues, storage rent, etc. The sales realised Rs. 15,000 and sales expenses Rs. 250 were defrayed by XY & Co.

Cr.

X Y & Co. forwarded a sight draft for the balance due to A B & Co. after charging their sales commission at 5% on gross proceeds.

Show ledger accounts in the books of both the parties.

Problem 7. Mr. Vishwanath of Bangalore and Mr. Patil of Bonday decided to enter into a joint-venture sharing profit and loss in the ratio of 3: 2. Accordingly Mr. Vishwanath purchased 1,000 metres of Mysore silk at Rs. 24 per metre and sent it to Mr. Patil for being sold at Bombay with freight 'topay' of Rs. 500, after spending Rs. 350 towards packing and forwarding. Mr. Patil cleared the goods and incurred a sum of Rs. 150 towards local carting, coolie charges. Mr. Patil sold 900 metres at Rs. 30 per metre after incurring selling expenses of Rs. 253. Mr. Vishwanath drew a Bill for Rs. 24,000 with 3 months usance which Mr. Patil returned back duly accepted. Mr. Vishwanath discounted the same with his bank. (Discount charges: Rs. 960).

Mr. Vishwanath took over the remaining stocks at cost plus 10% (Ignore expenses on rebooking of stocks to Bangalore).

Mr. Vishwanath is also entitled to commission of 5 % on sales. Show the Joint Venture Account.

(I I.B. Part I. November 1982)

				=====

Expenses on re-booking of stocks to Bangalore ignored.

**Problem 8.** X and Y purchased a building for a sum of Rs. 45,000 as joint investment. X and Y brought in Rs. 10,000 and Rs. 5,800 respectively as capital. The Building was mortgaged for Rs. 30,000 bearing interest at 6% from 1st January 1966 *i.e.*, the date on which the purchase was completed.

X agreed to collect rents for which he was to be paid 2% on gross rent.

For the year ending 31st December 1966 he collected Rs. 6,200 towards rent.

The following outgoings were incurred by X:

Ground rent Rs. 500; Electric light charges Rs. 832; Repairs Rs. 480 and Expenses Rs. 1,600.

Y is to be charged with Rs. 1,200 for premises occupied by him. He also paid Rs. 160 for repairs.

Prepare accounts showing these transactions and the division of the balance of the revenue account.

X]and Y agreed to divide the profits equally.

Problem 9. A of Ahmedabad and B of Bombay enter into a joint venture to consign 100 bales to C at Calcutta, to be sold on their joint risk. They agree to share profits or losses equally.

A sends 50 bales at Rs. 1,200 cach. He pays freight and expenses Rs. 1,200. B sends 50 bales at Rs. 1,100 cach. His freight and other charges come to Rs. 900.

All the bales reached Calcutta in time. However, 5 bales were found to have been tempered with during transit. A recovered Rs. 3,000 from the insurance company. C sold the remaining bales for Rs. 1,35,000. He charged 3% as selling commission and deducted Rs. 1,500 towards expenses.

He remitted the balance amount to A by D/D on State Bank of India payable at Ahmedabad.

Prepare a joint venture account Also account of A in B's books and B's account in A's books.

Problem 10. Kantilal and Mohanlal were partners in a joint venture sharing profits and losses in the ratio of 3: 2.

Kantilal purchased goods worth Rs. 30,000 and sent them to Mohan Lal and spent Rs. 2,400 in the process. Mohanlal reported after time that he had sold goods for Rs. 32,000 and that the remaining goods cannot be sold by him.

They decided to entrust the sale of these goods on consignment basis to Shantilal who agreed to sell the goods on their behalf. He was to be paid all expenses and 5% commission on the sales.

After some time Shantilal sent an Account Sales, along with a cheque of Rs. 3,500 to Mohanlal, after deducting his expenses Rs. 350 and commission. The unsold goods were returned by him to Mohanlal.

Kantilal and Mohanlal decided to close the venture and Mohanlal took over the balance goods at an agreed value of Rs. 2,000.

Mohanlal sent a statement of account according to which he spent Rs. 1,450 on this venture. They also settled their account.

You are required to prepare the relevant accounts of the joint venture in the books of Kantilal and Mohanlal disclosing the profit or loss made on the venture and the final settlement between them.

(I.I.B. Part I, October 1976)

### Solution:

### Working Notes:

The expenses incurred by the consignee Sh. Shantilal and the commission deducted by him from the sales proceeds will not be entered in the Joint Venture Account, because the details of the cost of the goods sent to him are not given. He has remitted the net sale proceeds to Mohan Lal.

Problem 11. X and Y enter into a joint venture to buy and sell timber, sharing profits and losses equally.

Y brought in Rs. 1,50,000 as capital which is to earn interest at 4% per annum. X to get a salary of Rs. 700 per month and Rs. 3,000 for the use of his plant.

X purchased the timber for Rs 52,000. Y provided some plant and machinery for Rs 30,000 and also paid Rs. 2,000 as legal charges.

Y sold the timber for Rs. 3,25,000 on which he is to get 2% as commission and remitted half the proceeds to X.

X paid the following:--

Wages Rs. 80,000; Motor and haulage Rs. 30,000; Repairs and upkeep of plant Rs. 10,000; Sundry expenses Rs. 9,000,

It took 9 months to complete the joint venture. Y took back his plant and machinery at a revalued price of Rs. 18,000. X remitted the balance due to Y.

Problem 14. Varma and Manik, both Building Contractors, undertook a Joint Venture involving the constructing of a school building. The Joint Bank Account was opened in which Varma deposited Rs. 50,000 and Manik deposited Rs. 25,000. The contract amount was Rs. 2,50,000. The result of Joint Venture was to be shared as to Varma 2/3rd and Manik 1/3rd. The details of the transactions were as under:

- (1) Salaries Rs. 8,000.
- (2) Wages paid Rs. 46,000.
- (3) Building materials purchased Rs. 1,10,000.

Materials supplied by Varma Rs. 9,000. (5) Materials supplied by Manik Rs. 8,000.

(6) Architect's fees Rs. 7.000.

Cartage Rs. 12,000. (1)

Concrete mixer plant purchased Rs. 25,000. (8)

The stock of the materials on the completion of the contract, valued at Rs, 11,000 was taken over by Varma. Concrete mixer plant was sold out for Rs 20,000. Mr. Varma was to be paid Rs. 12,000 per annum against establishment expenses, to be charged to the Joint Venture Account. The contract lasted for 8 months.

Prepare a Joint Venture Account, Joint Bank Account and Accounts of Varma and Manik. III R Part I November 1975

Problem 15. A and B enter into Joint Venture. A agrees to bring capital in cash.

Accordingly, a Joint Banking Account is opened by A for a sum of Rs. 80,000.

B buys goods worth Rs. 50,000 as part of his share of eapital. Further goods worth Rs. 28,000 and Rs. 93,000 were purchased from C paying Rs. 60,000 and the balance by a Promissory Note jointly signed by A and B.

The goods were sent to Calcutta for sale. Expenses totalling to Rs. 5,000 were incurred in sending the goods, Part of the goods was damaged and a sum of Rs, 25,000 was recovered from the Insurance Co. The balance of goods was sold for Rs. 2,20,000.

Prepare Joint Venture Account, Joint Banking Account and accounts of A and B, assuming that the Promissory Note was duly honoured. A and B share profits equally.

Problem 17. Kalyan and Anand enter into a joint venture to share profits and losses equally, resulting from dealings in second hand cars. Both of them take an active part in the business, each recording his own transactions only. They have no joint banking account or separate set of books.

The following are the transactions of the joint venture:

1977

Jan. I Kalyan buys three cars for Rs. 18,000.

,, 31 Kalyan pays for repairs and repairing of cars Rs. 1,200.

Mar. 31 Anand pays garage rent Rs. 400 and advertising expenses. Rs. 200.

Apr. 15 Anand pays for licence, insurance etc. Rs. 720, Aug. 15 Anand buys a car in good conduion for Rs. 2.000.

Aug. 31 Kalvan sells these four cars for a total sum of Rs. 32,000.

Show the Joint Venture account in the books of Kalyan.

### C ACCOUNTS CURRENT

Problem 1. What do you understand by an Account Current? Explain the various methods for calculating interest in an Account Current.

Solution An Account Current is an account of the transactions between two parties during a particular period in which interest is calculated at an every farte on each item and is shown in the account.

In the heading of the Account Current, the name of the party to whom it is sent, is shown first, then comes the words 'in Account Current with' and then the name of the sender is given. Thus, if A sends the eccount current to B, the heading of the account will be 'B in Account Current with A'.

### AVERAGE DUE DATE

Problem 1. What do you mean by Average due date? How it is calculated ?

Solution. When a person owes a number of dehts to another person due on different dates, he should make the payment of these debts on the respective due dates Sometimes they decide to settle these debts in a lump sum on one particular date when neither party suffer any loss of interest due to such single payment. Such a date is known as Average Due Date, which is calculated in the following manner,

(a) Take one of the due dates as the base date, preferably to take

the due date of first transaction.

(b) Calculate the number of days from the base date to the due date of each transaction.

(c) Multiply the number of days so calculated by the corresponding

amount of transaction.

(d) Total the amounts of transactions and the amount of the

products senarately.

(e) Divide the total of the products by the total amount of all transaction. This gives the number of days the average due date is away from the base date.

(f) Add the number of days to the base date and thus arrive at the

average due date.

In case the amount due is not settled on the average due date, but on a subsequent date, interest will he calculated on the total sum from the average due date to the date of settlement.

### Caleniation of Interest

against due date to make a data when there is no loss to both the and is no loss to both the

Firstly number of days are calculated from the average due date to the date of payment and then interest is calculated on the amount due for the said period at the agreed rate of interest.

Problem 2. X and Y have the following transactions during the half year ended 30th June 1981 :

1981		Rs.
January 17	X sells goods to Y	750
January 12	Y sells goods to X	1,000
January 18	1 sens goods to A	
February R	X accepts Y's draft at 2 months	600
		350
March 4	X pays cash	
April 26	Y sends his acceptance at one month	1,000
		800
May 3	X sells goods to Y	
	X pays cash	700
June 30	settlement made.	

Interest is to be charged at 9% per annum. Find out-(1) The average due date and

(I I B. Part I, Nov. 1981) (2) Calculate interest.

Interest will be calculated from 3rd, April 1981 to 30 June 1981, i.e. for 68 days. =Jan. 12, 1981+100.54 days (say 101 days)

Interest =  $\frac{68}{365} \times \frac{9}{100} \times \frac{Rs. 1,200}{1}$ 

### INVESTMENT AND SHARE TRANSACTIONS

Problem 1. Is it necessary to keep Investment Accounts separately in the husiness? Explain briefly the accounting treatment for recording Sale and Purchase transactions of Investment.

Solution. When a business concern invests its surplus funds in Government securities, Shates, or Debentures of companies, it is desirable to keep separate account for each such Security/Investment so that the correct profit or loss on their purchase or sale transactioos cao be ascertained.

The investment and share transactions are separated from other type of business transactions, because of the following peculiarities in such transactions.

- (1) The face value of most of the investments is generally different from their market value (Real price). If there is more demand, they are sold for a price, which is higher than their face value; and if the demand is less, they are sold at a lesser price than their face value.
- (2) Dividend or interest is paid by the companies or Government to one and only one party, i.e., the party whose name appears to the register of members.
- (3) Dividend or interest is paid for a full period, say, yearly or half yearly.

If the investments or shares are sold or purchased on the date when the interest or dividend is payable, the transactions become easier because there is no dispute over interest or dividend, and the price paid or received is the real price, including brokerage, stamp, duty, transfer fees, etc.

However, if such a security is purchased or sold on a day other than the date of declaration of interest or dividend by the Goveromeot or the company, then a problem of settlement of interest or dividend between the huyer and the seller is posed. Any price paid by the purchaser to the seller is affected by the interest/dividend, and hence is not the real price of the security. This price is called either cum-interest (cum-dividend) price or ex-interest (ex-dividend) price.

or puchased on ony date other than the date of declaration of interest/dividend, and it is agreed that the right of receiving the next interest/dividend for the full period shall lie with the buyer, then the price quoted will be the actual price for the security plus interest dividend for the period for which the seller kept the security with him. iThis price is called cum-interest/cum-dividend price.

Ex-interest (ex-dividend) price. When the security is sold or purchased on any date other than the date of declaration of interest?

dividend, and it is decided that next interest/dividend for the full period is to be received by the seller (even after sale of security) then the price quoted will be the actual price for security less interest/dividend for the period from the date of sale to the date of next declaration of interest/dividend (i.e., for the forthcoming period, for which actually the buyer is entitled). This price is called ex-interest/ex-dividend price,

# Ruling:

Investment accounts are ruled in such a manner, so as to exhibit not only their purchase and sale values (cost) but also their face values, and interest/dividend.

### INVESTMENT ACCOUNT

for the.....(Period) ended.....(date)

Cr. Dr.Date Particulars Face Cost Interest/ Date Particulars Face Cost Interest/ Dividend Dividend

Value Value Rs. Rs. Rs. Rs. Rs. Rs.

# Workings

- (a) Calculate total cum-interest (cum-dividend) or ex-interest ex-dividend) price.
- (b) Calculate interest or dividend for past period in cum-interest (cum-dividend) price, or calculate interest or dividend for future period in ex-interest (ex-dividend) price.
- (c) Calculate real price, by deducting interest (or dividend) of the past period from cum-interest (cum-dividend) price or by adding interest (or dividend) of the future period to ex-interest (ex-dividend) price.

Dr.

# Accounting Treatment

(1) (a) For purchasing investments shares:

	Bank or Buyer's A/c Dr.
	To Investments A/c
	To Interest/Dividend A/c [Being sale of investments at (price)

(c) For selling investments or shares at exinterest (ex-dividend) price: Bank or Buyer's A/c Dr. À. Interest/Dividend A/c Dr. To Investments A/c [Being sale of investments at....(price) ex-interest (ex-dividend)] For receipt of interest/dividend in case (IV) of ex-interest (ex-dividend) Dr. Bank A/c To Interest/Dividend A/c [Being interest for.....(period) received?

At the end of the accounting period, or when all the investments are sold, whichever is earlier, the balance of interest or dividend columns is transferred to the Profit and Loss account. Any profit or loss on sale of investments is also transferred to the Profit and Loss account. 'Face value' and 'Cost' columns in the investment account are balanced like other real accounts, and the balance is carried forward to the next period.

**Problem 2.** From the following particulars prepare an Investment Account for the year ended 31st December 1970. (Ignore Income Tax).

Balance of 3% Govt. Promissory Notes 1986 as on 1st Jan. 1970, Rs. 1,00,000.

The cost of the these notes was Rs. 76,000. Interest on the same was last received upto 15th September, 1969. On 1st April 1970 further securities worth Rs. 30,000 were purchased for Rs. 18,000. On 16th September 1970, Rs. 20,000 worth of securities were sold for Rs. 11,600. The brokers charge brokerage at 25 paise on Rs. 100 whilst buying and selling.

Interest is receivable on 15th March and 15th September.
(I.I.B.! Part I, October 1971)

(I) Loss on Sale of Debentures :

It is assumed that the Debentures sold are from the lot of the Debentures held on 1st January. Therefore, the cost of the Debentures of the face value of Rs. 8,000 (Rs. 4,000+4,000) is Rs. 7,233 30,000

There Debeniures were sold for Rs. 7,610 (Rs. 3,760+3,850) as shown in the Investment Account. Hence, there is a loss of Rs. 123 (Rs. 7,733-7,610).

- Debentures of the face value of Rs. 22,000 out of the opening balance at a cost of Rs. 21,267 (Rs. 29,000-(II) Balance of Debentures:
- Debeniures of the face value of Rs. 5,000 purchased on 1st April, at a cost of Rs. 4,850, and Debeniures of the face value of Rs. 6,000 purchased on 1st December, at a cost of Rs. 5,730.
- Thus the face value of Debentures is Rs. 33,000 (Rs. 22,000 +5,000+6,000) and the cost of Debentures is Rs. 31,847 (Rs. 21,267+4,850+5,730).

# SIMPLE PARTNERSHIP ACCOUNTS

Problem 1. Write a short note on Partnership.

(I.I.B. Part I, November 1970)

Or -

Define Partnership? What are its main features?

Solution. According to the Indian Partnership Act, 1932 "Partnership is a relation between persons who have agreed to share the profits (including negative profits, i.e., losses) of a business carried on by all or any one of them acting for all."

Such persons are individually known as 'Partners' and the name of the business is called the 'Firm'.

The important features of a partnership are the following:

- 1. There must be at least two persons to form a partnership. The maximum number is 10 in a banking business and 20 in any other business.
- 2. There must be an agreement among the partners, which may either be oral or in writing.
- 3. The partners must share the profits and losses of the business. Any agreement for charitable purposes cannot be a partnership.
  - There must be a lawful business.
- The business must be carried on by all the partners or any one of them acting for all.

Problem 2. In the absence of any Partnership Deed, what are the rules relating to:

(i) Salaries of partners: (ii) Interest on partners' loan: (iii) Interest on capital:

(iv) Interest on partners' drawings:

(v) Division of profits and losses.

Solution. Generally, partners agree among themselves as regards the terms and conditions on which the business of the firm will be carried on. The document in which terms and conditions as above are given, is known as 'Partnership Deed'.

In the absence of an agreement of partnership or of a provision

indicating a contrary intention, the provisions of law following would be applicable:

- (i) Salaries of Partners: Partners are not entitled for any salary or other remuneration
- (ii) Interest on Partners' loan: On any loao (apart from capital) advanced by a partner to the firm, he is entitled to interest on the same at 6% per annum.
- (iii) Interest on Partners' eapital: Partners are not entitled for interest on their capital balances.
- (iv) Interest on Partners' drawings: No interest is to be charged on partners' drawings.
- (v) Division of profits and losses: Every partner shall share profits and losses of the business equally.

Problem 3. What do fixed ond fluctuating capital mean?

Solution. In partnership, there will be as many capital accounts os the number of partners.

Partner's capital is the amount invested or contributed (whether in eash or in kind or in both) by the partners in the business. Whooever a partner contributes towards bis capital, cash or property account is debited and the capital account of that partner is credited.

Copital occounts of the partners may be fixed or fluctuating.

In case of fixed capital accounts, the original capital invested by the partners remains unaltered unless additional capital is invested or the capital is withdrawn by mutual agreement. Another account called either drawings or current account will appear side by side with capital account for each partner. All the adjustments with regard to drawings, interest on capital, interest on drawings, salary to partners, profit or loss, etc., ore made in the current or drawings account.

		<b>m</b> == ==	:		=====

In the case of fluctuating capital a counts, all transactions relating to the amount of capital contributed, drawings, interest on capital and drawings, salary or commission, share of profit or loss are passed through the capital accounts of the partners. Hence the balance of this account will fluctuate from period to period.

# PARTNERS' (FLUCTUATING) CAPITAL ACCOUNT

	o Cash/Goods (drawings) o Interest on	:· .	M D By Cash/Assets (contributed)	
To	Interest on			
	drawings		By Interest on capital	,
	Profit & loss a/c (share in net loss) Balance c/d	. •	By Salary/Commission By Profit & loss A/c (share in net profit)	,

Problem 4. Explain the circumstances under which it becomes necessary to open a Profit and Loss Adjustment Account, and how this account is closed?

Solution. Sometimes, after the accounts for the year have been made up, certain transactions may come to light which were left out by mistake, such as interest on capital, interest on drawings, partners' salary/commission, interest on partners' loan etc. Therefore, to arrive at the true and fair profit or loss before its division, the above mentioned adjustments are carried out in Profit and Loss Adjustment Account in the following manner:

# PROFIT AND LOSS ADJUSTMENT ACCOUNT for the year ended.....

Dr. Cr. Particulars Amount Particulars 1 4 1 Amount Rs. Rs. To Profit & loss A/c* By Profit and loss afc* (for net loss h/d) (for oet profit b/d) By Interest on drawings To Interest on capital of the partners of the partners; By Balance transferred to To Partners' salary/ partner's capital/ commission current A/c* To interest on partners' (if there is loss) loan To Balance transferred to partners' capital/current (if there is profit)

There can be either profit or loss and not the both.

Problem 5. A and B commenced business in partnership on 1st January, 1975 No partnership agreement was made either oral or written. They contributed Rs. 40,000 and Rs. 10,000 respectively as conital. In addition A also advanced Rs. 20,000 on 1st July 1975. A met with an accident on 1st April 1975 and could not altend to the partnership business upto 30th June, 1975. The profits for the year ended on 31st December, 1975 amounted to Rs. 20,600.

Disputes have arisen between them for sharing the profits.

### A Claims:

- (1) He should be given interest at 10% p.a. on capital and loan.
- (2) Profits should be distributed in proportion of capital.

### B Claims:

- (1) Net profits should be shared equally.
- (2) He should be allowed temuneration of Rs. 1,000 p.m. during the period of A's illness.

(3) Interest on capital and loan should be given only at 6% p.a, You are required to settle the dispute between them and distribut the profits, according to law. State reasons for your answer.

(I I.B. Part I, October 1976

(

### Solution:

In order to avoid disputes and legal proceedings in the course of business and to run the firm smoothly and effectively, the partner enter into an agreement written and signed by all of them. Althoug this agreement may be verbal as well as implied by the acts of the partners.

In the absence of an agreement, the following rules are applicab by law:

- (1) A partner is not allowed any salary or remuneration
- (2) Every partner will share profits and losses equally
- (3) No partner is allowed any interest on capital.
- (4) No interest is to be charged on drawings.
- (5) Interest @ 6% p.a. is allowed on loans advanced by partners. Under these circumstances, both the claims of A will be rejected.

B's claim No. (1) is in accordance with law and will be accepted. B's claim No. (2) will be rejected.

B's claim No. (3) will be accepted with regard to the payment interest on loan to A @ 6% p.a. Interest on capital will not given.

## Distribution on Profit:

Dr.

# PROFIT & LOSS ADJUSTMENT ACCOUNT for the year ended 31st December 1975

Particulars	Details	Amount	Particulars	Details	Amoi
	Rs.	Rs.		Rs.	Rs.
To interest on A's loan @ 6% p.a. for a period of 6 months from 1-7-1975 to 31-12-1975 on Rs. 20,000		600	By Balance	b/d	50,6
To Balance c/d to partner's capitals	•				
A $(\frac{1}{2}$ share)	25,000				
B (½ share)	25,000	•		•	
-	Sharet Street and Address	50,000		:	. •
		50,600			50,60

Problem 6. A, B and C are trading in partnership sharing profits and coodwill in the proportion of 5:4:3. There is no goodwill account in the books of the firm.

As and from January 1st 1975 it was agreed that A should give only part time to the husiness and that in consequence he should receive in future only one half of his previous share, the remaining half heing divided equally between B and C. At the same time B and C were to acquire equally between them one half of A's share of goodwill. The goodwill is to be valued for these purposes at Rs. 96,000.

Show the new shares of the partners and pass journal entry for the purchases of goodwill.

(11 B, Part I, May 1975)

### Salution

**Problem 7.** On 31st December 1966, three partners had the following amounts at the credit of their capital accounts: A Rs. 5,000; B Rs. 3,000; and C Rs. 2,000.

On 1st January 1967, they had to the credit of their Drawings accounts: A Rs. 750: B Rs. 500 and C Rs. 400.

Profits are divided in the same proportions as the capital upto Rs. 2,000. Above that amount A gets 25 per cent; B 35 per cent; and C 40 per cent.

A drew during the year 1967 Rs. 500; B drew Rs. 400 and C drew Rs. 300.

The profits for 1967 amounted to Rs. 3,000.

Give the Drawing account of each partner on 31st December 1967.

(I.B. Part I, October 1968)

**Problem 8.** X, Y and Z are in partnership, sharing profits and losses equally. Their capitals are X Rs. 6,000; Y Rs. 4,000 and Z Rs. 3,000. The capital is entitled to interest at 5% p.a.

The profit for the year ended 31st December, 1967 was Rs. 10,000 before taking into consideration the following:

- (a) The year's interest on the fixed capital due to the partners.
- Goods of the cost price of Rs. 500 taken by X for his personal use.
- (c) An amount of Rs. 500 included in the wages account representing wages paid in respect of time spent in repairing the firm's own machinery.

Pass journal entries to record the above and show the division of Profit. (I.I.B. Part I, October 1968)

# Solution:

 $\boldsymbol{Z}$ 

Rs. 3,283·34

from the firm and are to be subjected to interest at an average rate of 6% per annum. beginning of the year are to be allowed interest at an average rate of 5% per annum.

The capitals of the partners as at the beginning of the year were:

A, Rs. 80,000; B, Rs. 60,000; and C, Rs. 40,000.

NIS

The credit balances of their current accounts were : A, Rs. 2, 164; B, Re. 3,728; and C, Rs. 1,152.

Their drawings during the year were :

A, Rs. 10,000; B, Rs. 12,000; and C, Rs. 5,000.

The profits for the year were Rs. 30,096, before making any adjustments for interest as above. Draw up the capital and current accounts of the partners.

(1.1.B. Part I, November 1966)

Solution.

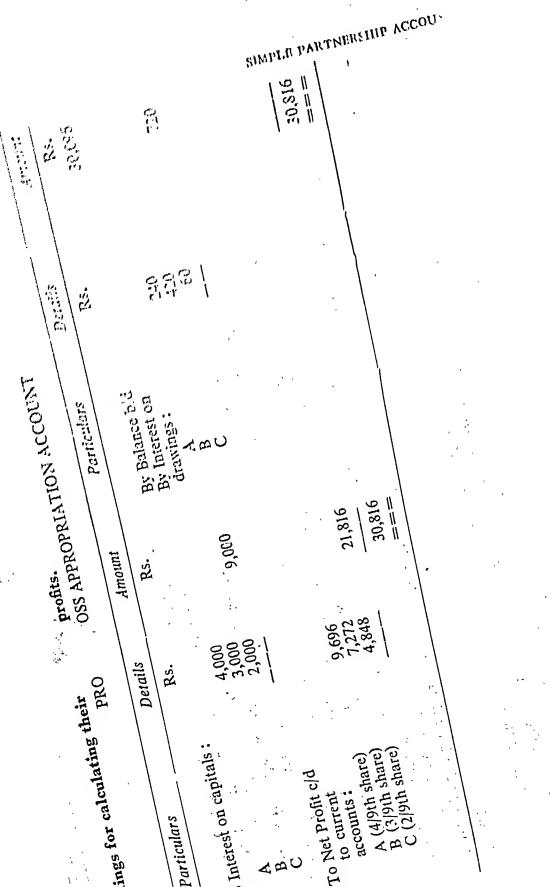

Workings for Calculating Interest on Drawings :

A's drawings for the period are Rs. 10,000, while he is entitled for withdrawing only Rs. 6,000 out of the anticipated share of profits. Therefore, interest on drawings will be charged @ 6% p.a. on the excess amount of Rs. 4,000. This amounts to Rs. 240. B's drawings for the period are Rs 12,000, while he is entitled for withdrawing only Rs. 5,000 out of the anticipated share of profits. Therefore, interest on drawings will be charged @ 6% p.a. on the excess amount of Rs. 7,000. This amounts to Rs. 420.

C's drawings for the period are Rs. 5,000, while he is entated for withdrawing only Rs. 4,000 out of the anticipated thate of profits. Therefore, interest on drawings will be charged @ 6% p.a. on the excess amount of Rs. 1,000. This amounts to Rs. 60.

To A @ 5% p.a. on Rs. 80,000, i.e., Rs. 4,000. To B @ 5% p.a. on Rs. 60,000, I.c., Rs. 3,000. Workings for calculating interest on capitals :

) 5% p a. on Rs. 40,000, i e., Rs. 2.1CC.

Problem 10. The capital accounts of P, Q and R stood at Rs 10,000; Rs 7 500 and Rs. 5,000 respectively after the necessary adjustments in respect of the drawings and the net profit for the year ended 31st December 1964. It was subsequently ascertained that 5% interest on capital and on the drawings of each partner had been omitted. The drawings of the partners had been P—Rs. 1,000, Q—Rs. 750 and R—Rs. 600. The interest on these amounted to Rs. 20; Rs. 15; and Rs. 7.50 respectively. The profit for the year as already adjusted amounts to Rs. 5,000. The partners share profits in proportion of 2/5th, 2/5th and 1/5th.

Give the adjusted capital accounts of the partners together with the Journal entries necessary for such adjustments.

(I.I.B. Part I. February 1966)

#### Solution:

## Workings for calculation of opening capital:

The partners have fluctuating capital accounts. Therefore, to calculate interest thereon, it is necessray to know the amount of opening capitals.

Problem 11. Rich, Middle and Poor are in partnership trading as RMP Enterprises, sharing profits and losses in the ratio of 2:2:1 respectively. Interest is charged on partners' drawings at the rate of 5% parannum and credited on partners' capital account balances at the rate of 5% per annum.

Middle is the firm's sales manager and for his services he is credited with a salary of Rs. 24,000 per annum.

During the year ended 31st August 1977, the net profit of the firm was Rs. 1,86,000 and the partners drawings were:—

Rich Rs. 36,000 Middle Rs. 24,000 Poor Rs. 24,000

In each case, the above sums are withdrawn in two equal instal ments on 28th February 1977 and 31st August 1977.

On 28th February 1977, the firm agreed that Rich should withdraw Rs. 30,000 from his capital account and that Poor should subscribe a similar amount to his capital account.

The credit balances of the partners' accounts as on 1st September 1976 were as under:

Capital Accounts Current Accounts

Current Accou	å
Rs.	
19,200	
16,800	
14,400	
	16,800

You are required to:

- (1) Prepare Profit and loss appropriation account for the year ended on 3 ist August, 1977.
- (2) Prepare the Partners' capital and current accounts for the year ended 31st August, 1977.

(I.I.B. Part 1, November 1977)

## Solution: Workings for calculation of interests on capital of partners

Name of the Partners	e <u>Pe</u>	To .	fonths	Capital Amount	Interest @ 5%	Total Interest
				Rs.	Rs.	Rs.
Rich	1-9-76 1-3-77	28· 2-77 31· 8-77	6	2,40,000 2,10,000	6,000 5,250	11,250
Middle	1-9-76	31-8-77	12	2,10,000	10,500	10,500
Poor	1-9-76 1-3-77	28-2-77 31-8 77	6 6	1,80,000 2,10,000	4,500 5,250	9,750

## Workings for calculation of Interest on partner's drawings:

- 1. The second instalment of drawings is withdrawn on 31-8-1977, i.e., the last day of closing the accounts. Therefore, no interest will be charged on this instalment.
- 2. Interest on drawings amounting to Rs. 18,000 and Rs. 12,000 @ 5% p.a. for the period 28-2-1977 to 31-8-1977, i.e., for 6 months will be charged only from Rich and Poor respectively, which is as under:

Rich: Rs. 
$$\frac{18,000 \times 5 \times 6}{100 \times 12}$$
 = Rs. 450

Poor: Rs. 
$$\frac{12,000 \times 5 \times 6}{110 \times 12}$$
 = Rs. 300

3. Interest on drawings will not be charged from Middle, because his drawings are equal to the amount of salary credited to his account.

# PROFIT AND LOSS APPROPRIATION ACCOUNT OF RMP ENTERPRISES

**Problem 12.** X and Y commenced business on 1st Je They prepared the following balance sheet as on 30th Septile. for a period of 9 months:

Liabilities	Deta	rils	Amount	Assets		
	Rs.	Rs.	Rs.	<b>D</b> 1 1 1		
Capital Accounts: Cash brought in	X 2,000	Y 2,000		Plant and machinery Bicycle		
Add: Profit for the period	1,500	1,500		Stock on hand Book debts		
Less: Drawings	3,500 2,500	3,500 1,500		Payments in advance Cash in hand		
	1,000	2,000	3,000	Cash in hand		
Creditors		, ,	1,500	•		
Loan			3,000			
Bank overdraft			5,000			
			12,500			

However, later on the following facts were disclosed:

- (1) Stock on hand (Rs. 2,000) included raw material. Rs. 300 which were on approval only and had not been recthe books.
- (2) Book debts amounting to Rs. 500 were considered irrecoverable and others totalling to Rs. 250 doubtful.
- (3) Plant and machinery (Rs. 5,000) had been purch 1st March 1969 was taken at cost. It was agreed that depreci provided at 10% per annum.
- (4) Goods costing Rs. 100 was given to Y had not been ret the books of accounts.
- (5) No provision for an unexpired portion of an ir premium of Rs. 400 paid for the year ended 31st March 1970 lb. made.
- (6) Rs. 200 interest on bank overdraft to 30th Septemb had not been taken into account.
- (7) Outstanding rent of Rs. 100 for the month of Septembwas not provided.
- (8) Sundry creditors including Rs. 150 for goods returned the suppliers before 30th September 1969 and for which no adjutave been made.

You are required to prepare :

- (a) a summary of the adjustments to the Profit and loss account for the period, and
- (b) a revised balance sheet as on 30th September 1969,
  (I.B. Part I. May 1970)

their capitals, after charging interest on capital at 5 per cent per annum and a partnership salary of Rs. 3,000 to B. A desires to retire from full active work in the partnership from 1st January 1973. accordingly agreed that-(a) B shall in future be entitled to a partnership salary of Rs. 5,000.

(b) Interest is to be allowed on capital at 5 per cent per annum.

Cr.

- (c) C, a departmental manager, shall be introduced as a partner, without capital, as and from 1st January 1973 with a salary of Rs 7,500 per annum, the excess of over Rs, 4,000 (his previous salary as manager) being chargeable against A and not against the firm's profits before division.
- (d) C shall be also entitled to one-tenth of the profits after charging interest on capital and partnership salaries
- (e) The balance of profits is to be divided as to three-fifths to A and two-fifths to B.

The profits for the year ended 31st December 1973 were Rs. 25,000 before charging interest on capital and Partnership salaries.

You are required to show the division between the partners, assuming that the salaries have been drawn during the year.

Drawings of partners: A Rs. 5,000, B Rs. 3,000, C Rs. 1,000.

(1.1.B. Part I, May 1974)

**Problem 14.** Journalise the following transactions in the books of M/s. Shah Brothers, a partnership firm:

- (a) Nayan and Hiten are partners in the firm sharing profits in the proportion of 2:1. They admit Ronak as partner with 1/4 share in the profits. He brings Rs. 24,000 as his share in the goodwill of the firm. The new profit sharing ratio is Nayan 13/24, Hiten 5/24 and Ronak 1/4. Ronak does not bring any capital.
- (b) They purchased goods from Patel Brothers of the value of Rs. 10,000 at 10% trade discount. They paid for half the amount in ash and for the balance accepted a bill for 2 months. Patel Brothers discounted the Bill with bankers at 10% discount.
- (c) A payment of audit fees Rs. 500 to Mr. Bam, a Chartered accountant, was duly entered in the cash book but was posted on the redit side of Mr. Bam's account as Rs. 5,000. The mistake, if any, is o be rectified. (The difference in trial balance was taken to suspense count).
- (d) They purchased a second-hand motor car from M/s. Metro lotors for Rs. 10,000. In consideration, they gave their old motor ir (book value Rs. 3,000) and Rs. 6,000 cash.
- (e) At the end of the year, the sundry debtors are Rs. 28,500. was decided to write off Rs. 3,500 as bad debts. The firm maintains serve for doubtful debts at 5% of sundry debtors and the reserve is Rs. 4,750 at the beginning of the year.

(I.I.B. Part I, May 1976)

Solution!

In the Books of M/s. Shah Brothers:

#### JOURNAL ENTRIES

SI.	Particulars	L.F.	Debit Amount	Credit Amount
(a)	Bank A/c To Goodwill a/c (Being the sum brought in by Re the incoming partner as his share in the goodwill of the firm)		Rs. 24,000	Rs. 24,000
	Goodwill A/c To Nayan's capital A/c To Nayan's capital a/c (Being goodwill brought in by Ro transferred to old lattners' ca accounts in their sacrificing rati shown below: Sacrificing ratio= Old proportion—new proportion. Nayan's 2/3—13/24=16/24—13/2- = 3/24 Hiten's 1/3—5/24=8/24—5/24 = 3/24 Thus, the old partners are sacrifi in equal proportions. Ronak's share=3/24+3/24=6/24 = 1/4)	pital io as	24,000	12,000
(b)	Purchases A/c To Patel Brothers [Being goods of the total value Rs. 10,000 purchased from f Brothers at a trade discount of 1 e. (Rs. 10,000-Rs. 1,000-Rs. 90 Their invoice for Rs. 9,000 recorde	Patel 10% 100).	9,000	9,000

N. C	Being payment due to M Motors settled by paying Reash and giving them our ar of the book value of R Rs. 4,000)	s. 6,000 in old motor		
( \ !	Old motor car A/c To Profit on sale of old m Being the old motor car o value of Rs. 3,000 dispose orice of Rs. 4,000 to M Motors, i.e., at a profit of R	f the book ed of at a /s. Metro	1,000	1,000
(	Profit on sale of old motor of To Profit & loss a/c Being profit on sale of old transferred to profit and los	motor car	1,000	1,000

(e)	Bad debts A/c To Sundry debtors a/c (Being bad debts written off)	Dr.	3,500	3,500
	Reserve for doubtful debts a/c To Bad debts A/c	Dr.	3,500	3,500
	(Being bad debts adjusted from r for doubtful debts, i.e. from the ing reserve of Rs. 4,750)			·
	Note: The firm maintains reser doubtful debts @ 5%. The debtors are amounting to Rs. 28, Rs. 3,500 for bad debts, Le. 25,000. Therefore, the amou reserve required is Rs. 1,250 (5 Rs. 25,000).	total 500 Rs. nt of		

The Reserve was Rs. 4,750 at the beginning of the year and a sum of Rs. 3,500 has been transferred to bad debts written off during the year. Hence, the reserve as per books stand at Rs. 1,250 (Rs. 4,750—Rs. 3,500)

Therefore, no further provision for reserve for bad and doubtful debts is to be made.

Problem 15. Morari, Charan and Ram are partners in a firm sharing profits and losses in the ratio of 2:1;1. It is agreed that interest on eapital will be allowed at 5% per annum and interest on Drawings will be charged at 4% per annum. (No interest will be charged or allowed on Current Accounts).

The following are the particulars of the Capital, Current and Drawings Accounts of the partners:

		Morari	Charan	Ram	
		Rs.	Rs.	Rs.	
Capital (1st January 1978)		75,000	40,000	30,000	
Current Accounts (1st January	1978)	10,000	5,000	5,000	(Dr.)
Drawings		15,000	10,000	10,000	
Interest on Drawings (1978)		500	190	350	

The final accounts as prepared by Patel, the accountant of the firm, showed a net profit of Rs. 60,000 before taking into account interest on Capital and Drawness and subject to the following a 1 strents:

(a) Life Insurance Premium of Morari's son amounting to Rs. 1,000 paid by the firm on 1st October. 1978 has been charged to Miscellaneous Expenditure Account.

- (b) Repairs to machinery amounting to Rs. 10,000 has been debited to Plant account and depreciation thereon charged at 20%.
- (c) Travelling expenses of Rs. 3,000 of Charan for attending Kisan Sammelan paid by the firm on 30th June, 1978 has been debited to Travelling expenses account.
  - (i) You'are required to prepare Profit and Loss Adjustment Account.
  - (ii) Profit and Loss Appropriation Account.
  - (iii) Current Accounts of the partners for the year 1978.

(I.I.B. Part I, April 1979)

## PARTNERSHIP—FINAL ACCOUNTS

**Problem 1.** Black and White are partners sharing profits in proportion to their capitals. At the close of their financial year on 31st December 1979, the following balances stood to the credit of the partners:

•		Rs.		Rs.
Capital Accounts Current Accounts	Black Black	20,000 1,060	White White	5,000 2,800

The partnership deed provides:

- (a) That White shall be credited with a partnership salary of Rs. 1,000 per annum for managing the business.
- (b) That White shall be entitled to 10 per cent of the net profits after charging his salary, and interest on Capital, Current accounts and Drawings.
- (c) Interest at 5 per cent per annum to be allowed on Capital and Current accounts.

The partner's drawings were Black Rs. 10,000; and White Rs. 3.000, on which the following amounts for interest are to be charged: Black Rs. 330, White Rs. 80.

In addition to the entries necessary to record the above particulars the following balances were extracted from the books of the firm as on 31st December, 1979:

		Rs.
Freehold Premises		15,000
Sundry creditors		24,150
Advertising	<b>&gt;</b> +	4,339
Office salaries		2,189
Sundry debtors		16,020

		450

Cr.

You are required to prepare a Profit & Loss Account for the year ended 31st December 1979, and a Balance Sheet as on that date.

When preparing the above accounts the following matters are to be taken into consideration regarding which no entries had been made in the books:

(a) Depreciation to be provided as follows:
Plant—old halance, 10 per cent per annum;
Plant, additions, 25 per cent;
Office furniture, 10 per cent per annum;

Patents, 10 per cent per annum.

- (b) Motor forries were valued on 31st December 1979 at Rs. 800.
   (c) The provision for Bad Debts is to be made upto 5 per cent on Sundry Debtors.
- (d) Interest on Mortgage has been paid to 30th September 1979.
- (e) The following amounts are to earried forward to next year :
  Insurance Rs. 62: Advertising Rs. 873.
- (f) Office salaries Rs. 69 were owing at 31st December 1979.

  (I.B. Part I. April 1980)

## PARTNERSHIP—ADMISSION

Problem 1. What is goodwill? What are the various methods of valuing goodwill?

Solution. Goodwill, in simple words, means the 'good name' or the 'reputation' of the business which attracts more customers and, therefore, results in earning more profits. Goodwill of a firm enables it to earn profits in excess of the profits earned by the other firms in the same type of business. This excess is called 'Super Profits'. Goodwill really arises only if a firm is able to earn super profits.

The value of goodwill depends mainly on the following factors:

- (a) Earning capacity of the business,
- (b) Results of the operations of a few previous years, and
- (c) The future prospects of the business.

All of these three things depend upon:

- (i) Favourable location or site,
- (ii) Nature of business,
- (iii) Efficiency and personal skill of management,
- (iv) Patents and trade marks possessed,
- (v) Licences and quotas with the business,
- (vi) Possibility of competition,
- (vii) Efficient advertisement, etc.

### Valuation of Goodwill

Goodwill is an intangible asset, but not fictitious. It cannot be seen, but can be sold or purchased. The following methods of valuation of goodwill are generally followed:

1. Average Profits Method. The goodwill is valued at a number of years' purchase of the average past net profits. The number of years, the past net profits of which are deemed to represent the goodwill of the business, is usually settled by taking into consideration the nature of business. For example, if goodwill is to be valued at two years purchase of the average profits for the last five years, the value of goodwill will be calculated as under:

## Total of profits for the last five years $\times 2$

5

This is the most common method.

2. Super Profits Method. Super profits are the excess profits or extra earning capacity of the business as compared to the normal return on the capital invested. Goodwill is calculated by multiplying the super profits by a certain number of years, representing the number of years of purchase. Super profit is ascertained by deducting the normal profit from the actual profits. Normal profit is ascertained

Amount brought in

by multiplying the average capital employed by the rate of profit generally carned by other firms in the same type of business.

3. Capitalization Method. The total value of the business is ascertained on the basis of actual profits, as under:

## Rate of general expectation

Goodwill is ascertained by deducting the value of net tancible assets (i.e., total tangible assets—liabilities to outsiders) from the total value of the husiness.

The necessity of valuing goodwill arises when the partners decide to (a) change profit sharing ratios, (b) to admit a new partner/s, (c) on the retirement or death of a partner, (d) the business is sold or converted into a limited company, (e) two or more firms are amalgamated, or (f) when a firm is dissolved.

Problem 2. Explain the accounting treatment of goodwill on admission of a partner.

Solution. Whenever a person is admitted as a partner into a business, he is ordinarily expected to pay a premium, known as his share of gnodwill, in consideration for acquiring a share in the profits of the firm. It is a way for compensating existing partners for the sacrifice made by them in their profit sharing ratio on the admission of the new partners.

It is treated in the books of accounts in the following ways:

(a) Cash A/c

 When the incoming partner brings his share of goodwill in eash, and the old partners withdraw the same.

#### JOURNAL ENTRIES

Problem 3. Will there be any change in profit-sharing ratio when a partner is admitted? What do you understand by profit sacrificing ratio?

Solution. The profit of the business is usually taken to be 'one' and share of each partner in the profit is called his proportion. For example, where A and B are equal partners, their profit sharing proportions will be 1/2 and 1/2 respectively.

example, where A and B are equal partners, their profit sharing proportions will be 1/2 and 1/2 respectively.

When the division of profit is denoted by integers and not by fractions, this is called ratio. In the above example, the ratio of profit

between A and B is 1:1.

In fact, there is no difference between ratio and proportion from

accounting point of view.

When a partner is admitted, the old partners have to give him a share in the 'one' profit that was being shared by them earlier. Hence, after admission, the old partners will not be left with 'one' profit, but they will have to share in the remaining profit that is left after deducting new partner's share. The old partners have to make sacrifice, if a new

pattner is to get a share in the future profits.

The following cases may arise while calculating new profit sharing

(f) If the new partner's share is given, it is assumed that the old partners will share the remaining profits in the old ratio. For example, where A and B are sharing profits in the ratio of 2:1, and they admit C into partnership giving him a fourth share to future profits, the new profit sharing ratio will be calculated as under.

The total profit=1

ratios :

C takes 1/4th share, thus the remaining profit will be 3/4th.

Now, A and B will share this 3/4th profit in the ratio of 2:1.

t.e., in the proportion of 2/3rd and 1/3rd.

Therefore, A's share will be 2/3rd of 3,4th i.e., 3/6th and

B's share will be 1/3rd of 3/4th i.e. 3 12th.

New proportion of A. B and C will be 3/6th, 3'12th and 1/4th

New Profit sharing ratio among A: B: C will be 6: 3: 3.

(ii) If the new partner purchases his share of profit from old partners in a particular ratio, new profit sharing ratio of old partners will be calculated by deducting the proportion which they have given to the new partner. For example, where A and B are sharing profits in the ratio of 2:1, and it in future profits, I the new

profit sharing ratio

A's share was 2/3rd, out of which he gives 1/8th to C

Hence, A's new share will be 2/3rd-1/8th i.e., 13/24th.

B's share was 1/3rd, out of which he gives 1/8th to C Thus, B's new share will be 1/3rd-1/8th i.e. 5/24th.

New proportion among A, B and C is 13/24, 5/24 and 1/4.

New ratio among A: B: C is 13:5:6.

(iii) If the new partner purchases his share of profit from any one partner, new profit sharing ratio of the partner surrendering his share will be calculated by deducting the proportion, which he has given to the new partner. For example, where A and B are sharing profits in the ratio of 2:1, and they admit C into partnership giving him a fourth share in future profits, which he acquires from A, the new profit sharing ratio will be calculated as under:

A's share was 2/3rd, out of which he gives 1/4th to C

Therefore, A's new share will be 2/3rd-1/4th i.e., 5/12th.

There will be no change in B's share.

New proportion of A, B and C is 5/12th, 1/3rd and 1/4th.

New ratio among A: B: C is 5:4:3

Any difference between the old profit sharing proportion and new proportion is the sacrifice made by the old partners for the sake of new partner/s.

In case (i) sacrificing proportions will be

A's 2/3rd - 3/6th = 1/6th; and B's 1/3rd - 3/12th = 1/12th

Sacrificing ratio in between A and B is 2:1.

In case (ii), sacrificing proportions are given i.e., 1/8th and 1/8th between A and B respectively.

Sacrificing ratio in between A and B is 1:1.

In case (iii), only A has sacrificed 1/4th proportion.

**Problem 4.** Why are assets and liabilities of a firm revalued on the admission of a new partner and how is the result of revaluation dealt with?

Solution. When a new partner takes admission in a firm, he acquires the ownership rights of the assets and also makes himself responsible for the firm's liabilities. It, therefore, becomes necessary to scrutinise the Balance Sheet carefully so that the new partner should not get any benefit from any appreciation in the value of assets or reduction of liabilities, nor should he suffer because of any decrease or depreciation in the value of assets or increase of liabilities. Therefore, on the date of admission, the assets and liabilities of the firm are revalued and whatever the profit or loss arises from such revaluation, that is credited (if profit) or debited (if loss) to old partners' capital accounts in their old profit-sharing ratio. For recording this, a separate account is opened known as 'Profit & Loss Adjustment Account' or more commonly known as 'Revaluation Account'.

## ACCOUNTING ENTRIES FOR REVALUATION OF ASSETS AND LIABILITIES ON ADMISSION OF A NEW PARTNER.

SI.	Particulars	Account to be debited	Account to be credited
2. For d	crease in the value of asset	Asset	Revaluation
	ccrease in the value of asset	Revaluation	Asset
4. For d	crease in the value of liability	Revaluation	Liability
	ecrease in the value of liability	Liability	Revaluation
	stribution of profit on revaluation istribution of loss on revaluation	Revaluation Old Partners	

After the revaluation account is prepared, the assets and liabilities are recorded in this new Balance Sheet at the revaluated figures, unless otherwise stated.

At the time of admission if there is any reserve or reserve fund account, or balance of profit and loss account, they must be transferred to old partner's capital accounts in their old profit-sharing railos.

not to be altered, then the increase or decrease in the values of assets and habilities are not to be altered, then the increase or decrease in the values of assets and liabilities are recorded in the 'Memorandum Revaluation Account'. The balance of this account is transferred to old partners' capital accounts in their old profit sharing ratios. Then the entries made in the 'Memorandum Revaluation Account' are reversed, and the balance is transferred to the capital secounts of all the partners (including the new partners) in their new profit sharing ratios. However, there will be certain changes in the capital accounts of the partners due to such 'Memorandum Revaluation Account'.

Problem 5. Mr. A commenced business with a capital of Rs 2,50,000 on 1st April 1962. During the five years ending 31st March 1967 the following profits and losses were made:

Year Ending	l'articulars	Amount
		Rs.
31st March, 1963	Loss	5,000
31st March, 1964	Profit	13,000
31st March, 1965	Profit	17,000
31st March, 1966	Profit	20,000
31st March, 1967	Profit	25,000

During this period he had drawn Rs. 40,000 for his personal use.

On 1st April, 1967 he admitted B into partnership on the following terms:

P.S.D.K. 7'83-32

B to bring for his half share in the business, capital equal to A's capital as on 31st March 1967 and to pay for one-half share of goodwill of the business, on the basis of three times the average profits of the last five years.

Prepare statement showing what amount B should invest to become a partner.

(I.I.B. Part I, November 1967)

### Solution:

Calculations for the share of goodwill to be brought in by B:

Profits for the last 5 years:

(Rs. 25,000+Rs. 20,000+Rs. 17,000+Rs. 13,000-Rs. 5,000)=Rs. 70,000 Average profit for the last 5 years=Rs.  $\frac{70,000}{5}$ =Rs. 14,000

The goodwill of the firm is thrice the average profits for the last five years.

Hence, total goodwill is Rs.  $14,000 \times 3 = \text{Rs. } 42,000$ .

B is to pay one-half share, i.e. Rs. 21,000 (Rs.  $\frac{42,000}{2}$ ).

## Calculation for the share of capital to be brought in by B:

B is to bring capital equal to A's capital as on 31st March 1967, therefore, it is necessary to calculate A's capital as on that date.

Particulars	Amount
	Rs.
A's capital as on 1st April, 1962	2,50,000
Add: Total of the profits for the last 5 years	70,000
· · · · ·	3,20,000
Less: A's drawings during the last 5 years	40,000
time.	2,80,000
Add: Share of goodwill to be paid by B on 31-3-1967	21,000

Statement showing the amount to be brought in by B to become partner:

Amount for goodwill

Amount for goodwill 21,000
Amount for capital 3.01,000

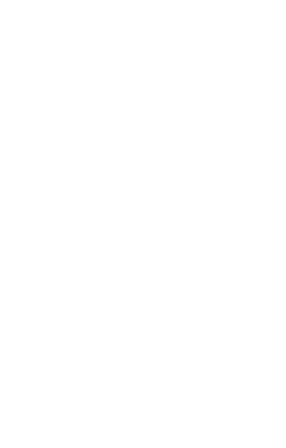

3,0

Total amount to be brought in by him

A's capital as on 31-3-1967

3,22,000

3,01,000

Pass Journal entries and prepare Revaluation Account and a Balance Sheet after giving effect to the above. (I.I.B. Part 1, October 1972)

**Problem 7.** A and B are equal partners and on 30th June, 1970, their Balance Sheet stood as follows:

Liabilities	Amount	Assets	Amount
<del></del>	Rs.	,	Rs.
Sundry creditors Bank overdraft A's capital A/c B's capital A/c	5,000 1,500 2,100 1,600	Stock in trade Sundry debtors Fixtures and fittings Investments Cash in hand	3,500 6,100 250 300 50
	10,200		10,200

It is arranged that C shall be taken into partnership and as a result of the negotiations, it is agreed (as between A and B only) to make the following adjustments in the above balance sheet:

- To write off bad debts amounting to Rs. 1,500.
   To write down the fixtures and fittings to Rs. 100.
- (3) To depreciate the stock-in-trade by 15%.
- (4) To write off loss upon Investments by 25%.
- (5) To create a goodwill of Rs. 1,000.

C introduces Rs. 1,000 as his third share in the capital, to which amount it has been agreed that, that of the others shall be adjusted.

State what entries will be necessary to carry out these transactions and prepare an amended Balance Sheet of the firm immediately after C has become a partner.

(I.I.B. Part I, May 1971)

1	9,500		9,500
	===		===

Note. The changes in the value of the assets is arrived at as follows:

Stock-in-trade t

Rs. 3,500-Rs. 525 (15% depreciation)

≈Rs. 2,975.

Sundry debtors: Rs. 6,100-

Rs. 6,100 -Rs. 1,500 (Bad-debts written off) = Rs. 4,600.

Fixtures & fittings: Rs. 250-Rs. 150=Rs. 100 (amount to be written down to Rs. 100).

Rs. 300-Rs. 75 (25% written off for loss on

Investments:

investments) = Rs. 225.

Cash in hand: no change.

Cash at bank: as shown in working no 3.
Goodwill: Amount of Rs. 1.000 raised.

Problem 8. A and B are partners, sharing profit in the ratio of 2:1 respectively.

On 1st January 1973, they agree to admit C as a partner. C agreeing to contribute Rs. 50,000 as his capital. A, B and C agree to share profits and losses in proportions of A 2'8, B 3-8 and C 3/8.

The Balance Sheet of A and B on 31st December 1972 was as under

under:				
Liabilitles	Details	Amount	Assets	Amount
	Rs.	Rs.		Rs.
A's capital	62,500		Cash at Back	6,250
B's capital	37,500		Stock on hand	50,000

-		=======================================			

**Problem 9.** A, B and C are partners. I hey share the profits in the ratio of 5:3:2 respectively. Their capitals show credit balances of Rs. 59,000; Rs. 45,000 and Rs. 35,000 respectively.

Two new partners D and E are introduced. The profits will now be shared by A, B, C, D and E in the ratio of 3:4:2:2:4.

E is to pay Rs. 12,000 for his share of goodwill plus an extra of s. 25,000 for capital. D has not got sufficient cash to pay immediately, goodwill, though he had agreed to pay on the same basis.

Goodwill account is not to appear in the books of the firm.

You are required to:

- (i) Pass journal entries necessary to record the above transactions.
- (ii) Prepare capital accounts of the partners.

(Show your workings in full).

(I.I.B. Part I, November 1977)

## Workings:

## (1) Calculations for Goodwill:

E, on his admission, with 4/15th share in the profits, brings a sum of Rs. 12,000 towards his share of goodwill, therefore, the goodwill of the firm will be:

Rs. 45,000 (Rs. 
$$\frac{12,000\times15}{4}$$
)

D has agreed to pay for goodwill on the same basis as E has paid. D is getting only 2/15th share in the profits, which is half of the share given to E, therefore, D will be required to pay a sum of Rs. 6,000 towards goodwill.

Hence, the total amount receivable on account of goodwill is Rs. 18,000 (Rs. 12,000 from E+Rs. 6,000 from D).

As Goodwill is a way for compensating existing partners for the sacrifice made by them on the admission of new partners, the amount of Rs. 18,000 will be distributed amongst A, B and C in their sacrificing ratios, viz.:

A=5/10-3/15 
$$\approx \frac{15-6}{30} = \frac{9}{30}$$
 or  $\frac{3}{10}$   
B=3/10-4/15  $\approx \frac{9-8}{30} = \frac{1}{30}$ .  
C=2/10-2/15= $\frac{6-4}{20} \approx \frac{2}{20}$  or  $\frac{1}{15}$ 

Sacrificing ratio among A, B and C will be  $\frac{9:1:2}{30} = 9:1:2$ 

The total sacrifice of A, B and C is equal to the total gaining of D and E

A B C D E  

$$\frac{3}{10} + \frac{1}{30} + \frac{1}{15} = \frac{2}{15} + \frac{4}{15}$$

Thus 12/30 or 6/15 =6'15

Hence, A will get 3/10th of the total goodwill of Rs. 45,000, i.e. Rs. 13,500 (Rs.  $\frac{45,000 \times 3}{10}$ ),

B will get 1/30th of Rs. 45,000, ie. Rs. 1,500, and

C will get 1/15th of Rs. 45,000, t.e. Rs. 3,000.

This total amount of Rs. 18,000 (Rs. 13,500+Rs. 1,500+Rs. 3,000) is the same as payable by D and E.

Amount brought in by E, Rs. 12,000 will be shared as Rs. 9,000 to A, 1,000 to B and 2,000 to C.

Amount payable by D. Rs. 6,000 will be shared as Rs. 4.500 to A. Rs. 500 to B and Rs. 1,000 to C.

**Problem 10.** The following is the Balance Sheet of A and B as at 31st March, 1980. C is admitted as a partner on the date when the position of A & B was an under:

Liabilities	Amount	Assets	Àmount
A—Capital B—Capital Creditors General Reserve Workmen's compensation fund	Rs. 10,000 8,000 12,000 16,000 4,000	Debtors Land & Buildings Plant & Machinery Stock of goods Cash & Bank	Rs. 11,000 8,000 10,000 12,000 9,000
	50,000 ===		50,000

A and B shared profits in proportion of 3:2

The following terms of admission are agreed upon:

(1) Revaluation of assets:

Land & Buildings Rs. 18,000 Stock of goods Rs. 16,000

- (2) The liability on Workmen's compensation fund is determined at Rs. 2,000.
- (3) C brought in as his share of Goodwill Rs. 10,000 in cash.
- (4) C was to bring further cash as would make his capital equal to 20% of the combined capital of partners A and B after the above revaluation and adjustments are carried out.
- (5) The future profit sharing proportions were as under: A-2/5th; B-2/5th; C-1/5th.

Prepare: (a) Revaluation Account.

- (b) Partner's Capital Accounts.
- (c) Balance Sheet of the new firm after the admission of C.

(I.I.B. Part I, April 1980)

Solution: (a) Dr.

## Workings:

(i) A and B were already sharing profits in the proportion of 3/5th and 2/5th. On admission of C their new proportions are A-2/5th, B-2/5th and C-1/5th. Thus whole of the 1/5th shares of C is sacrificed by A (3/5-2/5), as such the amount brought in cash by C as his share of Goodwill will be credited to the capital account of A only.

The journal entries for the same will be:

Date	Particulars		L.F.	Debit Aniount	Credit Amount
1980	•	•		Rs.	Rs.
Mar. 31	Cash A/c To Goodwill A/c	Dr.		10,000	10,000
•	(Being C brought his she will in cash)	are of good-		ł	
,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,	Goodwill A/c To A's Capital A/c	Dr.		10,000	10,000
	(Being amount paid by C of goodwill credited to A tion for reduction in his p proportion)				

(ii) C was to bring cash equal to 20% of the combined capital of A and B, i.e. 20% of Rs. 60,000 (39,200+20,800), which comes to Rs. 12,000.

## (iii) CALCULATION OF CASH & BANK BALANCE

Particulars	Amount	Particulars	Amount
To Balance b/d To Goodwill A/c To C's capital A/c	Rs. 9,000 10,000 12,000	By Balance c/d	Rs. 31,000
	31,000		31,000

**Problem 11.** Deepal and Sheetal are partners in a Firm sharing profits in the ratio of 2:1. Their Balance Sheet as on 31st December 1980 was as on next page:

Liabilities		Assets			
Creditors Investment provision Workmen compensation Fund General Reserve Capital A/c: Deepal Sheetal	Rs. 1,400 400 1,200 2,100 6,000 4,900	Bank Bills Receivable Debtors Less: Provision Stock Investments Goodwill	4,000	Rs. 1,004 2,500 3,500 3,000 5,000 996 16,000	

On the above date, Chetal is admitted for 2/5th share in the profits of the firm.

Following revaluations were made at the time of admission:

- (1) Accrued incomes not appearing in the books Rs. 100.
- (2) Market value of investments is Rs. 4,500.
- (3) Claim on account of workmen's compensation is estimated at Rs. 150.
- (4) Provision for Doubtful Debts is required at Rs. 600.
- (5) X, an old customer, whose account was written off as bad, has promissed to pay Rs. 350 in settlement of his full claim.
- (6) The firm had purchased machinery on hire-purchase system for Rs. 3,000 of which only Rs. 100 are to be paid. Both machinery and unpaid hability did not appear in the balance sheet.
- (7) There was a joint life policy on the lives of Deepal and Sheetal for Rs. 15,000. Surrender value of the policy on the date of admission amounted to Rs. 2,400. It was decided to record this as an asset of the new firm.
- (8) Chetal is required to bring in cash Rs 10,000 as capital. Her share of Goodwill was calculated at Rs. 2,400; full value of Goodwill is to be raised in the books.

You are required to prepare-

- (1) Revaluation A/c.
- (2) Partners' Capital Accounts.
- (3) Goodwill Working.
- (4) Balance Sheet of the new Firm after the admission of Chetal.

(11.B. Part I, April 158

Solution: Dr.

(1) REVALUATION ACCOUNT

prince dispus pages	6,800		6,800
	===		===

### (3) Goodwill Working:

Chetal is admitted for 2/5th share in the profit of the firm and her hare of Goodwill is calculated at Rs. 2,400/.

Therefore, the full value of the Goodwill will be

Rs. 
$$2,400 \times \frac{5}{2}$$
 Rs. 6,000.

Goodwill is already shown in the Balance Sheet at Rs. 996.

Hence, Goodwill will be raised by Rs. 5,004 (Rs. 6000-996) Journal entry for this will be:

**Problem 12.** A and B were equal partners. C comes in for 10% profit, his profit being borne by A personally. D comes in for 20% share, and his total earnings are guaranteed at Rs. 500 per month from the Firm **including** interest on Capital and Salary. E comes in for another 20% share, his minimum share of profit **excluding** interest or partnership salary is guaranteed by B personally at Rs. 8,000 per annum.

Total profits for the year ended 31st March 1982 amounted to Rs. 28,100 without considering the following appropriations which were allowable under partnership deed in addition to share of profits etc. as stated above:—

Interest on capital: Rs. 800, Rs. 500, Rs. 1,000 and Rs. 500 for A, B, C and D respectively.

Salary: Rs. 4,800, Rs. 2,000 and Rs. 3,000 for B, D and E respectively.

Prepare Profit and Loss Appropriation A/c for the year ended 31st March 1982. Give full workings,

(I.I.B. Part I. May 1982)

#### Solution:

### PROFIT & LOSS APPROPRIATION A/C for the year ended 31st March, 1982

### Working Notes :

### 1. Calculation or New Profit Sharing Ratios :

A and B were equal patners.

Therefore, A : B=50:50

C comes in for 10% profit, which is borne by A. Hence A: B: C=40:50:10.

D comes in for 20% share, which is to be borne by the firm, i.e., by A and B equally or 10% each. Therefore,

A:B:C:D=30:40:10:20

E comes in for another 20% share from the firm. This will also be borne by A and B equally i.e., 10% each from A and B. Thus,

A:B:C:D:E=20:30:10:20:20.

### 8.73 PARTNERSHIP—ADMISSION Calculation of Partners share in the profits. 2. Profit before charging Interest 28,100 Rs. on capitals and salary Rs. 2,800 Less: Interest on Capital Rs. 9,800 Rs. 12,600 Salary to Partners Net Profit Rs. 15,500 === Net profit may be divided as under: B C D E A (2/10th)(3/10th)(1/10th)(2/10th)(2/10th)Rs. 3100 Rs. 1550 Rs. 3100 Rs. 3100 Rs. 4650 D's earnings are guaranteed at Rs 500 per month or say Rs. 6,000 per annum from the firm including interest on capital and salary. Guaranteed amount Rs. 6000 Less: Interest on capital to D Rs. 500 Salary to D Rs. 2.000 Rs. 3,100 Profit to D Rs. 5,600 Deficiency Rs. Rs. 400 will be paid by A and B equally i.e., Rs. 200 each. Profit payable to D is Rs. 3,100+Rs. 400=Rs. 3,500. E's earnings are guaranteed at Rs. 8000 per annum by B personally. Guaranteed amount Rs. 8,000 Less: Intereston capital to E Salary to E Rs. 3,000 Profit to E Rs. 3,100 Rs. 6,100 Deficiency 1,900 Rs. 1,900 will be paid by B.

Profit payable to E is Rs. 3,100+Rs. 1,900=Rs. 5,000.

C is to get 10% of profits i.e., Rs. 1,550 only.

B's share

### PARTNERSHIP-RETIREMENT/DEATH

Problem 1. Explain in detail the adjustments of accounts required to be done on the retirement or death of a partner.

Solution. On retirement or death of a partner, the share of such outgoing partner in the firm is to be ascertained correctly. In case of death, the amount due is paid to the legal representative's of the deceased partner, while in case of retirement the money is paid to the retiring partner. In order to ascertain this amount, the following adjustments will be necessary:

#### Valuation and Treatment of Goodwill

Goodwill is valued as per the provisions given in the Partnership Deed. The share of the outgoing partner is credited to his capital account, which is in consideration for sacrificing a share in the profits of the firm.

It is treated in the books of accounts in the following ways:

#### JOURNAL ENTRIES

Α.		When goodwill is raised at its full Goodwill A'c To All partners capital A'cs	value : Dr.	Full value In old ratios
В.		When goodwill is raised in the both but is then written off:	oks,

F.	When goodwill appears in the books at its full value, no journal entry is to be passed	
G.	When goodwill appears in the books, but the present value of the goodwill is more than that, goodwill account is raised for the difference in these two values	<i>?</i>
	Goodwill A/c Dr. To All partner's capital A/cs	Goodwill raised In old ratios
Н.	When goodwill appears in the books, but the present value of goodwill is less than that, the goodwill account is written off (reduced) to that extent.	
	All partner's capital A/cs Dr. To Goodwill A/c	In old ratios Goodwill written off
I.	When the outgoing partner gives his share to a particular partner, the goodwill payable to him is debited only to the benefitted partner's capital account.	•

### Calculation of Gaining Ratio

Benefitted partners capital A/c

To Outgoing partner's capital A/c

On the death or retirement of a partner, his share in the profits will be taken by the remaining partners. Thus, they get an additional share, which is a gain. When new profit sharing ratio is not given, the remaining partners will continue to share in the old ratios, existed between them, ie. they gain in the old ratio. If the new ratios of the partners are given, the gaining ratio is calculated by deducting the old ratio from the new one. If the gaining ratio is given, the new ratio of the remaining partners will be calculated by adding their gaining ratio with their old ratio.

Note: For adding or subtracting ratios, they are converted into proportions

Α.

#### Revaluation of Assets and Liabilities

The assets and liabilities are revalued, and a revaluation account is prepared in a similar manner as was done in case of admission of partner/s. Profit or loss on revaluation is transferred to all the partner's capital accounts in their old profit sharing ratio. Assets and liabilities are then shown in the Balante Sheet at the changed values. If the continuing partners desire to maintain the assets and liabilities at their original value, then 'Memorandum Revaluation Account' should be prepared. The first part of this account will be exactly the same as in case of Revaluation Account but in second part entries shall be reversed and the profit or loss of this part shall be divided among the continuing partners in their new profit sharing ratio.

### Distribution of Reserves, Accumulated Profits, etc.

Any Reserves or undistributed profits should be transferred to the capital accounts of all the partners in their old profit sharing ratio. If the continuing partners with to maintain the Reserves or Profits, then only the returning partner's share may be credited to his capital account and debited to reserve or accumulated profit account.

## Accrued Profit or Loss (Profit or Loss upto the date of Retirement or Death)

An outgoing partner is entitled to a share in profit (or loss) upto the date of relitement or death. The actual amount of profit earned from the date of the last Balance Sheet to the actual date of retirement can he ascertained only if the books are closed and stock is taken. This is inconvenient, and, therefore, profit is estimated on the basis of time or on the basis of sales. The share of the outgoing pattner is calculated and is credited either by debting continuing partners capital accounts in their gaining ratio, or the amount is debted to Profit & Loss Suspense account which is closed at the end of the year by transferring the amount to Profit & Loss account. The procedure will be reverse, in case of loss.

### Settlement of the Ontgoing Partner's account

The total amount due to the outgoing partner as per his capital account will have to be paid over to him either in lump sum or by instalments, as may be mutually agreed. Generally, the payment is made in instalments, and as such, the amount payable to him is transferred to a separate 'Loan Account' in case of returning partners, and to 'Decessed Partners' Executor's (or Dependent's) Account' in case of deceased partners. Such loan or executor's account may also carry certain percentage of interest.

Problem 3. A, B and C are equal partners C retires on 31st
March 1972. The Balance Sheet of the firm as on 31st
1072
stood as shown on the next page:

BALANCE SHEET as on 31st December 1971

Liabilities	Details	Amount	Assets	Details	Amount
	Ŕs.	Rs.		Rs.	Rs.
Creditors Contingency reserv	e'e	12,900 4,000	Cash on hand Cash at bank	10.000	1,000 4,000
Investments fluctuation fund		1,200	Debtors Less: Reserve	10,000	0.200
Partner's capital: A	30,000		for doubtful debts	800	9,200
B C	20,000	70,000	Stock Investments (cost) Land & Building Goodwill	٠	10,000 5,000 40,000 18,900
	:	88,100 ===		• .	88,100

In order to arrive at the balance due to C, it was mutually agreed that:

(a)	Land and building be valued at	50,000
(b)	Investments fluctuation fund be brought to	500
(c)	Debtors being all good no reserve is required	•••
(d)	Stock be taken at	9,400
(e)	Goodwill be valued at one year's purchase of the	

average profits of the past five years

(f) C's share of profit to the date of retirement be calculated on the basis of average profit of the preceeding three years.

The profits for the preceeding five years were as under:

	Rs.
1967	- 11,500
1968	14,000
1969	9,000
1970	8,000
1971	10,000

Pass journal entries.

Give partner's capital accounts and revised Balance Sheet. (Show your working)

(I.I.B. Part I, October 1972)

### Workings:

# (1) Calculation of Goodwill:

Goodwill is to be valued at one year's purchase of the average profits for the last five years.

Total profits for the last five years = Rs. 11,500+ 14,000+9,000+8,000+10,000=52,500

Decrease in the value

Average profit = Rs 10,500  $\left( \text{Rs}, \frac{52,500}{5} \right)$ Book value of the goodwill = Rs, 10,500 = Rs, 10,5.0

This amount will be debited to Revaluation account.

(2) Calculation of C's share of profit to the date of retirement:

C's share of profit to the date of retirement be calculated on the
basis of average profit of the preceeding three years.

Total profits for the last 3 years=Rs, 8,000+Rs, 9,000+Rs, 10,000

= Rs. 27,000 Average profit = Rs. 9,000 (Rs.  $\frac{27,000}{3}$ )

C retired on 31st March 1972 while the accounts have been prepared upto 31st December 1971.

Therefore, average profits for 3 months = Rs. 2,250 (Rs.  $\frac{9,000 \times 3}{12}$ )

C being an equal partner in the firm, he is having 1/3rd share. Thus, his share in the average profits for 3 months will be

$$=$$
Rs. 750 (Rs.  $\frac{2,250}{3}$ )

Rs. 8,400

This amount will be debited to A's and B's capitals in equal proportions, i.e. Rs. 375 each.

(3) Calculation of Profit or Loss on Revaluation;

Dr. REV	/ALUATIO	ON ACCOUNT	Cr.

P retires on that date on the following terms:

- (i) The goodwill of the firm is to be valued at Rs. 7,000.
- (ii) Stock and Building are to be appreciated by 10%.
- (iii) Plant and Motor car are to be depreciated by 10%.
  - (iv) Liability for the payment of gratuity to workers Rs. 2,000 is not yet recorded in the books, but the same is to be provided for.
  - (v) Provision for bad debts is no more necessary.
- (ri) It is decided not to maintain goodwill account in the books.
- (vii) The amount payable to P is to be paid in 3 equal annual instalments beginning from 1st January, 1976 with interest at 10% p.c.

You are required to prepare:

- (1) Revaluation account
- (3) New Balance sheet of C & S, and
- (2) Partners' capital accounts (4) P's loan account for 1976.

(I.I.B. Part I, October 1976)

### Solution:

(1)	REVALUATION ACCOUNT
n.	namedinion necodit

### BALANCE SHEET OF C AND S as on 31st December, 1975

Liabilities	Details	Amount	Assets	Details	Amount
Capitals:	Rs.	Rs.	Building	Rs. 18,000	R).
C S	16,800 10,600	27,400	Add: 10% appreciation	1,800	19,800
P's loan A/c Bills payable		15,600 2,000	Plant Less; 10%	14,000	
Creditors Provision for		8,000	depreciation	1,400	12,600
gratuity		2,600	Motor car Less: 10%	4,000	
			depreciation	400	3,600
			Stock Add: 10%	10,000	
			appreciation	1,000	11,000
			Debtors Cash at bank		7,000 1,000
		55,000			55,000

Workings:

(1) Distribution of Reserves among the Partners: Reserves amounting to Rs 5,000 will be distributed among all the partners in their profit sharing proportions, viz. 2/5th, 3/10th and 3/10th to C, P and S respectively,

C's share will be=Rs.  $\frac{5,000 \times 2}{5}$ =Rs. 2,000

P's share will be=Rs. 5, ____=Rs. 1,500

S's share will be  $= R_s = \frac{5.000 \times 3}{10} = R_s = 1,500$ 

The following journal entry will be passed for the purpose: **IOURNAL ENTRY** 

Date	Particulars		LF.	Debit Amount	Credit Amount
1975 Dec. 31	Reserve A/c	Dr.		Rs. 5,000	Rs. 2.000
	To C's capital A/c To P's capital A/c To S's capital A/c	,			1,500

# (2) Calculation of gaining proportions of remaining Partners:

P, on his retirement, is sacrificing his 3/10th share in profits.

C was having 2/5th share out of the 7/10th share (1-3/10th).

$$\therefore \text{ C's new share will be } \frac{2 \times 10}{5 \times 7} = 4/7 \text{ th}$$

C will gain 
$$4/7$$
th— $2/5$ th= $\frac{20-14}{35}$ = $6/35$ th

S was having 3/10th share out of the 7/10th share (1-3/10th).

$$\therefore \text{ S's new share will be } \frac{3 \times 10}{10 \times 7} = 3/7 \text{th}$$

S will gain 
$$3/7$$
th $-3/10$ th $=\frac{30-21}{70}=\frac{9}{70}$ th

Thus, 3/10th share sacrificied by P will be shared by C and S in the proportions of 6/35th and 9/70th  $\left(\frac{12+9}{70} = \frac{21}{70} = \frac{3}{10} \text{ th}\right)$ 

# (3) Calculation of Goodwill:

The goodwill of the firm is valued at Rs. 7,000.

P was having 3/10th share in profits, therefore, he will get

Rs. 2,100 (Rs. 
$$\frac{7,000\times3}{10}$$
).

This amount will be payable by C and S in their gaining ratio C will pay Rs. 1,200 (Rs.  $\frac{7,000 \times 6}{35}$ ).

S will pay Rs. 900 (Rs. 
$$\frac{7,000\times9}{70}$$
).

As the goodwill account is not to be maintained in the books, the following journal entry will be passed for the purpose:

Date	Particulars		L.F.	Debit Amount	Credit Amount
1975				Rs.	Rs.
Dec. 31	C's capital A/c	Dr.		1,200	× ,
	S's capital-A/c	Dr.		900	
	To P's capital A/c				2,100

Problem 5. P. Q. R are partners in a business sharing profits 3/4, 1/8, 1/8 respectively, and their Balance Sheet as on 31st December 1981 was as follows:

Liabilities		Rs.	Assets	Rs.
Sundry Cred	itors	40,000	Plant and Machinery	60,000
General Rese	rve	5,000	Patents	10,000
Capital A/c		_	Sundry Debtors	35,000
$\boldsymbol{P}$	50,000		Stock	20,000
ø.	30,000		Cash	25,000
R	25,000	1,05,000		
	~~~~	1,50,000		1,50,000
		1,20,000		1,00,000

R retires on 31st December 1981 on the following terms:

(1) Goodwill is to be valued at three years' purchase of the average profits of the last four years. The profits were as follows:

1978	\$0,000
1979	60,000
1980	40,000
1981	\$0,000

- (2) Goodwill account is not to appear in the books after R's retirement.
- (3) Plant and machinery was valued at Rs. 50,000, patents at Rs. 15,300 and stock at Rs. 18,000.
- (4) A provision of 5% on debtors was necessary.
- (5) On 30th June 1980, a shed was constructed at a cost of Rs. 10,000. This sum was charged to Profit and Loss A/c. This asset is now to be brought in the books, after allowing (This adjust-ation of good-ation of good-ation of good-ation of good-ation)
- (6) Q was to acquire the whole of the share of profit of 'R'.
- (7) The total capital of the Firm was to be Rs. 80,000 and exputals of P and Q were to be in their profit sharing ratio, necess adjustments to be made in cash.
- (S) R is to leave Rs. 30,000 in the business as loan at 12%. remaining amount is to be paid to him immediately.

You are required to prepare:

- (1) Revaluation A/c.
- (2) Partner's Capital A/c showing all the adjustment.
- (3) Balance Sheet of the Firm after R's retirement.
- (4) Give full working for Goodwill A/c and Cash A/c.

(I.I.B. Part I, November 1982)

### Solution:

### REVALUATION A/C

Particulars	Amount	Particulars	Amount
	Rs.		Rs.

### Workings:

(1) Distribution of General Reserve among the Partners: General Reserve amounting to Rs. 5,000 will be distributed among all the partners in their profit sharing proportions, viz., 3/4th, 1/8th and 1/8th to P. Q and R respectively.

P's share will be=Rs.  $\frac{5,000\times3}{4}$  Rs. 3,750

Q's share will be=Rs. 
$$\frac{5,000\times1}{6}$$
 = Rs. 625

R's share will be=Rs.  $\frac{5,000 \times 1}{8}$  = Rs. 625

The following journal entry will be passed for the purpose.

### JOURNAL ENTRY

Date	Particulars		L.F.	Debit Amount	Credit Amount
1981				Rs.	Rs.
Dec. 31	General Reserve A/c To P's capital A/c To Q's capital A/c To R's capital A/c	Dr.		5,000	333 62 62

### (2) Calculation of New Profit sharing proportion :

Old proportion=P 3/4th, Q 1/8th and R 1.8th O was to acquire the whole of the share of profit of R.

Therefore Q's proportion will be=1,8th his o== - 3= ==

=1 4tb. New Proportion = P 3/4th, O 1/4th,

Calculation of Goodwill:

Goodwill is to be valued at three very profits of the last four years.

Profits during the last iour ter-

1981 Rs. 50,000 1980 Rs. 40.00

1979 Rs 60,000

1978 Rs. 50,000

2.00,000

Average for last four *2

Goodwill of the fem = R'

This amount will be man

As Goodwill account is not to appear in the books, the following journal entry will be passed:

### JOURNAL ENTRY

Date	Particulars	L.F.	Debit Amoun1	Credit Amount
1981			Rs.	Rs.
Dec. 31	Q's Capital A/c To R's Capital A/c	Dr.	37,500	37,500

### (4) Calculation of the cost of shed:

Cost of shed as on 30-6-1980	Rs. 10,000	
Depreciation @ 5% p.a. for 1½ year i.e., upto 31.12.1981 on original cost	,	
$\left(10,000\times\frac{5}{100}\times\frac{3}{2}\right)$	Rs. 75	0
Depreciated value of Shed as on 31.12.1981	9,25	<del>-</del>

The amount of Rs. 10,000 was charged to Profit & Loss account, but the amount of Depreciation Rs. 750 was only to be charged to Profit & Loss account. Therefore, Rs. 9,250 will be shown on the credit side of revaluation account.

### (5) Calculation of new Capital:

The total capital of the firm=Rs. 80,000

Capitals of P and Q were to be in their profit sharing ratio

P's ratio=3/4th Q's ratio=1/4th

Thus new Capital of  $P=80,000\times 3/4=Rs.\ 60,000$ 

New Capital of  $Q = 80,000 \times 1/4 = Rs. 20,000$ 

E

### PARTNERSHIP—DISSOLUTION

**Problem 1.** What is dissolution of partnership? In case of dissolution of a partnership firm, mention the order in which the proceeds from the sale of assets have to be utilised.

Solution: Dissolution of a firm means "the dissolution of partnership between all the partners of a firm".

[Indian Partnership Act, 1932 (Sec. 39)]

In case of dissolution of a firm, the business of the firm is closed down and its affairs are wound up by selling and realising assets and property and by paying the liabilities and discharging the partners.

The amounts realised by sale of assets and properties are utilised in the following order:

- In paying off the debts and liabilities of the firm to persons
  who are not partners therein, e.g. Government dues, bank
  bans, fully secured creditors, partly secured creditors,
  unsecured creditors, outstanding expenses, etc.
- II. In repaying loans and advances taken from partners.
- III. Each partner will then be paid rateably what is due from the firm to him in respect of his capital.
- IV. If there is any surplus left after the above payments, it is divided among the partners in their profit sharing proportions.

Problem 2. What is Realisation Account? Give the entries needed to close the books of the firm upon its dissolution.

Solution. The dissolution of a firm is its end, so the accounts of the various assets and liabilities appearing on the date of the dissolution should also be closed. It also becomes necessary to record the amounts realised on sale of assets, payment to liabilities and profit or loss on account of realisation.

A special account styled "Realisation Account" will have to be opened for this purpose, in order that the whole of the above information may be ascertained therefrom.

ACCOUNTING TREATMENT FOR CLOSING PARTNERSHIP BOOKS ON DISSOLUTION

Sl. No.	Steps to be followed	Account to be Debited	Account to be Credited
1.	To close the various assets accounts, open a Realisation Account, and transfer thereto the book value of the assets except eash and bank balances	Realisation	All assets
2.	If there is any debit balance of Profit & Loss account appear- ing on the assets side, transfer the same to partners in their profit sharing ratio	Partners' capitals	Profit & loss account
3.	Assets against which a provi- sion (e.g., provision for doubtful debts) has been kept should be transferred to the debtt side of realisation account at gross figure. The provision should be transferred separately to Realisation Account	Realisation Provision for doubtful debts	Sundry debtors Realisation

0,7,	i .	, •	
4.	To close all the liabilities to third parties	Outside liabilities	Realisation
5.	If there is any Reserve fund, or credit balance of accumulated profits, transfer that to partners' capital in their profit sharing ratio	Reserve fund or Accumulated profit A/c	Partner's capitals
6.	For the amount realised on sale of assets	Bank	Realisation
7.	If assets are taken over by a partner	Partner's capital	Realisation
8.	For amount paid in respect of liabilities	Realisation	Bank/Cash
9.	If some partner agrees to pay any liabilities	Realisation .	Partner's capital
10.	For realisation expenses incurred	Realisation	Bank
11.	If any partner agrees to bear all the realisation expenses in consideration for an agreed amount to be paid to him.	Realisation	Partner's capital
,	(no entry will be made for the actual realisation expenses)		
12.	The balance of the realisation account will represent either the profit or loss on realisation		
	(i) If there is profit (credit balance)	Realisation	Partner's capitals
	(ii) If there is a loss (debit balance)	Partner's capitals	Realisation
13.	If there is any loan account of a partner, the same will be paid out	Partner's Ioan	Bank .
14.	For closing capital accounts:		
	(i) Amount due to the partner will be paid (credit balance in their account)	Partner's capital	Bank
	(ii) Amount due from any partner is received (debit balance in their account)	Bank	Partner's capital
15.	If there is any cash balance, the same should be transferred to the bank account	Bank	Cash

Note: The debit and credit totals of the Bank account will tally.

Problem 3. Patel. Shah and Joshi were in partnership sharing profits and losses in the proportion of 5:3:2.

On 31st December 1975, their Balance sheet was as under:

Liabilities	Details	Amount	Assets	Amount
	Rs.	Rs.		R.
Capitals: Patel Shah Joshi	36,000 32,800 5,000	73,800	Plant Investments Stock Debtors Cash	6,000 8,000 43,100 44,100 3,000
Creditors		30,800	C3511	3,000
		1,04,600		1,04,600

On that day, Shah died and Patel wanted to retire. They, therefore, agreed to dissolve. Joshi took over the assets and liabilities as under:

- (a) Goodwill was valued at Rs. 60,000.
- (b) Investments were distributed in profit sharing ratio, as the same were not saleable.
- (c) Part of the stock was sold for Rs. 10,000 and the balance was valued at Rs. 28,000.
  - (d) The other assets and liabilities were valued at book value.

Prepare the necessary accounts to close the books of the firm.
(I.B. Part I, May 1976)

# Solution:

The season of th	88,000			88,000	

The firm was dissolved on 31st December 1974. The following transactions took place:

- (1) Mrs. Severine undertook to pay Mr. Severine's loan and took over 50% of the stock at a discount of 20%.
- (2) Debtors realised Rs. 18,000. Balance of the stock was sold off at a profit of 30% on the cost.
- (3) Sundry creditors were paid out at a discount of 10%. Bills payable were paid in full.
- (4) Plant realised Rs. 25,000, Building Rs. 40,000.

Mrs. Severine took over the goodwill of the firm at a valuation of Rs. 10,000. Realisation expenses were Rs. 1,750.

Capital R		3.00,000
Cash at Bank	40,000	
	14,35,000	14,35,000
	****	~===

The partners agreed to dissolve the firm on the above date on the following terms:

- (a) Freehold Property was sold and realised Rs. 5,00,000; Investments realised Rs. 75,000; Debtors Rs. 1,15,000 and office furniture Rs. 6,000.
- (b) P retired from the business altogether.
- (e) Q took over the Calcutta business and the assets in connection therewith at book values, the goodwill thereof being valued at Rs. 1,00,000.
- (d) R took over Madras business and the corresponding assets at book values, the goodwill for the purpose being valued at Rs. 50.000.
- (e) Expenses of Realisation amounted to Rs. 12,000.
- (f) Bombay stock was taken over by Q and R equally at book value.
- (g) P, Q and R shared profits in proportions respectively.

(h) There was un-recorded liabilities of Rs. 8,000 which was paid off.

Prepare:

(1) Realisation A/c, (2) Partner's Capital A/cs, and (3) Bank A/c to close the books of the firm, assuming that each partner finally settles his account with the firm.

Problem 8. Hiten and Nayan entered into partnership from 1st January 1974. They commenced business with a capital of Rs. 60,000 and Rs. 40,000. Profits and losses were shared in the ratio of 3: 2.

The business was carried on for 3 years, for which the results were as under:

Year ending 31st December 1974 Profit Rs. 60,000.

Year ending 31st December 1975 Profit Rs. 44,400.

Year ending 31st December 1976 Loss Rs. 10,760.

As the business was no longer profitable, they agreed to dsssolve the partnership on 31st December 1976.

The partners drew Rs. 8,000 each per annum.

On the date of dissolution, creditors were Rs. 32,800.

The assets of the partnership realised Rs. 1,50,000, the expenses being Rs. 1,100.

The expenses of realisation amount to Rs. 1,200.

You are asked to prepare the necessary accounts to close the books of the firm.

(I.I B. Part I, August 1978)

### Workings:

### Calculation of B's Commission:

B is to receive 5% of the amounts coming to A and C as his remuneration and is to bear all expenses of realisation.

man and to to pent art expenses	or reamantion.	
Amount coming to A	•	=Rs. 40,000
Less: Amount to be paid by C		=Rs. 3,000
Total amount coming to A and C		=Rs. 37,000

Explanation:

When a partner is unable to pay his debts due to the firm, he is aid to be insolvent, and the Solvent partners have to bear the loss due to the insolvency of the other partner, s in their capital ratio, this being a capital loss

**** ** **** 

If the Partners are maintaining fixed capitals, this loss in distributed in that ratio. If, however, capitals are fluctuating, their capital ratio will be determined after adjusting all the reserves and accumulated profits to he date of dissolution, but before adjusting prout or loss on Realisation Account. In case any partner is having a debit balance in his capital ecount and is not insolvent, he cannot be called upon to bear loss on account of insolvency of other partners.

Note: In the given problem, loss on account of C's insolvency amounting to Rs. 3,000 is borne by A and B in their capital ratio of 12,000: 6,000 i.e. 2:1 respectively.

**Problem 10.** A, B and C were in partnership, sharing profits and losses in the proportions of 3:4:5.

The partnership was dissolved on 31st December 1974, when the position of accounts was as under:

BALANCE SHEET as on 31st December, 1974

Warning	as on 513	December,	1)//7	
Liabilities	Details	Amount	Assets	Amount

B's C's	6,000 2,000	18,000		
		***************************************		
•		38,000 ===		38,000 ===

The assets were realised in the following instalments:

First instalment Rs. 5,000; Second instalment Rs. 10,000; Third instalment Rs. 5,000; Fourth instalment Rs. 1,000; Fifth instalment Rs. 4,400; Sixth instalment Rs. 800; Seventh instalment Rs. 7,000; and Eighth and final instalment Rs. 2,400.

It was decided to distribute the instalments as and when received.

Prepare a scheme for equitable distribution amongst the partners, taking into consideration the profit sharing ratios.

(I.I B. Part I, May 1975)

### Workings:

The scheme for equitable distribution of the various instalments will be based on the following observations:

(a) The partners A, B and C are sharing profits and losses in the ratio of 3:4:5, but they are having capital balances of Rs. 10,000, Rs. 6,000 and Rs. 2,000 respectively. As the distribution amongst the Partners is to be made taking into consideration the profit sharing ratios, C's capital may be taken as the basis. On this basis A's capital

should be Rs. 1,200 (Rs.  $\frac{2,000\times12\times3}{5\times12}$ ) and that of B Rs. 1,600

(Rs.  $\frac{2.000 \times 12 \times 4}{5 \times 12}$ ). Hence the capital of A is in excess of bis

proportionate capital by Rs. 8,800 (Rs. 10,000—Rs. 1,200) and that of B by Rs. 4,400 (Rs. 6,000—Rs. 1,600). These excess amounts of Rs. 8,800 and Rs. 4,400 will be paid to A and B respectively, before any payment is made to C.

(b) In between A and B, they share profits and losses in the ratio of 3: 4, while they are having excess balances of Rs 8,300 and Rs. 4,400 respectively. Taking the excess amount of B as basis, the proportionate

excess amount of A should be Rs. 3,300 (Rs.  $\frac{4.400 \times 7 \times 3}{4 \times 7}$ ). Hence, A

must get back Rs. 5,500 (Rs. 8,800—Rs. 3,300), before any amount is paid to B, so that the respective excess amounts of A and B should be in the ratio of 3:4, i.e. Rs. 3,300 and Rs. 4,000 respectively.

Keeping the above considerations in mind, the scheme of distribution will be drawn as under:

- The proceeds up to an amount of Rs. 10,000 will be paid to creditors.
- II. The proceeds above Rs. 10,000 up to Rs. 20,000 (Rs. 10,000 +Rs. 10,000) will be used to repay the pariner's loads in the ratio of 3: 2.
- III. The proceeds above Rs. 20,000 up to Rs. 25,500 (Rs. 20,000+Rs. 5,500) will be paid to A [working (b) above].
- IV. The proceeds above Rs. 25,500 up to Rs. 33,200 (Rs. 25,500 + Rs. 3,300+Rs. 4,400) will be paid to A and B in the ratio of 3; 4 (working (b) above)
- V. The proceeds above Rs. 33,200 will be paid to A, B and C in the ratio of 3: 4: 5, [working (a) above].

•	THE PROPERTY OF COMPANY		8.13
	(b) If the purchasing company has agreed to bear these expenses.	Purchasing company	Bank .
5.	The assets not taken over by the company are realised separately. The difference between the book value of the asset and the amount realised is traosferred to realisation account:		
	(a) If there is a loss on sale of such an asset.	Cash Realisatioo	Asset
	(b) If there is a profit on sale of such an asset.	Casb	Asset Realisatioo
6.	The assets which are not taken over by the company but are taken by any of the partners at an agreed value:		
	(a) If the agreed value is less than the book value of the assets.	Partoer's capital Realisation	Asset
	(b) If the agreed value is more than the book value of the asset.	Partoer's capital	Asset Realisation
7.	The liabilities not taken over by the company are paid off separately:		
	(a) If the amount paid is less than its book value.		Cash Realisation
	(b) If the amount paid is more than its book value.	Liability Realisation	Cash
	The liabilities which are not taken over by the purchasing company, but are taken by any partner at an agreed value:		
	(a) If the agreed value is less than its book value.	Liability	Partner's capital Realisation
	(b) If the agreed value is more than its book value.	Liability Realisation	Partner's
9.	The balance of realisation account will represent profit or loss on realisation which would be transferred to the capital accounts of the partners in the profit sharing proportions.		
	(a) If there is a loss on realisation.	Partners capitals	Realisatioo
	(b) If there is a profit on realisation.	Realisation	Pariner's

Purchasing 10. When the purchase price is received Cash/Bank/ from the purchasing company in the company Shares/ form of cash, shares and debentures. Debentures Partner's 11. The assets by way of eash, bank balance, shares, debentures of the purchasing company will now be capitals distributed amongst the partners in

proportions to their respective capitals, standing after the loss or profit on realisation (and other reserves and

profits) have been transferred

Cash/Bank/ Shares/ Debentures

Note: Care should be taken to distribute the shares/debentures in whole numbers only. Fraction of a share or debenture cannot be issued, so the nearest whole number of shares or debentures should be given to a partner.

G

#### PARTNERSHIP—AMALGAMATION

**Problem 1.** What is Amalgamation and why is it needed? What is the accounting procedure.

Solution. When two or more separate business units agree to merge together to do business jointly, it is called 'Amalgamation'.

Usually, the firms carrying on similar busineeses amalgamate their concerns with a view to avoid competition, reduce unnecessary expenditure on advertisement, to make economy in the cost of management, to gain monopoly in the market, to combine the persons of various skills in the two firms, or to have more capital.

As a result of amalgamation, the old firms go out of existence and a new firm emerges. For this purpose, the merged units generally revalue their assets and liabilities, raise goodwill, their partners share the accumulated profits and reserves, take certain assets or liabilities, and so on. Therefore, they pass adjusting and closing entries. After this the new firm passes opening entries in its books.

1.	Separate opening entries are passed for the assets and liabilities taken over from the individual firms at the agreed values.	All assets	All liabilities
2.	If capital accounts are to be adjusted in the light of capital required:		Partners' capital
	(a) for the amount brought in by the partners.	Cash/Bank	Partner's capitals
	(b) for the amount withdrawn by the partners.	Partner's capitals	Cash/Bank
firm firm	A balance sheet will then be prepared amalgamating all the assets and liabilities	in the books	of the new taken over.

This will indicate the opening position of the new firm.

Problem 2. M/s. A & Co, having A and B as equal partners, decided to amalgamate with C & Co., having C and D as equal partners, on the following terms and conditions:

- (1) The new firm to take over investments at 10% depreciation, land at Rs. 80,000; premises at Rs. 45,000; machinery at Rs. 9,000 and to take over only the trade liabilities of both the firms. The debtors being taken over at book value including reserve.
- (2) The new firm to pay Rs. 12,000 to each firm for Goodwill.
- (3) Typewriters at the written off value of Rs. 800, belonging to C & Co., and not appearing in the balance sheet was also not taken over by the new firm.
- (4) It was also agreed that the furniture belonging to both the firms be not taken over by the new firm.
- (5) All the four partners in the new firm to bring in Rs. 1,60,000 as capital in equal shares.

The following were the balance sheets of both the firms on the date of amalgamation:

The two firms decided to amalgamate and form into ABCD & Co. with effect from 1st August, 1979. Partners would share profit and loss equally between themselves as they were doing prior to amalgamatio they agreed to the following revaluation of assets and liabilities;

	A & B	C & D
	Rs.	Rs.
Land & workshop	10,000	10,000
Machinery & tools	7,000	8,000
Furniture & fixtures	2,500	2,500
Sundry Debtors	5,500	7,000
Stock	8,000	8,000
Outstanding expenses	2,000	3,500

In addition to the above, it was decided:

- (i) That the goodwill of A & B and C & D were valued at Rs. 10,000 and Rs. 5,000 respectively in the first instance but for the purposes of Balance Sheet of the new firm, the combined goodwill would be valued at Rs. 12,000; and
- (ii) That the reconstructed capitals of partners should be Rs. 14,000 each, partners introducing cash, if necessary.

You are required to prepare:

- (i) The Revaluation accounts of Messrs A & B and Messrs C & D and their capital accounts prior to and after amalgamation;
- (ii) Opening Balance Sheet of the New Firm assuming that all the arrangements have been duly carried out.

(I.I.B. Part I, November 1979)

#### COMPANY ACCOUNTS—ISSUE OF SHARES

Problem I. Define Joint Stock Company and state its main features.

Solution. A Joint Stock Company may be defined as an association of individuals formed for the purpose of profit, possessing a common capital contributed by the members composing it, such capital being divided into shares of which each member possesses one or more and which are transferable by the owner, the liability of each such member being limited to the face value of the shares be possesses.

The main features of a company are:

- (a) It is an artificial person having a separate legal entity.
- (b) It has a continuous existence, f.c. perpetual or uninterrupted succession.
- (c) The liability of the members (in most of the cases) is limited.
- (d) The management of the company is separated from its ownership.
- (e) A company possesses a common seal as a substitute for signatures.
- (f) A company can do only those acts or carry only those businesses which are specifically permitted for it.
  - (g) It is a voluntary association of persons formed usually for profit.
  - (h) The capital of the company is divided into small proportions or parts, each one being called as share.
  - (i) The shares of the companies are transferable in a public company, but a private company restricts the right to transfer its shares.

Problem 2. Explain the difference between a Partnership Firm and a Limited Company.

(1 1 B. Part I, May 1971) (1 1 B. Part I, May 1972)

Solution. The principal points of distinction between a Partnership Firm and a Limited Company are given hereunder.

1. Menshers. The number of members in a Partnership Firm can range from two to twenty in all businesses, except banking coapsess.

where the range of members is two to ten. The minimum number in a public company is seven without any maximum limit. A private company must have at least two members but not more than fifty.

- 2. Lizbility. In a partnership firm, all the partners are jointly and individually liable for the whole of the debts and liabilities of the firm. They have unlimited liability. In a limited company, the liability of the members is usually limited to the amount represented by the face value of the shares held by them.
- 3. Management. In a partnership firm, every partner is entitled to take part in the management of business. But in case of a limited company, the management is vested in the hands of a few of the shareholders elected as directors.
- 4. Transfer. A partner has no right to transfer his share in the firm to any other person without the consent of the other partners. In a public limited company, there is no restriction on the transfer of shares.
- 5 **Profits.** Profits are distributed in a partnership firm according to the terms of the Partnership Deed, or equally if there is no agreement. However, in a limited company the distribution of profit to the shareholders in the form of dividend is decided by the clauses of the Articles of Association of the company or by the Board of Directors.
- 6. Capital. The capital of a partnership firm can be increased or decreased by mutual agreement and is frequently affected by profits. or losses, drawings, etc. But the Authorised capital of a company is fixed by its Memorandum and can only be increased or decreased in accordance with the provisions of the Indian Companies Act, 1956.
- 7. Legal Entity. A partnership firm does not have a separate legal entity but the entity of a limited company is different from that of its members, and can sue and be sued as company like any individual.
- 8. Audit of Accounts. Audit is not compulsory unless stated in the Partnership Deed. But in the case of a limited company audit from qualified chartered accountants is compulsory.
- 9. Registration. A partnership may or may not be registered, but in the case of a company its incorporation is a must.

**Problem 3.** Explain briefly from a bank's viewpoint "the underwriting of shares."

- (I.I B. Part I, November 1973)

Solution. Underwriting means an agreement entered into before the shares and debentures are offered to the public that in the event of the public not taking up the number of shares or debentures mentioned in the agreement, the underwriters will take up the balance of shares not taken up by the public. For this service, the underwriters charge an agreed rate of commission which is usually calculated on the issue price of shares and debentures. This rate of commission cannot exceed 5% of issue price of shares and in case of debentures  $2\frac{1}{2}$ % of the issue price of debentures or the amount or rate authorised by the Articles of Association of the company, whichever is less.

Problem 4. What is the procedure of 'Raising Capital' by a company?

Solution. For the purpose of raising capital, a public company has to follow the undernoted procedure:

- 1. Issue of Prospectus. The Certificate of Incorporation having been obtained from the Registrar, the company requires money, with which to eommence husness. In case of a public company, the invitation to the public to subscribe to its share capital is made by means of a 'Prospectus'. Prospectus is defined as 'any notice, circular, advertisement or other invitation to the public for subscription or purchase of any shares or debentures of a company. Alongwith the details of profitability, soundeness of the business and invistment etc. to attract the investing public, the prospectus usually contains the details regarding the number of shares/debentures offered by the company to the public, the amount to be payable along with the application for each share, the date when the shares will be allotted, and the method and time of payment of the various calls.
- 2. Receipt of Applications for shares. Attached to the prospectus is an application form which is filled up by every applicant. A certain amount per share is asked to be remitted alongwith the application for shares, and is called 'Application Money'. This amount is deposited by the applicaots iovariably with the Bankers to the company.
- 3. All treat of shares. When the date fixed for receipt of applications for shares expires, the bank sends all applications to the company. The Board of Directors then proceed to allot shares to the applicants, who are called upon to pay a further instalment towards the price of the shares, this is known as 'Alloment Money'.
- 4. Calls for shares. On receipt of allotment money, the company issues Share Certificates under its Common Seal. The balance due on the shares is called up from time to time by the Directors as and when required and these instalments are known as 'Calls'.

Problem 5. What do you understand by Over-subscription? What options are available to deal with money received on over-subscription.

Solution. When the applications received are for more number of shares issued, it is called over-subscription. Under such a circumstance, allottnent can be made only equal to the number of shares issued. In such a case, the directors have to refuse allottnent to some applicants. For the abovesaid purpose, they may choose any of the following alternatives:

- (2) They may totally reject the applications for excess number of shares, or
- (b) The allotment of shares may be made to all on pro-rate basis. Each applicant receives the shares in the proportion of 'Yotal shares issued to total shares applied for', or
- (c) They may reject some applications, and allot to the remaining applicants on pro-rata basis, or

(d) They may totally reject some applications, accept some applications in full and allot to the remaining applicants on pro-rata basis.

When the pro-rata system of allotment is made, the application money received will be in excess of the number allotted This excess money received can be either,

- I. Refunded to the respective applicants, or
- II. Used for adjusting the amount due on the shares allotted.

If the alternative (II) is followed, the excess money not refunded may be:

- (i) equal to allotment money due on the shares allotted, or
- (ii) less than allotment money due, or
- (iii) more than allotment money due.

In case (i) the concerned allottees do not pay anything on allotment. In case (ii) the allottee is to pay only the balance on allotment of shares. In case (iii), the excess amount of application money is utilised, first in adjusting the allotment money in full, and the balance is adjusted towards call moneys which will be due in future.

**Problem 6.** What entries are usually passed with regard to issue of shares?

#### Solution:

#### ACCOUNTING TREATMENT ON ISSUE OF SHARES

SI.	Transactions	Account Debited	Account Credited
1.	On receipt of the application money  (a) On allotment of shares, for transferring share application money to share capital account	Share	Share application Share capital
	(b) For refunding the application money received on the rejected applications	Share application	Bank
	(c) For retaining the surplus money when allotment is made pro-rata:		
	(i) in case the money is used towards allotment	Share application	Share allotment
	<ul><li>(ii) the part of surplus money exceeding the amount due on allotment</li></ul>	Share application	Calls in advance

			-
3.	For allotment money becoming due	Share allotment	Share capital
4.	On receipt of allotment money	Baok	Share allotmen
5.	On making (any) call from the shareholders	Share	
6.	On receipt of the call money	Bank	Sharecall
7.	If shares are issued for consider- ation other than cash, i.e. in exchange of assets	Assets	Share capital

Note. The name of the type of share, viz. equity or preference, should be prefixed with the word 'Share'.

Problem 7. What entries are passed when a company purchases a running business?

Solution. A company may purchase an existing business of a sole trader or a partnership or a limited company. The amount which is to be paid by the company for the purchase of the business is called the purchase consideration. If the value of the net assets (total assets than purchase consideration, the

for goodwill and as such, it is

than the purchase price, the company stands to gain, and such a gain is credited to capital reserve account.

#### ACCOUNTING TREATMENT

SI.	Tronsoctions	Account Debited	Account Credited
1.	For purchase of husiness at a certain agreed value	Busioess purchase	Veodors
2.	For assets and liabilities taken over at an agreed value	Various assets	Various liabilities Business purchase

#### Note:

- (1) If the credit exceeds the dehits, debit Goodwill A/c
- (ii) If the debit exceeds the credits, credit Capital Reserve A'e
- For discharging the payment of the Vendors purchase consideration by paying cash/issuing shares/issuing deheotures.

Problem 8. A company issued a prospectus inviting applications for 1,00,000 shares of Rs. 10 each, and statiog that 10,000 share-will

be issued in addition as fully paid to vendors in part payment of purchase money:

Rs. 5.00 per share is payable on application.

Rs. 2 50 per share is payable on allotment.

Rs. 2.50 per share is payable on 3 months after allotment.

The capital offered was over-subscribed by 10,000 shares.

The amount due on allotment was received in full. Only Rs. 2,00,000 were received against the call due.

The purchase money of Rs. 1,50,000 was paid in full.

Make necessary entries to open the books of the company.

The authorised capital of the company was Rs. 25,00,000.

(I.I.B. Part I. May 1968)

#### COMPANY ACCOUNTS-ISSUE OF SHARES— AT PREMIUM AND AT DISCOUNT

**Problem 1.** What do you mean by issuing shares at a premium? Give proforma entries when the shares are issued at a premium.

Solution. When the shares are issued at a price which is higher than its face value, shares are said to be issued at a premium. The difference between the issue price and the face value of the share is called its premium.

The premium received on issue of shares must be transferred to a separate account styled 'Share premium account'.

According to Sec. 78 of the Indian Companies Act, 1956 the amount transferred to share premium account can be utilised only for the following purposes:

- 1. To issue fully paid bonus shares.
- 2. To write off the preliminary expenses of the company,
- 3. To write off the expenses of, or the commission paid, or discount allowed on any issues of shares or debentures of the company.
- 4. To pay the premium on the redemption of any redeemable preference shares or on any debentures of the company.

The amount of the premium is included in the amount receivable on application or allotment or even with one of the calls.

## ACCOUNTING TREATMENT

SI.	Transactions	Account Debited	Account Credited
1.	When premium is received with application money:		
-	(a) On receiving application money	Bank	Share application

Share capital

(h) For transferring andti-

	to share capital and share premium	Share applica- tion	Share capital Share premium
2.	When premium is received with allotment:		
	(a) For making the allotment due with premium	Share allotmeot	Share capital Share premium
	(b) On receipt of the amount	Bank	Share allotment
3.	When premium is received on calls		

Note: The name of the type of share, iz. equity or preference should be prefixed with the word 'Share'.

Share ...

call

Bank

Problem 2. How would you deal with Discount on issue of shares?

Solution. A new company is not allowed to issue shares at a

discount, I.e. at a price which is less than its face value. As per the provisions of Sec. 79 of the Indian Companies Act, 1955, a company can issue its shares at a discount only if the following conditions are fulfilled:

- The issue of the shares at a discount must be authorised by a resolution passed by the company in geoeral meeting and must be sanctioned by the Court (Company Law Board).
- The resolution must specify the maximum rate of discount at which the shares are to be issued. This rate must not excred 10% except with the saccino of the Ceotral Government.
- At least one year must have elapsed after the commencement of business.
- The shares to be issued at a discount must be of a class which has already been issued by the company.
- 5. The shates must be issued within two mooths of the date on the Court (Company Law as the Court (Company as the Court (Company)

When shares are issued at a discount, a special account, 'Discount on issue of shares account' will be opened and is dehited at the time of allotment of shares. The journal entries will be as shown on the next page:

SI.	Transactions	Account to be Debited	Account to be Credited
1.	On receiving application money	Bank	Share application
2.	For transferring application money to share capital A/c	Share application	Share capital
3.	For making allotment due	Share allotment Discount on issue of shares	Share capital
4.	On receiving allotment money	Bank	Share allotment

Every prospectus relating to the issue of shares and every balance sheet issued by the company subsequently to the issue of shares at a discount must contain particulars of the discount allowed on the issue of shares or of so much of the discount as has not been written off at the date of the issue of the prospectus or balance sheet.

C

# COMPANY ACCOUNTS—FORFEITURE OF SHARES AND RE-ISSUE OF FORFEITED SHARES

**Problem 1.** Under what circumstances can a company forfeit its shares? How would you deal with share forfeiture account, before the re-issue of such shares and after their re-issue?

Solution. If a member does not pay the amount due on various calls, the directors have a right to charge interest according to the terms of the Articles of Association from the due date of the call up to the date of payment. However, if a member does not pay at all, the directors must serve a 14 days notice on the defaulting member requiring the payment of unpaid call/s (call in arrear) together with the accrued interest. The notice shall also state that, in the event of non-payment on or before the last day of the notice, the shares mentioned therein will be liable to be forfeited. If the member still does not pay the call, his case is put up before the board of directors, who can then decide to forfeit the amount already paid on the shares and cancel the shares. The amount paid by the member is not to be returned to him.

The effect of forfeiture of shares is that the defaulting shareholder ceases to be a member in respect of the forfeited shares, and the moneys paid by him on the shares prior to the forfeiture belongs to the company.

#### ACCOUNTING TREATMENT OF FORFEITURE OF SHARES

		The second		
51.	Transactions	Account Debited	Account Credited	
1.	For recording calls in arrears	Calls in accears	Calls	
2.	On forfeiture of shares	Share capital (amount called up)	Calls in arrears (Unpaid amount) Share forfeiture (Amount paid)	
*3.	If share premium is also due on shares to be forfeited	Share capital (Amount called up) Share premium (Premium due)	Calls in arrears (Unpaid amount) Share for seiture (Amount paid)	
4.	If shares to be forfeited were issued at a discount	Share capital (Amount called up)	Share Forfeiture (Amount paid) Calls in Arrears (Unpaid amount) Discount on issue of shares	

^{*}Premium received on the original Issue of the forfeited shares is not to be cancelled on the forfeiture of shares, because premimum once collected cannot be cancelled.

The forfeited shares can be re-issued by the directors within a reasonable time and at a reasonable price. Such shares can be re-issued even at a discount, but this discount must not exceed the amount actually received already on such forfeited shares. The discount allowed on re-issue is debited to the share forfeiture account.

If the discount allowed is less than the amount forfeited on the re-issued shares, the profit so carned is transferred to the Capital Reserva account.

The amount forfeited on shares not yet re-issued is not to be transferred to Capital Reserve account but will remain in the share forfeiture account. The credit balance standing in the share forfeiture account relating to the shares forfeited but not yet re-issued is to be shown in the bulance sheet along with the share capital.

## ACCOUNTING TREATMENT OF RE-ISSUE OF FORFEITED SHARES

SI.	Transactions	Account Debited	Account Credited
1.	For re-issuing the forfeited shares	Bank (Actual amount received) Share forfeiture (Discount allowed on re-issue)	Share capital (amount called up)
2.	For transferring profit on re-issue of forfeited shares to capital reserve	Share forfeiture	Capital reserve

Applications are received for 1,20,000 shares. On 10th January, the Directors decide to reject applications in respect of 20,000 shares, the application money being refunded in full. All allotment monies are received in full.

On 31st March, a call of Rs. 2'50 per share is made and all sums due are received except on 1,000 shares allotted to Mr. A. Subsequently these shares were forfeited.

Pass necessary journal entries to record the transactions.

(I.I.B. Part I, November 1969)

PURPELLUNG OF BUREA

The balance of Rs. 4 in the share forfeiture account is the amount forfeited on 2 shares @ Rs. 2 per share. These are the shares which are not yet re-issued.

The credit balance standing in the share forfeiture account relating to the shares forfeited but not yet re-issued is to be shown in the Balance sheet along with share capital account.

Problem 10. Janta Company Limited offered 3,00,000 Equity Shares of Rs. 10 each at Rs. 12 per share payable Rs. 3 on application (including premium of Rs. 2), Rs. 3 on allotment and the balance in two equal instalments at the end of 3 months and 6 months from the date of allotment respectively.

Applications for 4,10,000 shares were received by 30th June, 1978 and shares were allotted at the rate of 3 shares for every 4 shares applied for on 15th July, 1978. Rs. 30,000 were refunded on 31st July 1978. All amounts due were received on due dates with the exception of the final call on 3,000 shares. These shares were forfeited on 21st March, 1979.

Show the Journal entries (including each) and draw a balance sheet as on 31st March 1979 to show the capital structure of the Company.

(I.I.B. Part I, April 1979)

(iii) To allot the remainder of the available shares pro-rate among

the other applicants.

Applications were received for 18,000 shares and it was decided

(iv) To utilise the surplus received on applications in part payment of amounts due on allotment.

An applicant, to whom 40 shares had been alloted, failed to pay the amount due on the first and final call and his shares were forfeited. These shares ware re-issued as fully paid at Rs. 9 00 per share.

Show the necessary ledger entries to record these in the books of the company.

		3,000		

Notes: (A) The balance of Rs. 3,000 in the share forfeiture account is the amount forfeited on 100 shares @ Rs. 80 per share. These are the shares which are not yet re-issued.

The credit balance standing in the share forfeiture account relating to the shares forfeited but not yet re-issued is to be shown in the balance sheet along with share capital.

(B) Premium received on the original issue of the forfeited shares is not to be cancelled on the forfeiture of shares hecause premium once collected cannot be cancelled.

Problem 14. Exe Limited issued a prospectus inviting applications for 20,000 shares of Rs. 10 each at a premium of Rs. 2 per share payable as under.

	Rs.
On application	2
On allotment	5 (including premium)
On first call	3
On second and final call	2

Applications were received for 30,000 shares and pro-rata allotment was made on the applications for 24,000 shares. Excess money paid on applications was utilised towards allotment money.

Mr Aar, to whom 400 shares were allotted, failed to pay the allotment money and on his subsequent failure to pay the first call, his shares were forfeited.

Mr. Ame, the holder of 600 shares failed to pay the two calls, and his shares were forfeited after the second call.

Of the shares forfeited, 800 shares were sold to Mr. Kay ctedited as fully paid for Rs. 9 per share, the whole of Mr. Aar's shares being included.

Pass the necessary entries in the journal of Exe Limited.

- (c) When it is payable from reserve fund in satisfaction of a call on shares; and
- (d) When bonus shares are issued from reserve fund.

Solution. When a company possesses large reserves as a result of its policy not to distribute whole of its profits, but to accumulate them to enable the company to meet unforeseen contingencies, and such reserves have been accumulated to an amount far in excess of the present or future needs of the company, it would then be deemed desirable to give the benefit of these huge reserves to the existing shareholders by way of compensation for the loss of dividend which they had suffered. This can be done by giving bonus to the shareholders, after passing a resolution for the same in the general meeting of the shareholders.

Bonus to shareholders can be declared out of accumulated profits (revenue or capital), which are generally there in the balance sheet of the company in the shape of profit and loss account (credit balance), reserve fund, share premium account, capital redemption reserve account, or general reserve.

When the bonus to shareholders is declared, the following journal entry is passed in the books of the company.

## JOURNAL ENTRY

Date	Particulars	L.F.	Debit Amount	Credit Amount
Year			Rs.	Rs.
M.D.	Reserve fund A/c Profit & loss A/c Share premium A/c Capitai redemption reserve A/c To Share bonus A/c (Being the bonus declared of accumulated profits as per the tion dated——)			

The bonus payable to the shareholders can be satisfied by paying cash, or by making partly paid shares as fully paid up, or by issuing additional shares considered as Bonus Shares.

ACCOUNTING TREATMENT			
SI.	Transactions	Accounts debited	Accounts debited
(a)	Bonus to shareholders is declared from profits and	(i) Profit & loss appropriation	Share bonus
	is payable in cash	(ii) Share bonus	Cash/bank
(b)	When it is payable out of reserve fund	(i) Reserve fund (ii) Share bonus	Share bonus Cash/bank

(c) When it is payable from teserve fund in satisfaction of a call on shares

(i) Share call Share capital (for making the call due)

(ii) Reserve fund Share bonus (for declaring bonus out of reserve fund)

(iii) Share bonus Share call (for utilisation of bonus for payment of eall due) Share bonus

(i) Reserve fund (For declaring bonus out of Reserve fund) (ii) Share bonus (for utilising

bonus shares)

Share capital bonus to issue

(d) When bonus shares are issued from reserve fund (This is also called

capitalisation of reserves)

A company pays cash bonus when it has accumulated large reserves and sufficient cash to pay bonus.

Bonus shares can be issued only if:

- (1) Articles of Association of the company permit the issue of bonus shares.
- (ii) There is sufficient balance of unissued shares (Authorised - issued).
- (iii) Permission of the Controller of Capital Issues regarding issue of Bonus Shares bas been obtained, and
- (iv) The proposals of the directors regarding issue of honus shares have been approved by the shareholders in the general meeting

The Balance Sheet of the company should disclose the amount and number of bonus shares. It should also show the source from which the bonus shares have been issued.

If the honus sbares are issued at a premium, the entry for declaring the bonus will be same as already discussed. But on the issue of bonus shares, 'Share bonus account' will be debited with the total amount of the bonus declared. 'Share capital account' will be credited with the face value of the shares issued and 'Share premium account, will be credited with the amount of premium on the total issue.

Problem 2. A limited company has resolved to utilise Rs. 5,00,000 out of its reserve fund in declaration of a bonus to the shareholders. The bonus, however, is to be applied to the extent of Rs 2,00,000 in payment of final call of Rs. 40 per share on 5,000 shares of Rs. 100 each; and to the extent of Rs. 3.00,000 in the issue of 3,000 fully paid shares of Rs. 100 each to the existing shareholders.

Draft journal entries necessary to give effect to the above resolution.

(1 1.B. Part I Van 1071)

2,10,000

Problem 7. The following particulars have been extracted from

the Balance Sheet of A.B.C. Ltd. as on 31st December, 1973:					
Capital					
Nominal:	-	Rs.			
5,000 5% Preference shares of Rs. 100 each		5,00,00			

5,000 5% Preference shares of Rs. 100 each 5,00,000 10,000 Ordinary shares of Rs. 10 each 1,00,000

Rs. , 6,00,000

Issued:

2,500 5% Preference shares of Rs. 100 each
5,000 Ordinary shares of Rs. 10 each

5,000 Ordinary shares of Rs. 10 each

Reserve Fund

Profit and Loss A/c'balance 12,000

During the year 1974 the following resolutions were passed:

(1) A resolution converting the Preference shares into Preference

shares of Rs. 50 each.

(2) A resolution declaring a bonus of 20% on the Ordinary shares to be provided as to half out of Reserve Fund and the remainder out of the halance of Profit and Loss account.

The bonus to be satisfied by the issue of one fully paid ordinary share for five ordinary shares held.

Give the journal entries which are necessary to carry out the above resolutions; and show how they would affect the balance sheet of the company as at 31st December, 1974. Assume the profit for the year 1974 amounted to Rs. 40,005.

(I I.B. Part I, November 1974)

#### Solution:

### Resolution No. 1

For converting the Preference shares of Rs. 100 each into Preference shares of Rs. 50 each, no journal entry will be passed in the hooks of accounts of the company. A note will only be made in the Balance Sheet under Share eapital account that each Rs. 100 5% Preference share has heen converted into two Rs. 50 5% Preference shares. The face value of the shares will be halved and the number of shares will be doubled. The total amount of the share remain the same.

Resolution No. 2

### COMPANY ACCOUNTS—ISSUE AND REDEMPTION OF DEBENTURES

Problem 1. How would the following be dealt with in accounts?

- (a) Issue of debentures,
- (b) Debentures issued at par and repayable at par,
- (c) Debentures issued at a premium and repayable at par,
- (d) Debentures issued at a discount and repayable at par,
- (e) Debentures issued at par and repayable at a premium,
- (f) Debentures issued at a discount and repayable at a premium.

Solution. In addition to raising capital by the issue of shares, a company may borrow money by issue of Debentures, which are documents acknowledging the amount borrowed and containing provisions for the repayment of the principal, the payment of interest, etc. i.e., the procedure for their redemption.

Debentures may be issued at par, at a discount or at a premium, and are issued in the same way as shares.

### ACCOUNTING TREATMENT FOR ISSUE AND REDEMPTION OF DEBENTURES

***************************************			
SI.	Transactions	Account Debited	Account Credited
	ssue of Debentures: eceipt of application money	Bank	Debenture

application

ISSU	B AND REDEMPTION OF DEBENTURES		9

### (F) For Issue of Debentures at a Discount and Repayable at a Premium:

Debentures Bank (1) On issue of Debentures at a Premium on Discount on discount redemption of issue of debentures dehentures Loss on redemption of debentures Bank Debentures ' (2) On redemption of debentures Premium on at a premium redemption of debentures

### Notes:

'Debentures' are shown in the Balance Sheet on the Liabilities side under the head "Secured Loans".

'Discount on issue of Debentures' appears on the Assets side of the Balance Sheet under the head "Miscellaneous Expenditure".

'Premium on Debentures' is shown in the Balance Sheet on the Liabilities side under the head "Reserves and Surplus".

'Loss on Redemption of Debentures' is a capital loss and is shown on the Assets side of the Balance Sheet untill written off.

'Premium on redemption of debentures' will appear as a liability so far as the debentures are not redeemed.

**Problem 2.** Write a short note on 'Debentures Issued as Collateral Security Against Loan'.

 $\supset r$ 

Explain briefly from a Bank's view point—'Collateral Security'.

(I.I.B. Part I, November 1973)

Or

Givera short note on 'Collateral Security',

(I.I.B. Part I, May 1969)

### Solution:

Sometimes Debentures are issued as security in addition to any other security against loan or bank overdraft. Such an issue of debentures is known as issue of debentures as collateral security.

The theme behind such an issue is that if the company does not repay the loan and the interest and the main security is not sufficient, the bank will be entitled to sell these debentures in the market and can recover its loan. If the company repays the loan, the bank will return the debentures issued as collateral security.

Thus, the debentures become alive only when loan is not repaid.

As the debentures are issued only as a collateral security, no entry is passed in the books of the company on their issue. The fact of such an issue of debentures is, however, clearly stated in the Balance Sheet as a way of note under the 'Loan' as well as under the 'Debentures', as sbown below:

#### BALANCE SHEET OF---

as on-

Liabilities & Capital Amount Properties & Assets Amount Rs. Share Capital: Fixed Assets: Reserves and Surplus: Investments: Secured Loans: Carrent Assets, Loans and Advances: Debentures Rs.——Debentures issued @ Rs.——each paid up (In addition,——debentures of (A) Current Assets: (B) Loans and Advances: . Miscellancons Expenditure : Rs .-- each have been issued as collateral security) Loans and Advances from Banks (Secured by the issue of----

collateral security) Unsecured Loans:

debentures of Rs---each as

Current Liabilities and

Provisions:

(A) Current Liabilities:

(B) Pravisions:

Problem 3. Explain the method of Sinking Fund policy for redemption of Debentures and the entries in connection therewith,

Solution. When a company borrows money by issue of debentures which are redeemable at the end of a specified period, it is advisable to provide for their redemption by setting aside annually from out of profits a certain sum, and invest the same in outside securities. Otherwise it would be very difficult for the company to pay lump-sum at the time when the redemption is due.

The provision for redemption of debentures is usually made by creating a Sinking Fund. Under this method, a certain fixed sum is set aside out of profits every year and a corresponding amount is invested in gilt-edged securities, which when accumulated with compound interest will be equal to the amount required to redeem the debentures on their due date. The amount to be set aside every year is found by reference to the Sinking Fund Tables. (Specimen of a Sinking Fund Table is given on page 2.63).

### ACCOUNTING TREATMENT

At the end of period	SI.	Transactions	Account Debited	Account Credited
First year		For setting aside the required sum out of profits for the year	Profit and loss appropriation	Sinking fund
		For investing the corresponding sum in gilt-edged securities	Sinking fund investments	Bank
Second year and	1.	For receiving the periodical interest on the said investments	Bank	Interest on sinking fund investments
subse- quent years	2.	For transferring the interest to sinking fund account	Interest on sinking fund investments	Sinking fund
	3.	For setting aside the required sum out of profits for the year	Profit & loss appropriation	Sinking fund
	4.	For investing the annual amount along with the amoun received in respect of interest on gilt-edged securities	Sinking fund t investments	Bank
Last year	1.	For receiving the periodical interest on the said investments	Bank`	Interest on sinking fund investments

	5.	For making payment to the debenture-holders to redeem the debentures	Debentures	Bank
	6.	(a) If there is profit on the sale of the investments	Sinking fund investments	Sinking fund

(b) If there is loss on the sale of the investments 7. For closing the sinking

Sinking fund Sinking fund

investments General

fund account, I.e., when its balance is transferred to the general reserve account Sinking fund

reserve

Problem 4. A private limited company, being in need of further capital, issued debentures to the amount of Rs. 2,00,000. One of the directors took up Rs. 50,000 at a premium of Rs. 5 per cent. A friend of his subscribed for Rs. 50,000 at a premium of Rs. 3 per cent, while Rs. 1,00,000 were issued to the company's hankers by way of collateral security for a Inan of Rs. 60,000.

Show how these transactions would appear in the Company's Balance Sheet and pass journal entries to record the same.

(I.I.B. Part I, October 1968)

### Solution:

### JOURNAL ENTRY IN THE BOOKS OF THE COMPANY

SI.	Particulars	L.F. Debit Amount	Credit Amount
(1)	Bank A/c Dr. To Debentures A/c To Premium on debentures A/c	Rs. 1,04,000	Rs. 1,00,000 4,000
	(Being issue of Rs. 50,000 debentures at a premium of Rs. 5 per cent, i.e. Rs. 2,500, and of Rs. 50,000 debentures at a premium of Rs. 3 per cent, i.e. Rs. 1,500)		

Note. When debentures are issued as security in addition to any other security against a lnan or hank overdraft such an issue of dehentures is known as issue of dehentures as collateral security. When the company repays the Inan, the hank will return the debentures issued as collateral security.

No entry need be passed in the bonks of the company for issuing dehentures as collateral security, hecause the debentures are not really alive. Depentures become alive only when loan is not repaid.

The fact of such an issue of debentures must be clearly stated in the halance sheet underneath the loan which is thus covered, as shown helow:

### BALANCE SHEET OF-CO. PVT. LTD.

Problem 5. On July 1, 1974 A Ltd. gave notice of its intention to redeem its outstanding Rs. 4,00,00,000 4½% Debenture stock on January 1, 1975 at 102 per cent and offered the holders the following options:

- (1) To apply the redemption money to subscribe for-
  - (a) 6% Cum. Pref. shares of Rs. 20 each at Rs. 22:50 per share—accepted by the holders of Rs. 1,71,60,000 stock; or
  - (b) 6% Dehenture stock at Rs. 96 per cent—accepted by the holders of Rs. 1,44,00,000 stock; or
- (2) To have their holdings redeemed for cash, if neither of the options under (1) was accepted.

You are required to show the journal entries necessary to record the redemptions and allotments under (1) (a) and (b) and to state the amount of each required to satisfy the option (t)

(I.I B. Part I, May 1975)

A company gave notice of its intention to redeem its outstanding Rs. 4,00,00,000 6% Dehenture stock at Rs. 102 per cent, and offered the holders the following options:

To apply the redemption monies to subscribe for-

- (a) 5 per cent Cum. Pref. shares of Rs. 20 each at Rs. 22:50 per share.
- (b) 6 per cent Debenture Stock at 96 per cent.
- or (c) to have their holdings redeemed for cash.

Particulare

debenture holders at Rs. 102 per, cent on the value of Rs. 4.00.00,000)

Holders of Rs. 1,71,00,000 stock accepted the proposal (a), i. Holders of Rs. 1,44,00,000 stock accepted the proposal (b).

And the remaining stock holders accepted the proposal (c).' .

Pass journal entries to record the above transactions.

Problem 6. On 1st January 1969, a limited company issued 200 debentures of Rs. 100 each at a discount of 5 per cent.

The debentures were repayable at par on 31st December 1978, and in accordance with the terms of issue an accumulating sinking fund was created by setting aside out of profits of an equal sum at 31st December in each year, the same being invested at compound interest immediately, P.S.B.K. 883-42

1971

Taking the annual amount thus set aside to be Rs. 1,590 and the rate of interest received on investment 5 per cent per annum:

- (a) Set out the Sinking Fund account and the Investment account as they would appear in the company's books for the five years ended 31st December 1973, and show how the particulars as to the debentures and relative accounts will appear on the company's Balance Sheet on that date.
  - Explain how the various accounts will be adjusted assuming that the repayment of the debentures takes place on the due date. Ignore income tax.

(I I.B. Part I, May 1974)

### FINAL ACCOUNTS OF COMPANIES

Problem 1. Is there any difference between Final Accounts of 'Sole Trader' and 'Partnership' and that of a 'Company'? Explain, if there is any.

Solution. The principles and methods of preparing the final accounts of a joint stock company are the same as in the case of a 'sole trader' or a 'partnership firm.' However, the form and the various details required to be presented in the final accounts of a company are governed by the provisions of the Indian Companies Act 1956, Las under:

'The Balance Sheet must be in the Form set out in Part I of Schedule VI, or as near thereto as circumstances permit'.

'The Profit and Loss Account must comply with the requirements of Part II of Schedule VI so far as they are applicable'.

### PROFIT AND LOSS ACCOUNT

There is no need of separate Trading and Profit and [Loss Account—only one account, called Profit and Loss Account, containing all items that go into the Trading and Profit and Loss Account will be sufficient.

Figures relating to the previous year are also to be given.

The balance (profit or loss) on Profit and Luss Account is transferred to Profit and Loss appropriation account and is not added to or deducted from Capital account.

Although, the Companies Act has not prescribed any standard form for the preparation of the Profit and Loss account, but every Profit and Loss account of a company is to he prepared in such a form so as to give a true and fair view, of the profit or loss of the company. All material information is to be disclosed, so that whosnever reads the Profit and Loss account, can understand it and is able to form a fair idea of the profit carned or loss suffered by the company during the accounting period and also the factors leading to the profit or the loss.

### PROFIT AND LOSS APPROPRIATION ACCOUNT

In case of a sole proprietorship or a partnership firm, the balance of Profit and Loss account is directly transferred to the Capital account/s. But in case of a joint stock company, the net profit, as shown by the Profit and Loss account, is transferred to Profit and Loss appropriation account. This account shows how the profits are disposed of.

The balance of the account is then shown as a separate item in the Balance sheet—under the head 'Reserves and Surplus', if there is a credit balance.

brokerage on underwriting or subscription of shares or debentures

As the actual liability arises only on the happening of a contingency, it is not usual to make any provisions for such habilities in the accounts. Only the habilities that have actually accrued due as on the date of the Balance sheet should necessarily he brought into account,

The Form of Balance sheet as per Part I Schedule VI under Sec. 211 of the Indian Companies Act, 1956, requires that Contingent Liabilities should he stated in the shape of a foot-note on the fiabilities side of the Balance sheet of the company,

The amount of any guarantees given by the company on behalf of directors or other officers of the company are also required to be shown

separately under this head. Problem 3. Give short notes on: Share Capital; Working

Capital.

the company.

(I.I.B. Part I, May 1969) Solution, Share Capital: Share capital represents the total amount of shares subscribed by the shareholders to serve as capital for

The Share capital is divided into the following categories:

(a) Anthorised Capital. This is also known as Nominal or Registered capital of the company and represents the total amount of the eapital for which the company is authorised to issue shares as per the Memorandum of association of the company.

(b) Issued Capital. It is the amount of shares that have been offered to the public for subscription for cash and/or to the vendors as

fully or partly paid shares.

(e) Subscribed Capital. This represents that part of the issued. capital which is subscribed (applied for) by the public and the vendors.

(d) Called up Capital. It is that amount of the subscribed. capital which represents the amount of money called up on the shares

actually subscribed.

(c) Paid up Capital. It is that portion of the called up capital which has actualty been paid up by the shareholders as also to the extent to the shares bave been issued as paid up.

Working Capital: This term is used to denote the halances of paid up capital of the company left for working the business after paying for its fixed assets.

(Working capital=Paid-up capital-Fixed assets),

This term is also applied to the amount by which the 'liquid' or 'current' assets, i.e. readily realisable assets of any concern, exceed its current liabilities.

(Working capital=Current or Liquid assets-Current liabilities),

Problem 4. What is the difference hetween Reserve Capital and Capital Reserve.

(I I.B. Part I, October 1972)

Solution. Reserve Capital. A company may by special resolution determine that any portion of its subscribed capital which has not been called up, shall not be called up, except in the event of and for the purpose of winding up. Such portion of the share capital is known as Reserve Capital. This part of the Share capital cannot be called up during the life time of the company.

Capital Reserve. Capital Reserve is a reserve which has been accumulated out of capital profits and surpluses and is not available for distribution as dividend amongst the share holders. Share Premium and Capital Redemption Reserve Account should not be credited to Capital Reserve; as these accounts are to be kept separate. Only profit or a surplus of capital nature can be credited to such a reserve.

Following are the examples of profits or surpluses which can be

credited to capital reserve:

- 1. Profit on re-issue of forfeited shares.
- 2. On purchase of a business by the company, if the price paid for acquiring net assets (Assets taken over—liabilities taken over) is less than their value, i.e. when the value of net assets acquired is more than the price paid for them, the difference is transferred to Capital Reserve account.
  - 3. Profits prior to incorporation of the company.
- 4. Premium received on issue of debentures, or profit on redemption of debentures where the distribution of such profits is not permitted by the Articles of association of the company.
- 5. Capital profits on sale of fixed assets, when these are not available for distribution as dividend by the Articles of association of the company, or where the profits have not been realised, or where the profit is realised but is likely to be wiped out by the deficiency on revaluation of other assets.

Problem 2. M/s. Ruhy Industries Ltd., acquired machinery and equipment at a cost of Rs. 2,70,000 in 1979 for their new factory. During the years 1980 and 1981 additions to the machinery and equipment as also the sales therefrom were as under :-

Year	Cost of additions	Cost of machinery and equipment sold	Amount of sale proceeds
	Rs.	Rs,	Rs.
1980	10,100	8,000	6,900
1981	9,175	10,000	9,350

The Company has been writing off depreciation at 15% p.a. on the written down value, beginning from the year in which the machinery and equipment were purchased. Entire machinery and equipment sold during the years 1980 and 1981 were originally purchased in 1979.

In January 1982, the company decided to change the method of charging the depreciation from 1 1 ½, p.a. on written down value to 10% pn. on the original cost and credit the difference amount to Capital Reserve Account.

You are required to draw (1) Machinery and Equipment Account, (ii) Depreciation Account, and (iii) Profit and Loss on Sale of Machinery and Equipment Account of the Company for the year 1979 to 1981 on the basis of information provided above and also arrive at the amount of excess depreciation to he transferred to Capital Reserve Account. All payments for purchases were made by cheques and similarly, the entire sale proceeds were received by cheques which were deposited in Bank account. (I.I.B. Part I, May 1983)

1982 Jan.	Profit and Loss A	'c	Dr.	25.067	

cost as per working note 5) Working Notes: 1. Cost of Machinery and Equipment sold in 1980 is Rs. 8.000. Th's Machinery and Equipment was purchased in 1979 and depreciation was provided on it @ 15% on the writen down value method.

Therefore, its written down value in 1980 is calculated as under: Rs. 3.000 original cost in 1979 Less: Depreciation for 1979 @ 15% Rs. 1.200

Written down value in 1980 Rs. 6,800

To Capital Reserve A/c

(Being excess depreciation charged from 1979 to 1981 transferred to Capital Reserve as the company decided to change the method of charging the depreciation from 15% p.a. on written down value to 10% p a. on the original

This machinery and equipment was sold for Rs. 6900.

Thus, profit on sale of machinery and equipment is Rs. 100

(Rs. 6,900-6,500) 2. Depreciation for the . Que aleulate

equipment as under:

•	DE	PRECIATION
Original cost of machinery purchased in 1979 Add: Purchased during 1980	Rs.	2,70,000 10,100
Less: Sold (as per working note No. 1)		2,80,100 6,800
Less: Depreciation provided during 1979	,	2,73,300 40,500
Depreciation for the year 1980		2,32,800 34,920
Written down value		1,97,880
3. Cost of Machinery and Equipment sold in 19 this Machinery and Equipment was puchased in 19 was provided on it @ 15% on the written down value	979 and d	Rs. 10,000. epreciation
Therefore its written down value in 1981 is calcu	ulated as	under:
Original cost in 1979 Rs.  Less: Depreciation for 1979 @ 15%	. 10,000 1,500	
Written down value in 1980  Less: Depreciation for 1980 @ 15%	8,500 1,275	
Written down value in 1981	7,225	,
This machinery and equipment was sold for Rs.	9,350.	

This indumery and equipment was sold for Res. 9,550.

Thus, Profit on sale of Machinery and Equipment is Rs. 2,125 (Rs. 9,350-7,225)

4. Depreciation for the year 1981 is calculated on Machinery and quipment as under:

quipment as under:	on made and
Written down value of Machinery in 1980  Aad: Purchased during 1981	Rs. 1,97,880 9,175
Less: Sold (as per working note No. 3)	2,07,055 7,225

Depreciation for the year 1981 1,99,830 29,957 1,69,855

1.05.395

5.	(a)	Depreciation charged on Machinery and Equipment from	1979
		to 1981 at 15% p a. on written down value:	

(n) 1979 Rs. 40,500 (ii) 1980 Rs. 34,920

29,975 Rs. (iii) 1981

==== (b) Depreciation to be charged on Machinery and Equipment from

1979 to 1981 at 10% p.a. on original cost : Rs.

27,000 (1) In 1979 oo Rs. 2,70,000

(ii) In 1980 on Rs. 2,62,000 (Rs. 2,70,000 Less Rs. 8,000) Rs. 26,200

> Rs. 1.010 · 27,210 on Rs. 10,100

(iii) In 1981 on Rs. 2,52,000 (Rs. 2,62,000

Less Rs. 10,000) Rs. 25,200

918 on Rs. 9,175 Rs.

26,118 80,328

---

Excess depreciation charged is Rs. 25,067 (Rs. 1,05,395-80,328) * Figures are taken to the nearest of rupee.

Problem 3. On the basis of the following information available from the books and records of M/s. Rajesh and Sons, you are required to prepare a Bank Reconciliation Statement as on 31st March 1983:-

(1) Overdrast balance as per pass book Rs. 14,360.

(ii) Cheques amounting to Rs. 24,450 were deposited by the firm in its bank account on or before 31st March 1983 but the bank cleared them and credited the account on 4th April 1983 excepting one cheque for Rs. 980 which was returned unpaid on 6th April 1983.

(iii) The bank debited Rs. 11 on 6th April 1983 towards its charges on the aforesaid cheque.

(iv) Cheques aggregating Rs. 4,110, issue by the firm on or before 31st March 1983 were presented and debited to the account on 2nd April 1983.

(v) A cheque dated 26th March 1983 issued by the firm for Rs. 3,080 was returned unpaid on 29th March 1983 on account of a technical defect therein. The firm reened the intimation about the return of cheque on 3rd April 1983,

(vi) A cheque for Rs. 1,415 deposited by another firm was wrongly

credited by the bank to the account of this firm o 26th March 1983 and the entry was reversed on 3rd April 1983.

(vii) Interest on overdraft amounting to Rs. 181 was debited by the bank on 31st March 1983 but the advice thereof was received by the firm on 2nd April 1983.

You are required to arrive at the balance as per cash book as on 31st March 1983.

(I.I.B. Part I, May 1983)

## Solution:

## BANK RECONCILIATION STATEMENT OF M/s. RAJESH AND SONS as on 31st March 1983

Rs.	Rs.
	14,360_
24,450	
	4,110
	3,080
•	1,415
181	
	1,666
24,631	24,631
	24,450

Note: Cheque amounting to Rs. 980 dishonoured on 6th April 1983 and returning charges thereon Rs. 11 will not affect the Bank Reconciliation Statement, as these transactions took place after the date of preparation of the statement, i.e. 31st March 1933.

Problem 4. The Trial Balance of M/s. Ramani Bros. as on 31st March 1983 shows a difference of Rs. 8,350, the debit total being in excess of the credit total. The Accountant of the firm closed the books placing this amount in an account styled as "Difference in Books Account". The following errors were located in the books of account subsequently in April, 1983:—

- (i) A sum of Rs. 845 being the goods sold on cash was wroogly colored as Rs. 485 io Sales account.
- (ii) Cheque for Rs. 7,210 received from a debtor Mr. A was deposited in bank account but was omitted to be entered in the account of Mr. A.
- (iii) Rs. 4,810 being cash paid to a creditor Mr. B was entered as Rs. 4,010 and that too io the account of another creditor Mr. C.
- (w) Printing expenses Rs. 840 were paid by a cheque but no entry for this transaction appears in the bank account.
- (v) Goods purchased on credit at a cost of Rs. 1,310 from Mr. C were returned to him but no entry was passed in his account at the time of returning the goods although the transaction was duly accounted for in the purchases account.

You are required to pass journal entries (with full oarration) for rectifying the above errors and also draw the "Difference in Books Account" to arrive at the closing balance therein as at the end of April, 1931.

(I.I.B. Part I, May 1983)

	Problem 6. M/s. AB three-partners Mr. A, Mr. B a firm in the ratio of 4:2:2. March 1983 is given below:	and Mr C	is a partnership concersharing profits and losses ince Sheet of the firm as	of the
,	Liabilities	Rs.	Assets	Rs.
	Capital A/c of Mr. B Capital A/c of Mr. C Sundry Creditors Provision for expenses Loan from Bank	1,14,000 49,000 52,000 1,28,000 32,600 81,000		14,300 22,600 1,81,000 1,10,000 11,300 82,400 34,860
		4,56,600		4,56,600

It was agreed between the partners that Mr. B will retire from the partnership and Mr. D will join the partnership with effect from 1st April 1983. For the partoes of reconstitution of the firm as above, the partners acreed to the following arrangement:—

(1) Mr. A. Mr. C. and Mr. D will share the future profits and losses of the arm in the rat of 3 : 2 : 1 and their capital will be in the same ratio in which they share the profits. It was also agreed that the total

capital of the partners would be Rs. 2,40,000.

(2) To determine the share of outgoing partner, goodwill of the firm is valued at Rs. 1,80,000 and it was agreed that the amount of goodwill shall not appear as an asset in the books of the partnership after its reconstitution.

(3) Fixed assets are to be revalued by Rs. COCCO and Furniture and Fixtures to Rs. 91 000 at the time of reconstitution. 7 per cent of the sundry debtors is con idered bad and doubtful and hence the amount is to be written off.

(4) Out of the amount payable to Mr. B on account of his retirement, a sum of Rs. 67(0 will be paid in eash and the balance amount, if any, is to be retained as his loan to the firm. Mr. D will bring in Rs. 61(00 a) has ourse of dipital and the balance amount, if any, payable by him to virds on the widness debited to a separate loan account to be opened in his name. Mr. A and Mr. C will also retain any surplus in their capital accounts or loans to the firm.

You are required to draw (i) Revaluation account, (ii) Capital account of Mr. A. Mr. B. Mr. C and Mr. D. and (iii) Balance Sheet of the arm after its rice assistation

Provision for expenses Loan from Bank	δ1,000	Fixed Assets Add: Revaluation	1,10,000 60,000 1,70,000
•		Prepaid expenses Furniture and Fixtures	11,300
		Add: Revaluation i	by 8,600 91,000
•		D's Loan A/c C's Loan A/c	9,000 29,018
	5,36,748		5,36,748
Working Notes:			
A. B and C's old rat B retires from and E A, C and D's new ra	io= 4:2:2 joins the pa	2 or 1/2, 1/4 and 1/ urtnership.	-
(1) A's old as well as ficed nor gained.			
(ii) B retire from the	firm and sac	rifices his 2th share	<b>:.</b>
(in) C's old proportion	n 15 1/4th a	and new proportion	n is 1/3rd. His

Eaining proportion is  $1/3 - 1/4 = \frac{4 - 3}{12} = 1/12$ th. (ii) D is admitted and his gaining proportion is 1/6th.

Calculation of capital of partners after reconstitution of the

the proposions of 1/12th and 1/6th

Therefore B's sacrifice of hith share is gained by C and D in

45,000

Rs. 2,40,000 Total capital = Rs. 1,20,000 A's share 1/2 i.e.

C's share 1/3 i.e. 80,000 Rs.

D's share 1/6 i.e. 40,000 Rs.

Calculation of Goodwill: 3.

Goodwill of the firm is valued at Rs. 1,80,000.

B's share in the Goodwill = Rs. 1,80,000  $\times \frac{1}{4}$  = Rs. 45,000. This amount shall be paid by C and D in their gaining proportions.

C's share = Rs. 1,80,000 ×  $\frac{1}{12}$  = Rs. 15,000.

D's share = Rs. 1,80,000  $\times$  1/6= Rs. 30,000.

## JOURNAL ENTRY

Rs. 70,000 Amount brought in Cash by D is only Rs. 61,000, the journal entry

Cash A/c Dr. 61,000 D's Loan A/c Dr. 9,000

To D's Capital A/c 70,000

Calculation of cash on hand:

for this will be:

Opening Balance

Rs. 14,300 Add: Amount received from D Rs. 61,000 Rs. 75,300

Less: Amount paid to B Rs. 40,000 Closing Balance Rs. 35,300

Problem 7. XYZ Ltd. is a company with authorised capital

comprising 10,00,000 equity shares of Rs. 10 each. In 1982 the company issued 1,20,000 equity shares of Rs. 10 each at

a premium of Rs. 3 per share. The amount was payable as under:

(1.I.B. Part I. May 1983)

Debit

Credit

l F

Rs. 2.50 on application.

Particulars

Rs. 3:50 on allotment (including Re. 1 premium)

Rs. 700 on first and final call (including Rs. 2 premium).

The Company received applications for 1,50,000 shares. Allotment was made for 1,20,000 shares and the balance amount of application money was refunded to the applicants. Full allotment money was received including the premium amount. Amount received in response to the first and final call notice was Rs. 8,34,505. The Company forfeited the shares on which the first and final call was not paid and reissued them again at a permium of Rs. 3 per share. Entire money on the reissued shares was received in one instalment.

You are requested to pass journal entries including those for eash (with full narration) to give effect to the above transactions.
